5 The present invention generally relates to an apparatus for optimizing vehicle operation and, more particularly, relates to a system which both notifies the driver of recommended corrections in vehicle operation and, under certain conditions, automatically initiates selected corrective action.

Description of Related Art

10 It has long been recognized that the improper operation of a vehicle may have many adverse effects. For example, the fuel efficiency of a vehicle may vary dramatically based upon how the vehicle is operated. More specifically, operating a vehicle at excessive speed, excessive RPM and/or excessive manifold pressure will result in both reduced fuel economy and increased operating costs. The aforementioned increased operating costs can be quite considerable, particularly for an owner or operator of a fleet of vehicles. To correct these
15 types of improper vehicle operations are often surprisingly simple. For example, upshifting the drive gear will typically eliminate an excessive RPM condition. However, even when the solution is quite simple, oftentimes, the driver will be unaware of the need to take corrective action.

20 A variety of patents have disclosed systems, commonly referred to as "shift prompters", which monitor the operation of a vehicle and advises the operator of the vehicle when to take certain actions. Numerous ones of these devices include sensors which measure
