(57) **ABSTRACT**

Systems and methods for establishing a shared dynamic content experience are disclosed. A method for sharing a dynamic content experience according to the invention includes an inviter computer communicating, via a first communication path between an invitee computer and a network based communication server, an invitation to establish a shared dynamic content experience between the inviter computer and the invitee computer. If the invitation is accepted, a content sharing communication path is established between and inviter computer and the invitee computer. Information relating to a current dynamic content experience at the inviter computer is communicated, via the content sharing communication path, to the invitee computer. Information relating to a current dynamic content experience at the invitee computer is communicated, via the content sharing communication path, to the inviter computer.
