EXPRESS MAIL CERTIFICATION

"Express Mail" mailing label number EV133107427US

Date of Deposit August 16, 2002

I hereby certify that this transmittal letter and the other papers and fees identified in this transmittal letter as being transmitted herewith are being deposited with the United States Postal Service "Express Mail Post Office to Addressee" service under 37 C.F.R. § 1.10 on the date indicated above and are addressed to the Hon. Assistant Commissioner for Patents, P.O. Box 2327, Arlington VA, 22202.

MICHAEL SHANAHAN

Hon. Assistant Commissioner for Patents Washington, D.C. 20231

TRANSMITTAL LETTER FOR CONTINUATION PATENT APPLICATION

Sir:

Transmitted herewith for filing are the [X] specification; [X] claims; [X] abstract; [X] declaration; [X] a verified statement claiming small entity status; [X] an information disclosure statement; for the above-identified patent application.

Also transmitted herewith are:

- [X] 13 sheets of:
 - [X] Formal drawings.
 - [] Informal drawings. Formal drawings will be filed during the pendency of this application.
- [] An assignment of the invention to:
 - [] A check in the amount of \$40.00 to cover the recording fee.
 - [] An associate power of attorney.
- [] A certified copy of the priority document, ______ , filed ______ ,

The filing fee has been calculated as shown below:

FOR	NUMBER FILED			NUMBER EXTRA		RATE			FEE	
BASIC FEE									 \$370.00	
TOTAL CLAIMS	15	-	20	=	12	x	\$ 9	=	\$ 0.00	
INDEPENDENT CLAIMS	3	-	3	=	О	x	\$ 42	=	\$ 0.00	
[] A MULTIPLE DEPENDENT CLAIM							\$ 130	=	\$ 0.00	

[X] A check in the amount of $\frac{370.00}{1}$ in payment of the filing fee is transmitted herewith.

Michael E. Shanahan

METHODS AND APPARATUSES FOR PROGRAMMING USER-DEFINED INFORMATION INTO ELECTRONIC DEVICES

This application is a continuation of United States Patent Application 09/518,712 filed March 3, 2000 which claims priority from United States Provisional Application 60/169,158 filed December 6, 1999.

Background of the Invention

This application relates to electronic devices, and more particularly to a programming apparatus that allows users to program user-defined information into their electronic device.

There are many types of electronic devices available to consumers today that have the ability to produce both audio sounds and video displays. Many of these devices provide users with the ability to select and play a particular piece of audio or video. A television viewer, for example, may tune to a TV channel and watch a particular program, or connect a VCR or DVD player to the television in order to view a specific program not currently being broadcast. Similarly, an

audio system user may tune a receiver to a particular radio station to hear a certain genre of music, or connect a CD or tape player to the system in order to hear specific pieces of music. In both cases, the audio and video is user-selectable.

Currently, however, there are many electronic products that offer an audio/video playing capability that are not fully user-programmable. Users of such devices (e.g., wireless or cordless telephones, pagers, personal digital assistants (PDAs), hand-held computers and the like) have to choose from a limited selection of pre-programmed information (e.g., audio clips, video clips or frames, etc.) placed there by the manufacturer. This severely limits the user's ability to customize the device to suit his or her particular taste. Furthermore, most pre-programmed audio tends to be rather generic and can be confusing when a device of a nearby user generates a sound similar to or the same as that of another user's device. Although a programmable memory within many such electronic devices could support user-defined audio, currently, no system exists for programming such information into an electronic device.

The same is true for user-defined video. For example, certain types of user-defined video information, such as video clips, frames, and other digital or analog images could be programmed into an electronic device (e.g., PDA, wireless phone, or any portable display device) and displayed at a time of the user choosing. Although a programmable memory within such a device could support user-defined video, currently, no system exists for programming such information into the device.

Summary Of The Invention

It is therefore an object of the present invention to provide an apparatus that allows a user to

DOCKET

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
