### Microsoft Advanced Systems Format (ASF) Specification version 1.2

**IMPORTANT—READ CAREFULLY:** This Microsoft Agreement (“Agreement”) is a legal agreement between you (either an individual or a single entity) and Microsoft Corporation (“Microsoft”) for the version of the Microsoft specification identified above which you are about to download (“Specification”). By downloading, copying, or otherwise using the Specification, you agree to be bound by the terms of this Agreement. If you do not agree to the terms of this Agreement, do not download, copy or otherwise use the Specification.

The Specification is owned by Microsoft or its suppliers and is protected by copyright laws and international copyright treaties, as well as other intellectual property laws and treaties.

The capitalized terms used in this Agreement are defined as follows:

- “Advanced Systems Format” or “ASF” means version 1.2 of the extensible file storage format developed by or for Microsoft for authoring, editing, archiving, distributing, streaming, playing, referencing, or otherwise manipulating content.
- “Necessary Claims” means any and all claim(s), but only such claim(s), of a patent or patent application that (a) are owned, controlled, or sublicenseable (without payment of royalties to an unaffiliated third party) by Microsoft now or at any future time; and (b) are necessarily infringed by implementing ASF as set forth in the Specification. Notwithstanding the foregoing sentence, Necessary Claims do not include any claims: (i) to any enabling technologies that may be necessary to make or use any product or portion thereof that includes ASF (e.g., enabling semiconductor manufacturing technology, compiler technology, object oriented technology, operating system technology, protocols, programming interfaces, etc.); or (ii) covering the implementation of other specifications, technical documentation or technology merely referred to in the Specification.
- “Windows Media Codecs” means all versions of the audio, video, and data compression/decompression algorithms (“codecs”) that have a ASF Codec Description that begins with “Windows Media” or “Microsoft”. Windows Media Codecs includes, but is not limited to, the “Windows Media Audio” codecs, “Windows Media Video” codecs, and “Microsoft MPEG-4” codec.

All other initially capitalized terms have the meanings assigned to them elsewhere in this Agreement.
