Symantec Fellow and Chief Architect, Security Technology and Response

Carey Nachenberg, Symantec fellow and chief architect of Symantec's Security Technology and Response (STAR) division, has been an innovator at Symantec Corporation for the past eighteen years.

As a chief architect, Nachenberg drives the technical strategy for all of Symantec's core security technologies and security content, which in total protect over 100M customers around the world. During his time at Symantec, Nachenberg has led the design and development of many of Symantec's core antivirus and intrusion prevention technologies, as well as key aspects of Symantec's LiveUpdate updating system. His work in these areas has garnered 25 United States patents.

Nachenberg has earned both BS and MS degrees in Computer Science and Engineering from the University of California at Los Angeles, where he continues to serve as a member of UCLA's Computer Science Alumni Advisory Board and a staff lecturer of Computer Science.
