	§	

Title: "Mobile Entertainment and  
Communication Device"

**DECLARATION OF JARI VALLI**

I, Jari Valli, do hereby declare that I am over twenty-one years of age and have personal knowledge of the facts declared herein:

1. I am currently employed by Nokia Corporation ("Nokia"), a Finnish corporation, as a senior manager. I have been an engineer with Nokia since May of 1995. I currently reside in the country of Finland.
2. While employed by Nokia, I worked as a software project manager on the team that developed the Nokia 9110 Communicator ("the Product"). As part of that team, I am familiar with production and distribution of the Product and any associated user's guides, as well as their respective life cycles.
3. The Product was introduced to the public on March 18, 1998 at the CeBIT '98 exhibition in Hannover, Germany, which I attended. At the exhibition, the public was able to interact with the actual Product, and Nokia issued at least one press release at that time detailing the Product's features. A true and correct copy of the press release is attached to this Declaration as Exhibit A.
4. The Product was first released to the public for sale on February 1, 1999, when Nokia began shipping the Product from the Nokia factory in Salo, Finland. Issue 2 of the User's

Manual for the Product was included with the Product when shipped starting on February 1, 1999.

5. A true and correct copy of Issue 2 of the User's Manual for the Product is attached to this Declaration as Exhibit B. Exhibit B is a fair and accurate representation of Issue 2 of the User's Manual that began shipping with the Product on February 1, 1999.

6. In addition, it is a customary business practice of Nokia that the User's Manual for the Product would have been made available to the public for downloading through the Internet on the same day that the Product was first shipped. Accordingly, the User's Manual for the Product would have been available to the public for downloading through the Internet on or about February 1, 1999.

7. I further declare that all statements made herein of my own knowledge are true and that all statements made on information and belief are believed to be true; and further, that these statements were made with the knowledge that willful false statements and the like so made are punishable by fine or imprisonment, or both, under Section 1001 of Title 18 of the United States Code and that such willful false statements may jeopardize the validity of an application or any patent issuing thereon.

I declare under penalty of perjury under the laws of the United States of America that the foregoing is true and correct. Executed on the 29 day of April in 2009, in the country of Finland.

Jari Valli

**Nokia introduces its second generation communicator - The pocket-sized Nokia 9110 Communicator combines an ultimate mobile office with a superb phone**  
March 18, 1998

Nokia introduced the new Nokia 9110 Communicator today at the CeBIT '98 exhibition in Hannover, Germany. Nokia's second generation communicator is a digital GSM hand-portable with data communication capabilities, including the internet, e-mail, telefax and short message service (SMS) with personal organizer functions. All the features are built into a pocket-sized, easy-to-use device weighing only 249 grams. The product will be available in volume for GSM 300 markets in the third quarter of 1998.

The Nokia 9110 Communicator has several new applications leading the wireless office into a new era. It enables an easy transfer of information between the communicator and a PC. First in the industry, it enables wireless imaging and comes with an optional Memory Card for extra data storage. The Nokia 9110 Communicator has a back lit, high quality screen, and optimized functionality of the user-interface.

"The new Nokia 9110 Communicator is a truly outstanding, complete communications tool with a wide range of applications optimized for use in corporate and vertical markets, such as field sales, transportation, security and fleet management. This device increases productivity and reduces costs by giving easy yet efficient access to required information while on the move, in the office or at home," says Anssi Vanjoki, Senior Vice President, Nokia Mobile Phones.

**All applications work together seamlessly**

The Nokia 9110 Communicator is an excellent, pocket-sized mobile office. All applications - GSM phone with handsfree, telefax, Internet and intranets, e-mail, short message service (SMS) and calendar - work together seamlessly. For example, the user can check e-mail, download a file, edit it, save it and then send it by fax. After the fax is sent, the user can call using the handsfree to discuss and view the fax on the screen at the same time. The multiview calendar, contacts database and texts are Windows compatible.

To enhance the functionality and usability with PCs, Nokia has included in the sales package a new software, the PC Suite for Nokia 9110 Communicator. This software allows the user to transfer information and software between the communicator and computers using Windows 95 and Windows NT 4.0 operating systems.

The need to access data on the move has been one of the key drivers for the industry in creating data communication solutions. As wireless services have evolved beyond voice, value-added services play an increasingly important role not only in business use but also personal lifestyle uses with the emergence of electronic banking and commerce, electronic postcards and entertainment, for example.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
