JukeBoksi

On these pages you can browse ringtones made for certain Nokia GSM-telephones or yourself make your very own ringtone.

The service has been updated! With the new JukeBoksi you can publish any songs you like, as well as songs protected by authors' rights laws. Previously, already-published songs have been moved back into a song bank, from which you can publish them again. The price of the service has changed. Obtaining one ringtone from number **1559** costs **2.75** marks.

What do I need?

You need a GSM telephone onto which you can upload ringtones or songs and a **Radiolinja connection**. Obtaining one ringtone from number **1559** costs **2.75** marks. Supported GSM telephones are Nokia 6110, 6150, 8810 (8110i and 9000i also play almost all tones well). **There can be only one song at a time on the telephone. When you load a new one from JukeBoksi, the previous song will be deleted from your telephone.**

Warning! On Nokia 5110, 3110, 2110 and 1610 telephones, among others, you cannot change or play your own ringtone, as the phone's manufacturer did not equip these phones with the necessary features. For this reason, ringtones made with JukeBoksi **do not work** on said phones. You can get more information on GSM phones and their features from your mobile phone dealer.

You will find more information on the JukeBoksi service at the [help page](#).

Lists, lists, lists...

Check Finland's hottest ringtones from the [TOPTEN list](#) or browse other ringtone lists:

- [Newest songs](#)
- [Song name lists](#)
- [Performer lists](#)
- [List of ringtone types](#)

Do you want your phone's very own song?

You can make your own ringtone using the Harmooni program, which functions best with the Internet Explorer 4.0.1 or Netscape 4.0.5 browsers. Using other browsers can freeze your computer! Your browser must have Java functionality connected.

If you haven't created ringtones before, you will have to first register as a JukeBoksi harmonizer. You can register on the [registration page](#).

Previous harmonizers can go directly to their own song bank.

You can also just test the [Harmooni program](#).

[Yomi Media Oy](#) created and implemented the JukeBoksi program for Radiolinja.

JukeBoksi

Näillä sivuilla voit selaila tiettyihin Nokian GSM-puhelimiin tehtyjä soittoääniä tai tehdä itse ihan oman soittoäänesi.

Palvelu on uudistunut! Uudella JukeBoksilla voit julkaista mitä tahansa sävelmiä, myös tekijänoikeuslailla suojattuja sävellyksiä. Aiemmin jo julkaistut biisit on siirretty takaisin biisipankkiin, josta voit julkaista ne uudelleen. Palvelun hinta on muuttunut. Yhden soittoäänien hakeminen numerosta **1559** maksaa aina **2,75 mk.**

Mitä tarvitsen?

Tarvitset GSM-puhelimen johon voi ladata soittoääniä eli biisejä ja **Radiolinjan liittymän**. Yhden soittoäänien hakeminen numerosta **1559** maksaa aina **2,75 mk.** Tuetut GSM-puhelimet ovat Nokia 6110, 6150, 8810 (myös 8110i ja 9000i soittavat lähes kaikki äänet oikein).

Puhelimessa voi olla kerrallaan vain yksi biisi. Kun lataat JukeBoksista uuden, edellinen biisi poistuu puhelimestasi.

Huom! Mm. Nokian 5110, 3110, 2110 ja 1610 -puhelimissa ei ole mahdollisuutta siirtää tai soittaa omaa soittoääntä, koska puhelimien valmistaja ei ole varustanut näitä puhelimia tarvittavilla ominaisuuksilla. Tästä syystä JukeBoksilla tehdyt soittoäänit **eivät toimi** edellä mainituissa puhelimissa. Lisätietoa GSM-puhelimesta ja niiden ominaisuuksista saat matkapuhelinkauppiaaltasi.

Lisätietoa JukeBoksi-palvelusta löydät erilliseltä [ohjesivulta](#).

Listoja, listoja, listoja...

Tsekkaa Suomen kuumimmat soittoäänit [TOPTEN-listalta](#) tai siirry selailemaan muita soittoäänilistoja:

- [Biisien nimilista](#)
- [Esittäjälista](#)
- [Soittoäänityyppilista](#)

Haluatko puhelimeesi ikioman biisin?

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
