E-mail

Michael E. Shanahan is a partner in the law firm of McDermott Will & Emery LLP and is based in the Firm's New York office. Michael focuses his practice on intellectual property litigation including patents, trademarks, copyrights, unfair competition and misappropriation of trade secrets. He also has extensive experience counseling clients in transactional and patent prosecution matters regarding patents and other forms of intellectual property.

As a registered patent attorney, Michael devotes a substantial part of his practice to counseling clients on enforcing, acquiring, evaluating, licensing and protecting intellectual property assets. He represents clients in litigation matters, licensing transactions and technology-related agreements, joint ventures, IPOs, mergers and acquisitions and provides IP-related business counseling. He conducts patent and intellectual property due diligence, patent assertion and infringement investigations including the evaluation and assessment of third party IP litigation for non-litigants, patent clearance analyses, right to use, validity and enforceability studies and provides patent infringement and non-infringement opinions. Michael further practices in both foreign and domestic patent prosecution matters including, reexamination, reissue, appeals and interference.

Michael has represented clients in a wide range of technologies including Internet and storage system management software, interactive program guides, electronics, including analog and digital integrated circuits, microprocessors and programmable logic devices, financial and business methods including trading and quoting tools, complex physics technologies including nuclear magnetic resonance imaging, coriolis mass flow sensors and confocal microscopy, medical devices, gaming systems, chemical technologies including phenol production, telecommunications systems and fiber optics, mechanical and electro mechanical devices, manufacturing technologies, aerospace systems, gas turbines and construction tools.

Michael authored "Preliminary Injunctions in Patent Cases" for *IP Litigation Quarterly*, June 2004 and "The Effects of Foreign Patent Proceedings on Patent Litigation in the United States" for *The Intellectual Property Strategists*, December 2004.

Prior to entering the practice of law, Michael was an electrical engineer in the guidance systems division of a major defense contractor and worked on many high profile projects such as the International Space Station and F-22.

Michael earned both a bachelor's and master's degree in electrical engineering, as well as a master's degree in computer engineering. He is admitted to practice in New York and before the U.S. Supreme Court, the U.S. Court of Appeals for the Federal Circuit, the U.S. District Court for the Eastern District of New York, the U.S. District Court for the Southern District of New York and the United States Patent and Trademark Office.

(54) Title: PERFORMANCE ENHANCEMENT OF TRANSMISSION CONTROL PROTOCOL (TCP) FOR WIRELESS NETWORK APPLICATIONS

(57) Abstract: A new Fast Recovery Plus (FR+) mechanism, and associated method, for wireless and/or mobile network applications to avoid network congestion in a TCP/IP packet-switched network. A method of flow control and congestion avoidance congestion in a network comprises the steps of: transmitting, at a source node, data packets to a destination node, via at least an intermediate node; receiving, at the destination node, data packets transmitted from the source node, via the intermediate node, and generating a duplicate ACK back to the source node to inform the source node that a data packet has been lost; upon receipt of a designated number of duplicate ACKs, at the source node, determining that a data packet has been lost; initializing a counter, at the source node, and recording a congestion window CWND, a slow start threshold Ssthresh, and a maximal sequence number SN that has been sent into the network; upon receipt of a next duplicate ACK, at the source node, recording its acknowledged sequence number ACK SN; determining, at the source node, if the acknowledged sequence number ACK SN is no more than a recorded sequence number SN; otherwise, incrementing the counter, at the source node, and re-transmitting a lost packet; if the acknowledged sequence number ACK SN is no more than the recorded sequence number SN, determining, at the source node, if the packet loss is due to transmission error; and if the packet loss is due to the transmission error, setting, at the source node, the slow start threshold Ssthresh to $\text{Max}(\text{CWND}, (\text{Ssthresh} + \text{CWND})/2)$, wherein CWND and Ssthresh exhibit values recorded.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
