The table below provides an update on the petitioners/real parties-in-interest, status and filing date of each of these proceedings.

These eight (8) IPR petitions have substantial overlap with respect to the prior art cited and associated grounds of unpatentability. Even to the extent different prior art is cited in some of these petitions, the prior art relied on in some of the petitions is similar to the prior art contained in some of the other petitions. As a result, many of these petitions, including this petition (i.e., IPR2015-00408), are redundant and present cumulative prior art and substantially the same arguments as other earlier-filed IPR petitions, concurrently-filed IPR petitions, and/or later-filed IPR petitions.
