

Claims 4, 10, 12, 18-19, 21, 26-27, and 29 of the '966 patent are Unpatentable as Obvious Over *Bernasconi*, in View of *INOMAX label, Loh, Goyal, and Macrae*.

U.S. Pat. No. 8,282,966	<i>Bernasconi, INOMAX label, Loh, Goyal, and Macrae</i>
<b>CLAIM 4</b>	
<p>The method of claim 1, wherein the child's left ventricular dysfunction is attributable to congenital heart disease.</p>	<p><b>All the elements of the independent claim from which this claim depends are disclosed in Bernasconi, INOMAX label, Loh, and Goyal as outlined in Ex. 1033 in Claim 1.</b></p> <p><i>Macrae</i> teaches left ventricular dysfunction (“LVD”) can be attributable to congenital heart disease.</p> <p style="text-align: center;">Inhaled NO exposure may even be harmful in some babies with congenital heart disease, such as those with obstructed total anomalous pulmonary venous drainage or severe left ventricular dysfunction with right-to-left ductal shunting</p> <p>Ex. 1008 at 374.</p>
<b>CLAIM 10</b>	
<p>The method of claim 6, wherein the left ventricular dysfunction is attributable to congenital heart disease.</p>	<p><b>All the elements of the independent claim from which this claim depends are disclosed in Bernasconi, INOMAX label, Loh, and Goyal as outlined in Ex. 1033 in Claim 6.</b></p> <p><i>Macrae</i> teaches LVD can be attributable to congenital heart disease.</p> <p style="text-align: center;">Inhaled NO exposure may even be harmful in some babies with congenital heart disease, such as those with obstructed total anomalous pulmonary venous drainage or severe left ventricular dysfunction with right-to-left ductal shunting</p> <p>Ex. 1008 at 374.</p>

<p><b>U.S. Pat. No. 8,282,966</b></p>	<p><i>Bernasconi, INOMAX label, Loh, Goyal, and Macrae</i></p>
<p><b>CLAIM 12</b></p>	
<p>The method of claim 11, wherein the left ventricular dysfunction is attributable to congenital heart disease.</p>	<p><b>All the elements of the independent claim from which this claim depends are disclosed in Bernasconi, INOMAX label, Loh, and Goyal as outlined in Ex. 1033 in claim 11.</b></p> <p><i>Macrae</i> teaches LVD can be attributable to congenital heart disease.</p> <p>Inhaled NO exposure may even be harmful in some babies with congenital heart disease, such as those with obstructed total anomalous pulmonary venous drainage or severe left ventricular dysfunction with right-to-left ductal shunting</p> <p>Ex. 1008 at 374.</p>
<p><b>CLAIM 18</b></p>	
<p>The method of claim 13, wherein the left ventricular dysfunction is attributable to congenital heart disease.</p>	<p><b>All the elements of the independent claim from which this claim depends are disclosed in Bernasconi, INOMAX label, Loh, and Goyal as outlined in Ex. 1033 in Claim 13.</b></p> <p><i>Macrae</i> teaches LVD can be attributable to congenital heart disease.</p> <p>Inhaled NO exposure may even be harmful in some babies with congenital heart disease, such as those with obstructed total anomalous pulmonary venous drainage or severe left ventricular dysfunction with right-to-left ductal shunting</p> <p>Ex. 1008 at 374.</p>
<p><b>CLAIM 19</b></p>	
<p>The method of claim 13, wherein the left ventricular dysfunction of the first child is attributable to congenital heart disease.</p>	<p><b>All the elements of the independent claim from which this claim depends are disclosed in Bernasconi, INOMAX label, Loh, and Goyal as outlined in Ex. 1033 in Claim 13.</b></p> <p><i>Macrae</i> teaches LVD can be attributable to congenital heart disease.</p>

<p><b>U.S. Pat. No. 8,282,966</b></p>	<p><i>Bernasconi, INOMAX label, Loh, Goyal, and Macrae</i></p>
	<p>Inhaled NO exposure may even be harmful in some babies with congenital heart disease, such as those with obstructed total anomalous pulmonary venous drainage or severe left ventricular dysfunction with right-to-left ductal shunting</p> <p>Ex. 1008 at 374.</p>
<p><b>CLAIM 21</b></p>	
<p>The method of claim 20, wherein the pre-existing left ventricular dysfunction of the first child is attributable to congenital heart disease.</p>	<p><b>All the elements of the independent claim from which this claim depends are disclosed in Bernasconi, INOMAX label, Loh, and Goyal as outlined in Ex. 1033 in Claim 20.</b></p> <p><i>Macrae</i> teaches LVD can be attributable to congenital heart disease.</p> <p>Inhaled NO exposure may even be harmful in some babies with congenital heart disease, such as those with obstructed total anomalous pulmonary venous drainage or severe left ventricular dysfunction with right-to-left ductal shunting</p> <p>Ex. 1008 at 374.</p>
<p><b>CLAIM 26</b></p>	
<p>The method of claim 22, wherein the left ventricular dysfunction is attributable to congenital heart disease.</p>	<p><b>All the elements of the independent claim from which this claim depends are disclosed in Bernasconi, INOMAX label, Loh, and Goyal as outlined in Ex. 1033 in Claim 22.</b></p> <p><i>Macrae</i> teaches LVD can be attributable to congenital heart disease.</p> <p>Inhaled NO exposure may even be harmful in some babies with congenital heart disease, such as those with obstructed total anomalous pulmonary venous drainage or severe left ventricular dysfunction with right-to-left ductal shunting</p> <p>Ex. 1008 at 374.</p>

<p><b>U.S. Pat. No. 8,282,966</b></p>	<p><i>Bernasconi, INOMAX label, Loh, Goyal, and Macrae</i></p>
<p><b>CLAIM 27</b></p>	
<p>The method of claim 22, wherein the pre-existing left ventricular dysfunction of the first child is attributable to congenital heart disease.</p>	<p><b>All the elements of the independent claim from which this claim depends are disclosed in Bernasconi, INOMAX label, Loh, and Goyal as outlined in Ex. 1033 in Claim 22.</b></p> <p><i>Macrae</i> teaches LVD can be attributable to congenital heart disease.</p> <p>Inhaled NO exposure may even be harmful in some babies with congenital heart disease, such as those with obstructed total anomalous pulmonary venous drainage or severe left ventricular dysfunction with right-to-left ductal shunting</p> <p>Ex. 1008 at 374.</p>
<p><b>CLAIM 29</b></p>	
<p>The method of claim 28, wherein the pre-existing left ventricular dysfunction of the first child is attributable to congenital heart disease.</p>	<p><b>All the elements of the independent claim from which this claim depends are disclosed in Bernasconi, INOMAX label, Loh, and Goyal as outlined in Ex. 1033 in Claim 28.</b></p> <p><i>Macrae</i> teaches LVD can be attributable to congenital heart disease.</p> <p>Inhaled NO exposure may even be harmful in some babies with congenital heart disease, such as those with obstructed total anomalous pulmonary venous drainage or severe left ventricular dysfunction with right-to-left ductal shunting</p> <p>Ex. 1008 at 374.</p>
