

container

From "Dictionary of Communications Technology: Terms, Definitions and Abbreviations, Wiley"

Wiley Dictionary of Communications Technology © 1998 by John Wiley & Sons Ltd.

Under NetWare 4.x's Directory Services, an element in the directory tree that can contain other containers, leaf objects, or both. The container commonly corresponds to a meaningful level of organization or administration, while the leaf corresponds to a specific network element, such as a user, node or peripheral. Two types of containers commonly used include the Organization and Organization Unit.
