

Claims 4, 10, 12, 15, 19, 20, 22, 28, and 30 of the '284 patent are unpatentable as Obvious Over *Bernasconi* in View of *INOMAX label, Loh, Goyal, and Macrae*.

U.S. Pat. No. 8,293,284	<i>Bernasconi, INOMAX label, Loh, Goyal, and Macrae</i>
CLAIM 4	
The method of claim 1, wherein the patient's left ventricular dysfunction is attributable to congenital heart disease.	<p>All the elements of the independent claim from which this claim depends are disclosed in <i>Bernasconi, INOMAX label, Loh, and Goyal</i> as outlined in Ex. 1036 in Claim 1.</p> <p><i>Macrae</i> teaches left ventricular dysfunction (“LVD”) can be attributable to congenital heart disease.</p> <p>Inhaled NO exposure may even be harmful in some babies with congenital heart disease, such as those with obstructed total anomalous pulmonary venous drainage or severe left ventricular dysfunction with right-to-left ductal shunting</p> <p>Ex. 1008 at 374.</p>
CLAIM 10	
The method of claim 6, wherein the left ventricular dysfunction is attributable to congenital heart disease.	<p>All the elements of the independent claim from which this claim depends are disclosed in <i>Bernasconi, INOMAX label, Loh, and Goyal</i> as outlined in Ex. 1036 in Claim 6.</p> <p><i>Macrae</i> teaches LVD can be attributable to congenital heart disease.</p> <p>Inhaled NO exposure may even be harmful in some babies with congenital heart disease, such as those with obstructed total anomalous pulmonary venous drainage or severe left ventricular dysfunction with right-to-left ductal shunting</p> <p>Ex. 1008 at 374.</p>
CLAIM 12	
The method of claim 11, wherein the left	<p>All the elements of the independent claim from which this claim depends are disclosed in <i>Bernasconi, INOMAX label,</i></p>

<p>U.S. Pat. No. 8,293,284</p>	<p><i>Bernasconi, INOMAX label, Loh, Goyal, and Macrae</i></p>
<p>ventricular dysfunction is attributable to congenital heart disease.</p>	<p>Loh, and Goyal as outlined in Ex. 1036 in Claim 11.</p> <p><i>Macrae</i> teaches LVD can be attributable to congenital heart disease.</p> <p>Inhaled NO exposure may even be harmful in some babies with congenital heart disease, such as those with obstructed total anomalous pulmonary venous drainage or severe left ventricular dysfunction with right-to-left ductal shunting</p> <p>Ex. 1008 at 374.</p>
<p>CLAIM 15</p>	
<p>The method of claim 14, wherein the left ventricular dysfunction is attributable to congenital heart disease.</p>	<p>All the elements of the independent claim from which this claim depends are disclosed in Bernasconi, INOMAX label, Loh, and Goyal as outlined in Ex. 1036 in Claim 14.</p> <p><i>Macrae</i> teaches LVD can be attributable to congenital heart disease.</p> <p>Inhaled NO exposure may even be harmful in some babies with congenital heart disease, such as those with obstructed total anomalous pulmonary venous drainage or severe left ventricular dysfunction with right-to-left ductal shunting</p> <p>Ex. 1008 at 374.</p>
<p>CLAIM 19</p>	
<p>The method of claim 13, wherein the left ventricular dysfunction is attributable to congenital heart disease.</p>	<p>All the elements of the independent claim from which this claim depends are disclosed in Bernasconi, INOMAX label, Loh, and Goyal as outlined in Ex. 1036 in Claim 13.</p> <p><i>Macrae</i> teaches LVD can be attributable to congenital heart disease.</p> <p>Inhaled NO exposure may even be harmful in some babies with congenital heart disease, such as those with obstructed total anomalous pulmonary venous drainage or severe left ventricular dysfunction with right-to-left ductal shunting</p> <p>Ex. 1008 at 374.</p>

<p>U.S. Pat. No. 8,293,284</p>	<p><i>Bernasconi, INOMAX label, Loh, Goyal, and Macrae</i></p>
<p>CLAIM 20</p>	
<p>The method of claim 13, wherein the left ventricular dysfunction of the first patient is attributable to congenital heart disease.</p>	<p>All the elements of the independent claim from which this claim depends are disclosed in Bernasconi, INOMAX label, Loh, and Goyal as outlined in Ex. 1036 in Claim 13.</p> <p><i>Macrae</i> teaches LVD can be attributable to congenital heart disease.</p> <p>Inhaled NO exposure may even be harmful in some babies with congenital heart disease, such as those with obstructed total anomalous pulmonary venous drainage or severe left ventricular dysfunction with right-to-left ductal shunting</p> <p>Ex. 1008 at 374.</p>
<p>CLAIM 22</p>	
<p>The method of claim 21, wherein the left ventricular dysfunction of the first patient is attributable to congenital heart disease.</p>	<p>All the elements of the independent claim from which this claim depends are disclosed in Bernasconi, INOMAX label, Loh, and Goyal as outlined in Ex. 1036 in Claim 21.</p> <p><i>Macrae</i> teaches LVD can be attributable to congenital heart disease.</p> <p>Inhaled NO exposure may even be harmful in some babies with congenital heart disease, such as those with obstructed total anomalous pulmonary venous drainage or severe left ventricular dysfunction with right-to-left ductal shunting</p> <p>Ex. 1008 at 374.</p>
<p>CLAIM 28</p>	
<p>The method of claim 23, wherein the left ventricular dysfunction of the first patient is attributable to congenital heart disease.</p>	<p>All the elements of the independent claim from which this claim depends are disclosed in Bernasconi, INOMAX label, Loh, and Goyal as outlined in Ex. 1036 in Claim 23.</p> <p><i>Macrae</i> teaches LVD can be attributable to congenital heart disease.</p>

<p>U.S. Pat. No. 8,293,284</p>	<p><i>Bernasconi, INOMAX label, Loh, Goyal, and Macrae</i></p>
	<p>Inhaled NO exposure may even be harmful in some babies with congenital heart disease, such as those with obstructed total anomalous pulmonary venous drainage or severe left ventricular dysfunction with right-to-left ductal shunting</p> <p>Ex. 1008 at 374.</p>
<p>CLAIM 30</p>	
<p>The method of claim 29, wherein the left ventricular dysfunction of the first patient is attributable to congenital heart disease.</p>	<p>All the elements of the independent claim from which this claim depends are disclosed in Bernasconi, INOMAX label, Loh, and Goyal as outlined in Ex. 1036 in Claim 29.</p> <p><i>Macrae</i> teaches LVD can be attributable to congenital heart disease.</p> <p>Inhaled NO exposure may even be harmful in some babies with congenital heart disease, such as those with obstructed total anomalous pulmonary venous drainage or severe left ventricular dysfunction with right-to-left ductal shunting</p> <p>Ex. 1008 at 374.</p>
