Twice the strength

Half the cost.

Twice the strength. Half the cost.

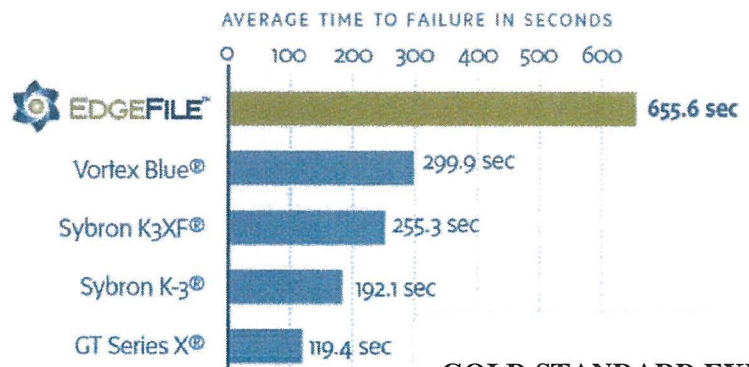

Order a FREE Sample Now. Call 855.985.3636

Stronger and lasts longer. A broken file is the one of the worst things that can happen during a procedure. Our revolutionary heat treated Fire-Wire™ Niti yields performance enhancing durability (PED) that provides not only incredible flexibility, but far out performs even the most expensive files on the market in cyclic fatigue testing; a key indicator of file strength and durability.

Cost saving is crucial for today's dental practices.

In today's economy you're seeing fewer patients, performing fewer procedures, resulting in bringing less money into your practice. You need ways to save money. EdgeEndo™ believes premium technology shouldn't have to come with a premium price tag. We sell direct to dental professionals without the unnecessary costs other endodontic companies charge.
