

Gold Standard Instruments LLC is a research and development company headed by Neill H Luebke, DDS, MS who is a Diplomate of the American Board of Endodontics with over thirty years of endodontic practice. In addition, he has conducted and published research on the performance properties of dental instruments and holds two patents for endodontic instruments.

He has patented the latest innovation in flexible endodontic instruments in which the files have properties that make them superflexible and return to their original shape after sterilization. He also holds a patent on a proprietary treatment of nickel-titanium (NiTi) files to yield these unique file properties.

Dr. Luebke is recognized internationally for his knowledge of endodontic materials. He is currently convener of International Organization for Standardization (ISO) subcommittee on endodontic instruments and convener of (ISO) subcommittee on endodontic materials.
