HyFlex[®] CM[™]

controlled memory niti files

Changing the DNA of NiTi

300% more resistance to separation

HyFlex[®] CM[™] NiTi files with Controlled Memory are up to 300% more resistant to cyclical fatigue compared to other NiTi files* which substantially helps reducing the incidence of file separation.

* Source: In-house tests, at 300 rpm simulated 30 degree root canal

No rebound + Extreme flexibility = Superior canal tracking

HyFlex[®] Controlled Memory NiTi files have been manufactured utilizing a unique process that controls the material's memory, making the files extremely flexible but without the shape memory of other NiTi files. This gives the file the ability to follow the anatomy of the canal very closely, reducing the risk of ledging, transportation or perforation.

Regains shape after sterilization = Multi-use

The shape and strength of files with straightened spirals can be restored during autoclaving and reused. Files not returning to original shape should be discarded.

HyFlex® CM™ files can be used with crown-down, step-back or our recommended single length technique.

Testimonials

"I find them easy to use especially in limited access areas because you can bend them. With their greater flexibility, the files are not as stressed when working in the canals. It is also nice that you do get some advanced warning that you are over stressing the files when you see it unwind some. I have not had any of these files separate and I will continue to use them." **Dr. Alan Swett , Johnston, IA**

"The transition from Tulsa greater taper files to HyFlex® CM™ was seamless and easy."

Dr. Timothy Kneller, Aurora, CO

"Most flexible NiTi I've ever seen. Now that I'm getting used to them, I like them and could see adopting these as our primary instruments." **Dr. Gary Henkel, Philadelphia, PA**

"Since you introduced the HyFlex® file to me, I can honestly say that I am truly confident in attacking 'ANY' curved canal I see without any fear of separation. I find that through the flexibility and superior tracking of the canal, the whole Root Canal procedure speeds up; thus allowing me to schedule more patients. I also am equally impressed with how beautifully the spectra points fit to the 'Mark' on the first time, and thus, also saves me crucial time." **Dr. Joseph Braud, New Iberia, LA**
