Re: Mylan Pharmaceuticals Inc. v. Yeda Research & Development Co. Ltd. Case Nos. IPR2105-00643, IPR2015-00644 and IPR2015-00830.

Dear Brandon,

I write in further response to your letter of January 12, 2016 regarding Patent Owner's Declaration of Henry G. Grabowski (Ex. 2133).

As we stated to you during our January 15 and 18 teleconferences, Patent Owner intends to rely on the materials cited in Dr. Grabowski's declaration and identified in Dr. Grabowski's reliance materials (Ex. 2106), and intends to move the Board for authorization to file each of these documents as exhibits in the above-referenced cases. All but four of these documents are publicly available, with sources clearly indicated in Dr. Grabowski's declaration, and, therefore, Petitioners could have obtained these materials from public sources weeks ago. Additionally, all of these documents were produced more than seven weeks ago to Petitioners as part of the district court litigation involving these patents (In re. Copaxone 40 MG Consolidated Cases, C.A. No. 1:14-cv-01171-GMS), as set forth below:

Moreover, Patent Owner authorizes Petitioners to use all of the above-referenced documents in Case Nos. IPR2105-00643, IPR2015-00644 and IPR2015-00830, including to cross-examine Dr. Grabowski at his deposition on Thursday, January 21. As noted above, Petitioners have had all of the Grabowski reliance materials in their possession and have had ample opportunity to review and consider them in advance of Dr. Grabowski's deposition. In addition, Dr. Grabowski's positions and arguments relating to these documents are set forth in detail in his declaration which is an exhibit to this proceeding (Ex. 2133). Finally, Petitioners cannot claim any prejudice from the timing of Patent Owner's motion because any delay in resolving this issue was caused by Petitioners, who failed to notify Patent Owner of this dispute until a week ago, despite the fact that they raised a number of other objections to evidence shortly after it was filed and served.

Sincerely,

Nicholas K. Mitrocostas
