Indian Reprint ISBN : 81-8147-917-3

This edition is for sale in Bangladesh, Bhutan, India, Maldives, Nepal, Pakistan, Sri Lanka and designated countries in South-East Asia through Elsevier (Singapore) Pte. Ltd. Sale and purchase of this book outside of these countries is unauthorised by the publisher

Notice

Medical knowledge is constantly changing. Standard safety precautions must be followed, but as new research and clinical experience broaden our knowledge, changes in treatment and drug therapy may become necessary or appropriate. Readers are advised to check the most current product information provided by the manufacturer of each drug to be administered to verify the recommended dose, the method and duration of administration, and contraindications. It is the responsibility of the practitioner, relying on experience and knowledge of the patient, to determine dosages and the best treatment for each individual patient. Neither the Publisher nor the authors assume any liability for any injury and/or damage to persons or property arising from this publication.

Contents

SECTION

1

GENERAL PRINCIPLES

1. What is pharmacology? 2
Pharmacology in the 20th century 3
2. How drugs act: general principles 7
The binding of drug molecules to cells 7
Desensitisation and tachyphylaxis 19
3. How drugs act: molecular aspects 22
Targets for drug action 22
Receptor proteins 26
Ion channels as drug targets 45
Control of receptor expression 47
Receptors and disease 48
4. Cellular mechanisms: excitation, contraction and secretion 51
Regulation of intracellular calcium levels 51
Excitation 55
Muscle contraction 62
Release of chemical mediators 64
Epithelial ion transport 66
5. Cellular mechanisms: cell proliferation and apoptosis 69
Cell proliferation 69
Angiogenesis 74
Apoptosis and cell removal 74
Pathophysiological implications 77
Therapeutic implications 77
6. Method and measurement in pharmacology 80
Bioassay 80
Animal models of disease 84
Clinical trials 86
Balancing benefit and risk 89
7. Absorption and distribution of drugs 91
Translocation of drug molecules 91
Drug disposition 97
Drug absorption 98
Special drug delivery systems 104
8. Drug elimination and pharmacokinetics 106
Drug metabolism 106
Renal excretion of drugs and drug metabolites 111
Biliary excretion and enterohepatic circulation 113
Pharmacokinetics 114

CHEMICAL MEDIATORS

9. **Chemical mediators and the autonomic nervous system** 122
 - Historical aspects 122
 - The peripheral nervous system 123
 - Some general principles of chemical transmission 126
 - Basic steps in neurochemical transmission: sites of drug action 133
10. **Cholinergic transmission** 136
 - Muscarinic and nicotinic actions of acetylcholine 136
 - Acetylcholine receptors 137
 - Physiology of cholinergic transmission 139
 - Effects of drugs on cholinergic transmission 143
11. **Noradrenergic transmission** 161
 - Classification of adrenoceptors 161
 - Physiology of noradrenergic transmission 164
 - Drugs acting on adrenoceptors 168
 - Drugs that affect noradrenergic neurons 176
12. **Other peripheral mediators: 5-hydroxytryptamine and purines** 184
 - 5-hydroxytryptamine 184
 - Purines 192
13. **Peptides and proteins as mediators** 198
 - General principles of peptide pharmacology 198
 - Biosynthesis and regulation of peptides 202
 - Peptide antagonists 204
 - Proteins and peptides as drugs 205
 - Concluding remarks 206
14. **Nitric oxide** 208
 - Biosynthesis of nitric oxide and its control 209
 - Degradation and carriage of nitric oxide 210
 - Effects of nitric oxide 212
 - Therapeutic approaches 213
 - Clinical conditions in which nitric oxide may play a part 214
15. **Local hormones, inflammation and immune reactions** 217
 - The components of the acute inflammatory reaction 217
 - The outcome of the inflammatory response 228
 - Mediators of inflammation and immune reactions 229
 - Current therapies based on manipulation of the immune response 241
 - Potential new therapies 241
16. **Anti-inflammatory and immunosuppressant drugs** 244
 - Non-steroidal anti-inflammatory drugs 244
 - Antagonists of histamine 252
 - Drugs used in gout 254
 - Antirheumatoid drugs 255
 - Immunosuppressant drugs 257
 - Possible future developments 260

DRUGS AFFECTING MAJOR ORGAN SYSTEMS

- 17. The heart 264**
 Physiology of cardiac function 264
 Drugs that affect cardiac function 272
- 18. The vascular system 285**
 Vascular structure and function 285
 Control of vascular smooth muscle tone 286
 Vasoactive drugs 292
 Clinical uses of vasoactive drugs 298
- 19. Atherosclerosis and lipoprotein metabolism 306**
 Atherogenesis 306
 Lipoprotein transport in the blood 307
 Lipid-lowering drugs 309
- 20. Haemostasis and thrombosis 314**
 Blood coagulation 315
 Drugs that act on the coagulation cascade 317
 Platelet adhesion and activation 323
 Fibrinolysis (thrombolysis) 327
- 21. The haemopoietic system 330**
 The haemopoietic system 330
 Haematonic agents 331
 Haemopoietic growth factors 336
- 22. The respiratory system 340**
 The regulation of respiration 340
 Disorders of respiration and the drugs used in treatment 341
- 23. The kidney 352**
 Outline of renal function 352
 The structure and function of the nephron 352
 Drugs acting on the kidney 362
 Drugs which alter the pH of the urine 365
 Drugs which alter the excretion of organic molecules 365
- 24. The gastrointestinal tract 367**
 The innervation and the hormones of the gastrointestinal tract 367
 Gastric secretion 368
 Vomiting 372
 The motility of the gastrointestinal tract 375
 Drugs for chronic inflammatory bowel disease 377
 Drugs affecting the biliary system 378
- 25. The endocrine pancreas and the control of blood glucose 380**
 Pancreatic islet hormones 380
 Control of blood glucose 385
 Diabetes mellitus and the drugs used in treatment 385
- 26. Obesity 394**
 The homeostatic mechanisms controlling energy balance 394
 Obesity as a health problem and possible treatments 397
- 27. The pituitary and adrenal cortex 404**
 The pituitary and drugs used in therapy 404
 The adrenal cortex and drugs used in therapy 411
- 28. The thyroid 421**
 Synthesis, storage and secretion of thyroid hormones 421
 Regulation of thyroid function 422
 Actions of the thyroid hormones 423
 Transport and metabolism 424
 Abnormalities of thyroid function 424
 Drugs used in diseases of the thyroid 425
- 29. The reproductive system 429**
 Endocrine control of reproduction and modulating drugs 429
 Drugs used for contraception 439
 The uterus 441
 Erectile dysfunction 443
- 30. Bone metabolism 446**
 Bone structure and composition 446
 Bone remodelling 446
 Disorders of bone and the drugs used in treatment 451

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
