HP initiated the lawsuit by suing EMC for alleged infringement of seven patents. EMC counterclaimed against HP with six of its own patents. Following claim construction proceedings and motion practice, the case settled with HP

agreeing to pay EMC more than \$325 million, one of the largest patent settlements on record.

- **In-Three, Inc.** In *IMAX Corporation v. In-Three, Inc.* (C.D. Cal.), Mr. Weinstein defended In-Three in a patent infringement suit involving software for producing three dimensional motion pictures. In-Three defeated a motion for preliminary injunction filed by IMAX that threatened to shut down In-Three's operations.
- **eBay Inc.** In *Tumbleweed Communications Corp. v. eBay, Inc. et al.* (N.D. Cal.), Mr. Weinstein defended eBay and its subsidiary PayPal against allegations of infringement of three software patents related to electronic financial transactions. The case settled on favorable terms during the pendency of a summary judgment motion filed by eBay and PayPal that sought to invalidate Tumbleweed's patents in light of the prior art.

Trade Secrets

- **Cirrus Logic, Inc.** In *Silvaco Data Systems v. Cirrus Logic, Inc.* (Santa Clara Sup. - **Alstom ESCA Corporation.** In *ABB Power T&D Company v. Alstom ESCA Corporation et al.* (N.D. Cal.), Mr. Weinstein was a member of a team representing Alstom in a six week federal jury trial involving claims for trade secret misappropriation, copyright infringement, breach of contract and a variety of business torts, which resulted in a unanimous verdict exonerating the client from liability. The technologies in the case related to hardware and software systems for the electric power industry.
- **Advanced Modular Sputtering (AMS).** In *Sputtered Films, Inc. v. Advanced Modular Sputtering, Inc. et al.* (Santa Barbara Sup. Ct.), Mr. Weinstein represented AMS in a trade secret case involving PVD sputtering technologies. The case generated an oft-cited decision clarifying California's statute requiring plaintiffs to identify their trade secrets, *Advanced Modular Sputtering v. Superior Court*, 132 Cal. App. 4th 826 (2005).
- **Minerva Networks, Inc.** In *Myrio, Inc. v. Minerva Networks, Inc.* (N.D. Cal.), Mark defended Minerva against trade secret, unfair competition and false advertising claims involving technologies for delivering television and multimedia services over broadband networks. The case settled favorably after the court ruled that Myrio had failed to adequately identify its trade secrets.

Technology/IP Licensing

- **DVD Copy Control Association (DVD CCA).** In *RealNetworks, Inc., et al. v. DVD Copy Control Association, Inc. et al.* (N.D. Cal.) and *DVD Copy Control Association, Inc. v. Kaleidescape, Inc.*

(Santa Clara Sup. Ct.), Mark represented the DVD CCA in two separate actions alleging breach of the technology license that covers use of the Content Scramble System (CSS) technology that is used to prevent copying of motion picture DVDs. DVD CCA obtained an injunction from the trial courts in both actions prohibiting sales of products that did not comply with the license. The *Kaleidescape* action is currently on appeal.

- **Marshal Software.** Mark represented Marshal, a leading producer of Internet security and anti-spam software, in three trademark and unfair competition lawsuits against competing companies. All three cases resulted in the defendants agreeing to rebrand their products to avoid any use of Marshal's trademarks.
