Service and support information.

**Appendix C 321**

eWorld setup and registration.

**Appendix D 327**

Compatibility information.

**Index 331**

**Communications regulation in**

**FCC statement**

This equipment has been tested and found to comply with digital device in accordance with the specifications in Part instructions if interference to radio or television reception

**Radio and television interference**

The equipment described in this manual generates, uses, a frequency energy. If it is not installed and used properly—with Apple's instructions—it may cause interference with reception.

This equipment has been tested and found to comply with digital device in accordance with the specifications in Part specifications are designed to provide reasonable protection in a residential installation. However, there is no guarantee occur in a particular installation.

You can determine whether your computer system is causing off. If the interference stops, it was probably caused by the peripheral devices.

If your computer system does cause interference to radio correct the interference by using one or more of the following

- Turn the television or radio antenna until the interference
- Move the computer to one side or the other of the television or
- Move the computer farther away from the television or
- Plug the computer into an outlet that is on a different radio. (That is, make certain the computer and the television circuits controlled by different circuit breakers or fuses

If necessary, consult an Apple-authorized service provider and support information that came with your Apple product experienced radio/television technician for additional suggestions following booklet helpful: *Interference Handbook* (stock

This booklet, prepared by the Federal Communications Commission, the U.S. Government Printing Office, Washington, DC 20404

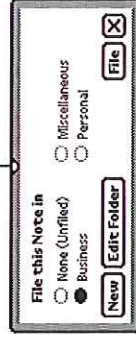

**Important** Changes or modifications to this product may void the FCC certification and negate the product.

### Slips

When you go to different areas of your MessagePad or when you tap buttons, a slip may appear. Slips are boxes with gray borders where you enter specific information. For example, when you tap the Folder button **F** to file an item in the Notepad, a slip appears for you to "fill out."

If a slip is small, you can move it around on the screen. To move a slip, tap and hold the pen on the white dot at the top of the slip, called the picture hanger, then drag the slip where you want.

*Tap and hold the pen on the picture hanger to move the slip around on the screen*

### Sound effects

If you have sound effects selected in Prefs, you hear various sound effects when you perform certain actions, such as tapping a button. These sounds are random and the tones have no particular significance.

### Part 2: Entering information

In this part, you'll learn about the different information and the different areas in your MessagePad where you can enter information.

#### Ways to enter information

Before you enter information, you must tap the screen where you want the information. A caret **<** appears and shows you where the information will be placed.

.....  
A

There are several ways to enter information on the MessagePad.

- One way is to write with the pen that came with the MessagePad.
- *Hello! How are you?*.....  
.....  
A second way is to use an on-screen keyboard. Tap the Keyboard button **K** at the bottom of the screen. A standard typewriter keyboard appears, and you can enter information on the keyboard.
