(57) ABSTRACT

A portable communication device. The portable communication device comprises an editing module, a converting module, a message processing module, and a communication module. The editing module processes a multimedia message, wherein the multimedia message comprises text and image data. The converting module converts the multimedia message into a HyperText Markup Language (HTML) document, wherein the document presents the text and image data according to a cascading style sheet (CSS) property. The message processing module generates an e-mail message having a HTML document attachment.
