## LABORATORY RECORDKEEPING PROCEDURES

### General Instructions

Laboratory Notebooks are the means for keeping a permanent record of the details of an individual's day-to-day work in the research and development areas. They provide 1) a basic reference which the individual and others can refer to at a later date; 2) legal evidence with respect to the materials recorded, such as conception of an invention and the date thereof or date of reduction to practice and test results; and 3) in some instances, compliance with the provisions of many contractual arrangements.

### Instructions for Recording Data in the Laboratory Notebook

1. All entries should be made in a legible and orderly manner using permanent ink, preferably black. Make entries clear and complete, that someone else could repeat the experiment.
2. Avoid erasures. If an error is made, cross it out and make the correction immediately thereafter. Cancellations or insertions should be initialed, dated and explained (in the margin, if possible, by an appropriate notation).
3. Make sure control page is filled out prior to usage.
4. Complete the table of contents as you make entries in the notebook.
5. State the object and results of each experiment clearly and concisely. Give a complete, factual and self-explanatory account of the progress of the work and the procedure followed (reference to earlier work done by yourself or another may be accomplished by noting a previous page of the same notebook or the page and number of an earlier notebook). All operating details and conditions must be recorded, indicating yields, conversion, etc., and identifying products. Describe and give quantities of all materials used. Explain all code numbers and abbreviations.
6. An entry dealing with a conception (invention, idea) must describe the thing conceived (Example: whether it is a chemical compound, a combination of compounds, a combination of a compound and a solvent, etc.) as well as the utility for the thing conceived, how it is to be used and the method(s) by which it is to be prepared, including equivalent materials which could be used. Statements with regard to utility should be stated positively. Work toward practical implementation of an invention should start as soon as possible after disclosure in a notebook.
7. Negative or deprecatory entries should be avoided. (Example: A reaction gives a 2% yield was expected. Do not state "Process does not work.") Phraseology which expresses an opinion rather than a positive statement and gratuitous comments should be avoided. This is not an instruction to omit the conclusion in an experiment which had less than the expected results. Be factual.
8. Each day's work should, whenever possible, be started on a separate page with lines drawn angularly across the unused portion of the previous page (This gives legal evidence that additions were not made at a later date.) It is permissible, as stated above, to make reference to an earlier page by reciting "Continued from page . . .". It is extremely important that each page show the date of entry.
9. Each page must be signed and dated by the individual who makes the entry and does the work. In addition, each page must be witnessed (signed and dated), using the notation "Read and understood", preferably on the same day, but at least within one week. The witness should not be connected with the conception, should not have taken part in the experimental work performed by another, but should understand the technical field of the entry. Record Lab notebook number and project on each page.
10. Where a conception is made by two or more individuals it need only be entered in the notebook of one, but must be signed and dated by all the conceivers. Ideally, all conceivers should sign on the same day.
11. For microfilming purposes, graphs, charts, analytical data, etc. must be attached to the notebook pages with a permanent adhesive and should, when unfolded, be kept within the confines of the opened notebook. **NO ENTRIES SHOULD BE MADE ON THE PAGE BENEATH ATTACHED SHEETS AND NOTHING MUST BE OBSCURED.** Leave the heading at the top and the space provided for the witnessing signature at the bottom of each page exposed. Inserts should be signed and dated by the person making the entry and witnessed by another to provide the best legal evidence. If materials such as spectra, graphs, etc. are not kept in the notebook, they must be signed, dated and identified in such a manner as to provide a reference back to the pertinent page(s) of the Laboratory Notebook itself.
12. Report the loss or theft of a research notebook.
13. Following the use of all the pages of each Laboratory Notebook, it must be sent to the Library for record maintenance. Make sure table of contents pages are complete. After it has been recorded it will be returned to the individual. An individual may retain in his possession the Laboratory Notebook immediately preceding the one in which entries are currently being made. Normally, all other Laboratory Notebooks will be kept on the file in the Library or in vault storage. They may then be checked out for reasonable lengths of time by authorized individuals.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
