Honda Has the Magic Seat; University Loft Has the Wave Chair

December 29, 2014 Bob Ergonomics, Seating

waveChair_2698 72

In a **recent post**, I noted how the Honda Fit's Magic Seat® is an automotive marvel of space utilization. That reminded me of the practical, ingenious and innovative space-saving college furniture from University Loft. But my impression that Honda and University Loft have something in common didn't end there. You see, I think the Magic Seat in the Honda Fit is also a lot like the Wave Chair from University Loft Company:

As I explained in my other post, with its Magic Seat, the Honda Fit's seating can morph between normal passenger car mode and four other alternatives: Utility Mode for extra cargo space, Tall Mode for rear passenger area hauling, Long Mode for extended lengthwise hauling, and Refresh Mode for easy chair comfort.

The University Loft Wave Chair can work some magic of its own. You see, the Wave Chair from University Loft is the perfect dorm room seating solution. It can function as an ergonomic mesh-backed desk chair, of course, but that's just the beginning. The Wave Chair can become a gaming rocker and a chair with separate notebook computer desk. Serious magic, eh?

So, if you are looking for a flexible seating solution in a new car, you might check out the Honda Fit. But if you are looking for a flexible and innovative seating solution for the college dorm room, be sure to check out the Wave Chair from University Loft!

Learn more about University Loft's Wave Chair and other seating solutions for college by **clicking here** or **contacting us** today at **800-423-LOFT (5638)**.
