1	what do you mean, you know So the answer is 01:23	1	Q. So if the words exist in the patent, 01:27
2	yes, I have been involved in working with my 01:23	2	do you recognize that the '970 patent teaches a 01:27
3	students in research on the design and control 01:23	3	low-speed mode of operation? 01:27
4	of hybrid electric vehicles, and we've looked 01:23	4	A. It has a mode of operation which it 01:27
5	at some unique control strategies for hybrid 01:24	5	utilizes when the vehicle is operating where 01:27
6	electric vehicles. 01:24	6	the output torque required to propel the 01:27
7	Q. Great. Thank you. Let's mark a few 01:24	7	vehicle is relatively small, which is typical 01:27
8	more exhibits. 01:24	8	of around town or in traffic or what this 01:27
9	(Stein Exhibit Number 8 marked for 01:24	9	patent sometimes calls the low-speed mode. 01:27
10	identification.) 01:24	10	It's just a label or a proxy for the operation 01:28
11	(Stein Exhibit Number 9 marked for 01:24	11	of the vehicle when the torque output required 01:28
12	identification.) 01:24	12	to propel the vehicle is low. 01:28
13	BY MR. GUARNIERI: 01:25	13	Q. What do you mean by label or proxy? 01:28
14	Q. So, Dr. Stein, the court reporter 01:25	14	A. So the '970 describes the hybrid 01:28
15	has just placed in front of you what has been 01:25	15	vehicle as operating in different modes, and it 01:28
16	marked first as Exhibit 8, which is Ford 01:25	16	describes these modes in terms of the output 01:28
17	Exhibit 1101, U.S. Patent No. 8,214,097. 01:25	17	torque required to propel the vehicle, which 01:28
18	Do you recognize this exhibit? 01:25	18	I've outlined in my declaration. And the 01:28
19	A. Yes, I do. 01:25	19	So, for example, it has a mode called highway 01:29
20	Q. And do you recognize this as the 01:25	20	cruising mode. That's a label or proxy for 01:29
21	'097 patent that's the subject of this IPR? 01:25	21	when the torque values are at a certain amount 01:29
22	A. Yes. 01:25	22	where the engine is in its efficient range of 01:29
23	Q. And then if you look at Exhibit 9 01:25	23	operation and is used alone to propel the 01:29
24	that's marked as Ford Exhibit 1104, it's U.S. 01:25	24	vehicle. So 01:29
25	Patent No. 5,343,970, and do you recognize this 01:25	25	Q. Dr. Stein, in answering my question, 01:29
	Page 15		Page 17
1	exhibit? 01:25	1	you've used the exact same phrase. What do you 01:29
2	A. Yes, I do. 01:25	2	mean by label or proxy? 01:29
3	Q. And is this the Severinsky '970 01:25	3	A. It's a set of words or name that is 01:29
4	patent that you referred to? 01:25	4	meant to be a shorthand notation for referring 01:29
5	A. In my declaration, yes. 01:25	5	the reader to a specific mode of operation. So 01:30
6	Q. And while we're talking today, if I 01:25	6	the, quote/unquote, low-speed mode refers to a 01:30
7	refer to Severinsky, you'll understand that I'm 01:25	7	mode which the torque is relatively smaller and 01:30
8	referring to this patent or converse, the '970 01:26	8	where the motor alone is used to propel the 01:30
9	patent, either one? How about this? Let me 01:26	9	vehicle without the engine, so that's kind of a 01:30
10	strike that and ask: What would you prefer to 01:26	10	long set of words to use. 01:30
11	refer to this patent as? 01:26	11	The patent uses this label or proxy, 01:30
12	A. The '970. 01:26	12	if you will. Rather than using it with a long 01:30
13	Q. All right. We'll call this the '970 01:26	13	set of words, it uses a shorthand notation and 01:30
14	patent. Sometimes it's a little confusing with 01:26	14	calls this a low-speed mode because with these 01:30
15	the '097 and '970. I just want to make sure 01:26	15	low torques, the vehicle is generally traveling 01:30
16	we've got our numbers straight. 01:26	16	in something we might call, you know, lower 01:30
17 18	A. Sure. 01:26 Q. So, Dr. Stein, why don't you put 01:26	17 18	speeds. 01:30 Q. So looking at the '970 patent, can 01:30
19	Q. So, Dr. Stein, why don't you put 01:26 Exhibit 9, the '970 patent, in front of you. 01:26	19	Q. So looking at the '970 patent, can 01:30 you identify for me where '970 discloses 01:30
20	And are you familiar with the '970 patent's 01:26	20	operating in low-speed mode based on the output 01:31
21	low-speed mode? 01:26	21	torque required to propel the vehicle? 01:31
22	A. So I've reviewed the '970 patent, 01:26	22	A. Well So I refer you to my 01:31
23	and I understand that the words low speed, 01:26	23	declaration, Paragraph 194, which is under the 01:33
24	perhaps low-speed mode perhaps exist in this 01:27	24	heading 1.7. It's claim 1.7: Operating the at 01:33
25	patent. Is that what you're asking me? 01:27	25	least one electric motor to provide torque to 01:33
