# DECLARATION OF STUART LIPOFF IN SUPPORT OF PETITION FOR INTER PARTES REVIEW OF U.S. PATENT NO. 5,563,883

Mail Stop PATENT BOARD
Patent Trial and Appeal Board
United States Patent and Trademark Office
PO Box 1450
Alexandria, Virginia 22313–1450
Submitted Electronically via the Patent Review Processing System

# **TABLE OF CONTENTS**

		Exhibits Referenced in This Declaration	V
I.	INTI	RODUCTION AND QUALIFICATIONS	1
	<b>A.</b>	Educational Background	2
	В.	Career History and Relevant Industry Participation	2
II.	SCO	PE OF ASSIGNMENT, COMPENSATION	5
III.	LEG	AL PRINCIPLES USED IN MY ANALYSIS	6
	<b>A.</b>	Person of Ordinary Skill in the Art	6
	В.	Prior Art	8
	C.	Obviousness	8
IV.	SUM	MARY OF MY OPINIONS	10
V.	LEV	EL OF ORDINARY SKILL IN THE ART	11
VI.	CLA	IM CONSTRUCTION	11
VII.	THE	'883 PATENT	12
	<b>A.</b>	Background of the '883 Patent	12
	B.	Overview of the '883 Patent – The Alleged Invention	14
	C.	Overview of Claims 1, 3, and 4 of the '883 Patent	19
VIII.	OVE	RVIEW OF TRUNKED RADIO SYSTEMS	21
	<b>A.</b>	Trunked Radio Systems Generally	21
	В.	Signalling Data vs. Bearer Traffic in Multiple Access Systems	23
	C.	Overview of MPT	28
IX.	INV	ALIDITY OVER MPT	38
	A.	Claim 1 Would Have been Obvious Over MPT 1343 In View of MPT 1347 and MPT 1327	38

Claim 3 Would Have Been Obvious Over the Combined Teachings of the MPT 1343, MPT 1347, and MPT 1327, and Further In View of the Zudnek Patent and the Dufresne				
7.	It would have Been Obvious to Modify MPT 1343 to Provide for the Additional Features and Capabilities Contained in MPT 1327 and MPT 1327	.86		
6.	Limitation [E]: "reassigning by said central controller said remote terminal to a different and suitable signalling data channel for communication henceforward."	82		
5.	Limitation [D]: "determining whether a different and suitable signalling data channel is available other than said predetermined channel."	74		
4.	Limitation [C]: "determining whether one of said plurality of remote terminals needs to be reassigned to a different signalling data channel other than said predetermined signalling data channel"	69		
3.	Limitation [B]: "monitoring the status of a plurality of signalling data channels in use between said central controller and said plurality of remote terminals for the usability of said signalling data channels"	64		
2.	Limitation [A]: "establishing communications between said central controller and said plurality of remote terminals via a plurality of signalling data channels, each of said remote terminals being initially assigned to a pair of predetermined signalling data channels"	51		
1.	Preamble: "In a multiple access communication system comprising a central controller, a shared transmission means for signalling data and user information, and a plurality of remote terminals, a method of allocating signalling data channels between said central controller and said plurality of remote terminals from a plurality of communication channels and of assigning remote terminals"	38		

В.

	1.	according to claim 1, said step of monitoring the status of a plurality of the signaling data channels in use between said central controller and said plurality of remote terminals for usability of said signaling data channels"90		
	2.	Limitation [A]: "calculating the aggregate traffic load requirements of said plurality of signalling data channels in use"		
	3.	Limitation [B]: "monitoring the past collision count of said plurality of signalling data channels in use"95		
	4.	Limitation [C]: "Monitoring the transmission error count of said plurality of signalling data channels in use"101		
	5.	Limitation [D]: "sensing the status of said plurality of signalling data channels in use for failure"		
	6.	It would have Been Obvious to Modify MPT to Provide for the "Monitoring" of the Claimed Parameters and "Sensing" For Failures Because Such an Arrangement Would Improve the "Load Sharing" and Robustness of the MPT System.  104		
C.	Claim 4 Would Have Been Obvious Over MPT 1343 in view of MPT 1327 and MPT 1347			
	1.	Preamble: "In a multiple access communication system according to claim 1, said step of determining whether one of said plurality of remote terminals needs to be reassigned to a different signalling data channel other than said predetermined signalling data channel"		
	2.	Limitation [A]: "sensing the status of said predetermined signalling data channel which said terminal has been assigned to for overloading to determine whether said terminal needs to be reassigned to a different signalling data channel because of overloaing"		
	3.	Limitation [B]: "sensing the status of said predetermined signalling data channel which said terminal has been		

X	CONCLUSION	113	
	channel"	110	
	needs to be reassigned to a different signalling data		
	assigned to for failure to determine whether said terminal	inal	

# DOCKET

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

# **Real-Time Litigation Alerts**

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## **Advanced Docket Research**

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

# **Analytics At Your Fingertips**

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

#### API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

#### **LAW FIRMS**

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

#### **FINANCIAL INSTITUTIONS**

Litigation and bankruptcy checks for companies and debtors.

### **E-DISCOVERY AND LEGAL VENDORS**

Sync your system to PACER to automate legal marketing.
