GROSSBARD

MALIGNANT LYMPHOMAS

ATLAS OF CLINICAL ONCOLOGY

Over the past decade, the incidence of non-Hodgkin's lymphoma has been rising. At the same time, the benefits of extensive research in tumor immunology and molecular biology have radically altered our understanding of lymphoma biology. New therapeutic agents have advanced rapidly from the laboratory to the bedside.

In Malignant Lymphomas, Dr. Grossbard has assembled an expert group of 48 colleagues to address the disease group by type—indolent B-cell lymphoma, diffuse large cell lymphomas, Burkitt's/high-grade non-Hodgkin's lymphoma—as well as the key therapies of chemotherapy, monoclonal antibody, radiation, vaccine, hematopoietic stem cell transplants, and more.

This volume on lymphoma is designed to summarize current knowledge on the pathology, epidemiology, molecular biology, presentation, and management of patients with both non-Hodgkin's lymphoma and Hodgkin's disease. It is an essential reference not only for the specialist in lymphoma but also for the general oncologist and all those who manage these diseases on a daily basis.

- Covers screening and diagnosis
- Presents contemporary data designed to stimulate further discussion and research
- Includes contributions representing medical, surgical, and radiation oncology and related disciplines
- More than 200 color clinical photographs, photomicrographs, karyotypes, radiographs, tables, and algorithms illustrate the manifestation of the disease
- Images from the CD-ROM can be downloaded for lectures and presentations

CD-ROM Inside.

Malignant Lymphomas comes complete with its own CD-ROM. The disk includes the complete text and illustrations contained within the book in fully searchable PDF files.

BC Decker Inc is committed to providing medical and health care professionals with high quality electronic publications that complement traditional information and learning methods.

**DOCKET
ALARM**

Find authenticated court documents without watermarks at docketalarm.com.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
