Important Safety Information

Adempas can cause serious birth defects if taken during pregnancy. Females must not be pregnant when they start taking Adempas (riociguat) tablets or become pregnant during treatment with Adempas. Females who are able to get pregnant must have a negative pregnancy test before beginning treatment with Adempas, each month during treatment, and 1 month after you stop treatment with Adempas. Females can only receive Adempas through a restricted program called the Adempas REMS Program...**Continue reading below**.

Support Every Step Of The Way

As you start taking Adempas, you can rely on the resources and support of the Aim Patient Support Program, brought to you by Bayer.

The Aim Patient Support Program:

Bayer is committed to providing resources that can help adults with **pulmonary**

NPS EX. 2139
CFAD v. NPS
IPR2015-01093

1) or chronic thromboembolic pulmonary hypertension (CTEPH) (WHO Group 4) that is inoperable or recurrent/persistent after surgery. The Aim Patient Support Program is comprised of the following 3 components to help with the many different aspects of your Adempas treatment. Please read more about each piece below.

The Adempas clinical studies included mostly patients with WHO functional class II-III symptoms. It is not known if Adempas is safe and effective in children.

myAim Education and Encouragement

With this Aim resource, you will receive helpful resources and personalized communications to provide you with information to support you during the very beginning, as well as throughout your Adempas treatment. This information may include:

- Educational support through some of the key stages of Adempas treatment and what to expect along the way
- Personalized treatment resources provided how and when you want them
- Tips on what to talk to your doctor about
- Information about other online resources and support

Important Safety Information

Adempas can cause serious birth defects if taken during pregnancy.

- **Females must not be pregnant when they start taking Adempas (riociguat) tablets or become pregnant during treatment with Adempas.**

- Females who are able to get pregnant must have a negative pregnancy test before beginning treatment with Adempas, each month during treatment, and 1 month after you stop treatment with Adempas. Talk to your doctor about your menstrual cycle. Your doctor will decide when to do the test.

- Have entered puberty, even if they have not started their period, have a uterus, and have not gone through menopause (have not had a period for at least 12 months for natural reasons, or have had their ovaries removed).

- Females who <u>are not able</u> to get pregnant are females who:

  - Have not yet entered puberty, do not have a uterus, or have gone through menopause.

Females who are able to get pregnant must use two acceptable forms of birth control, during Adempas treatment and for one month after stopping Adempas.

- If you have had a tubal sterilization, have a progesterone implant, or have an IUD (intrauterine device), these methods can be used alone and no other form of birth control is needed.

- Talk with your doctor or gynecologist (a doctor who specializes in female reproduction) to find out how to prevent pregnancy during treatment with Adempas.

  - **Do not have unprotected sex. Talk to your doctor or pharmacist right away if you have unprotected sex or if you think your birth control has failed. Your doctor may tell you to use emergency birth control.**

  - **Tell your doctor right away if you miss a menstrual period or think you may be pregnant for any reason.**

If you are the parent or caregiver of a female child who started taking Adempas

DOCKET ALARM

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
