### UNITED STATES PATENT AND TRADEMARK OFFICE

### BEFORE THE PATENT TRIAL AND APPEAL BOARD

Microsoft Corporation and Microsoft Mobile Inc.,
Petitioner

٧.

Global Touch Solutions, LLC,
Patent Owner

IPR2015 - 01151 Patent 8,288,952

# **EXHIBIT 1014**

DECLARATION OF MARK N. HORENSTEIN, PH.D., P.E.

# TABLE OF CONTENTS

I.	Introduction & Qualifications			
II.	Materials Reviewed			
III.	The Law			
	A.	Obviousness Analysis	9	
	B.	Level of Ordinary Skill in the Art	10	
	C.	Objective Considerations	11	
	D.	Claim Construction	11	
IV.	Level of Ordinary Skill in the Art			
V.	Claim Construction			
	A.	"the touch sensor functions" (claim 1, from which claims 2-4, 14 17, 19, and 22-24 ultimately depend) and "the touch sensing functions" (claim 26, from which claims 27 and 38-40 ultimately depend)	/	
VI.	Obviousness – Overview			
VII.	Obviousness - Description of Prior-Art Jahagirdar Patent			
VIII.	Obviousness - Description of Prior-Art Touch Sensor References20			
	A.	Schultz	20	
	B.	Touch Sensors in the Prior Art Generally	22	
IX.	Summary of Obviousness Opinions		24	
Χ.	Independent Claim 1 would have been obvious over Jahagirdar in combination with Schultz			
	A.	Jahagirdar taught the limitations of claim 1's preamble, "A meth implementing a user interface of a product, the product comprisi

		ection for a power source and at least one said method including the step of "	
	obvious "using an electr including a microchip an	: Jahagirdar combined with Schultz renders onic module comprising an electronic circuit ad a touch sensor said microchip sensor functions"	
	indication [to provid state or condition of the	: Jahagirdar taught "activating a visible e] information on at least one [of]: a product, location of the user interface, a cation."	
XI.	Dependent Claim 2 would have been obvious over Jahagirdar in combination with Schultz		
XII.	Dependent Claim 3 would have been obvious over Jahagirdar in combination with Schultz		
XIII.	Dependent Claim 4 would have been obvious over Jahagirdar in combination with Schultz		
XIV.	Dependent Claim 14 would have been obvious over Jahagirdar in combination with Schultz		
XV.	Dependent Claim 16 would have been obvious over Jahagirdar in combination with Schultz		
XVI.	Dependent Claim 17 would have been obvious over Jahagirdar in combination with Schultz		
XVII.	Dependent Claim 19 would have been obvious over Jahagirdar in combination with Schultz		
XVIII		ave been obvious over Jahagirdar in47	
XIX.	Dependent Claim 23 would have been obvious over Jahagirdar in combination with Schultz		
XX.	Dependent Claim 24 would have been obvious over Jahagirdar in combination with Schultz		

## IPR2015 – 01151 Exhibit 1014 (Horenstein Declaration) U.S. Patent No. 8,288,952

XXI.	Independent Claim 26 would have been obvious over Jahagirdar in combination with Schultz		
	A.	Jahagirdar taught the limitations of claim 26's preamble, "An electronic module for use with a product, the product comprising a power source or a connection for a power source, and at least one energy consuming load"	
	B.	Limitation [a] of Claim 26: Jahagirdar combined with Schultz renders obvious "said module comprising a microchip and a touch sensor said microchip implementing the touch sensing functions"52	
	C.	Limitation [b] of Claim 26: Jahagirdar described "activate[s] a visible indication [to provide] information on at least one [of]: a state or condition of the product, a location of the user interface, a battery power level indication"	
XXII	-	endent Claim 27 would have been obvious over Jahagirdar in bination with Schultz63	
XXII		bendent Claim 38 would have been obvious over Jahagirdar in bination with Schultz64	
XXIV		endent Claim 39 would have been obvious over Jahagirdar in bination with Schultz65	
XXV	_	endent Claim 40 would have been obvious over Jahagirdar in bination with Schultz66	
XXV		challenged Claims are also invalid even if "the touch sensor functions" "the touch sensing function" mean "functions controlled by the touch	

## I. Introduction & Qualifications

- I, Mark N. Horenstein, declare as follows:
- 1. I understand that Microsoft Corporation ("Microsoft") and Microsoft Mobile Inc. ("Microsoft Mobile") are petitioning the Patent Office for an *inter* partes review of claims 1-4, 14, 16, 17, 19, 22-24, 26, 27, and 38-40 of U.S. Patent No. 8,288,952 ("'952 patent"). I have been retained by the Petitioners, Microsoft and Microsoft Mobile, to offer technical opinions relating to the '952 patent and certain prior-art references relating to its subject matter. I understand that an *inter* partes ("between the parties") review begins with a petition for review made by third parties like Microsoft and Microsoft Mobile and responded to by the owner of the patent.
- 2. I am a Professor of Electrical Engineering in the Department of Electrical and Computer Engineering at Boston University, where I have been a faculty member since 1979. I also have held various other positions at Boston University, including the Associate Dean for Graduate Programs and Research for the College of Engineering (1999-2007), Associate Chair for Undergraduate Programs for the ECE Department (1990 1998 and 2012 present), as well as appointments at the rank of Associate Professor (1985-2000) and Assistant Professor (1979-1985).
  - 3. I have a Ph.D. in Electrical Engineering from the Massachusetts

# DOCKET

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

# **Real-Time Litigation Alerts**

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## **Advanced Docket Research**

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

# **Analytics At Your Fingertips**

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

### API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

#### **LAW FIRMS**

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

#### **FINANCIAL INSTITUTIONS**

Litigation and bankruptcy checks for companies and debtors.

### **E-DISCOVERY AND LEGAL VENDORS**

Sync your system to PACER to automate legal marketing.
