## Introduction

Today an increasing number of organizations are embracing client/server technology as a solution to a growing number of business problems.

However, the inherent complexities of running a distributed computing environment have daunted many organizations. They are simply finding it almost impossible to control and operate this environment efficiently. Subsequently, this is leading to system down-time and overrun budgets. Perhaps even more problematic is that companies are not realizing the true business problem solving potential of client/server technology.

Most management systems available today do not have a business application focus. They are only concerned with managing individual components such as a database or a network and do not take into account the true complexities of a distributed computing environment. This problem is becoming the key obstacle faced when deploying large scale client/server systems.

BMC Software is the leading supplier of management software that enables the deployment and management of enterprise-wide client/server applications. Applications that run in open systems environments, proprietary environments or across both.

### **BMC Software's Key Focus Areas**

BMC Software's products deliver solutions in two key areas: data management and application management. BMC Software's family of data management tools include solutions for cross platform, heterogeneous support of RDBMS administration and utility functions, advanced change management, data replication and movement, recovery management and performance management.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
