1. The following is an examiner's statement of reasons for allowance:
2. Applicant shows a unit dose form of an acid inhibitor and a non-steroidal anti-inflammatory drug (NSAID) formulated to provide coordinated release of said drugs. Combinations of such drugs are known. Goldman et al US 5,204,118 and Depui et al US 6,613,354 B2, considered the closest prior art of record show combinations of such drugs. The prior art does not show nor fairly suggest the particular combination wherein said NSAID is incorporated in the dosage form such that it is surrounded by a coating that upon ingestion of said unit dosage form by a patient prevents the release of essentially any NSAID from said dosage form unless the ph of the surrounding medium is 3.5 or higher and at least a portion of said acid inhibitor is not surrounded by an enteric coating and upon ingestion of said unit dosage form by a patient is released regardless of whether the ph of the surrounding medium is below 3.5 or above 3.5. This relationship between ph and drug delivery enables more safe delivery of the active agents than previous dosage forms.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays,
