

people move on to other topics; that we keep that straitjacket in place so we do those things that are, again, responsible not only to this generation but future generations.

Thirdly, I hope we figure out a way, through some type of amendment, to ensure that, on into the future, we have put something in place at the Federal level which causes us to be fiscally responsible in this country. All of us know what it means to have to make choices. All of us have households. Many of us have led cities and States. Many of us have had businesses. We all understand what happens in the real world, and it is something that certainly needs to happen here. That has been sorely lacking for a long time.

So I thank the Chair for the time on the floor today, and I hope to talk about this many more times. I have been doing it, I assure you, throughout the State of Tennessee and in multiple forums in the Senate.

I yield the floor, and I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. CORKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. CORKER. Mr. President, I had the opportunity to speak with you in the last several moments, and you had a couple questions about the CAP Act that I was just discussing on the floor. The Presiding Officer had some great questions about what it takes to overcome the CAP Act, in the event we were able to pass it.

It is just a 10-page bill. It is very eloquent. It doesn't have a lot of "whereases." It is just a business document that takes us from where we are to where we need to be. But, in essence, to override it, it would take a two-thirds vote. It would take two-thirds of the House and the Senate to actually override or get out of the straitjacket, if you will. There were previous bills, such as Gramm-Rudman and other types of bills that tried to keep Washington fiscally focused, and those bills required 60 votes. So this would be a higher threshold.

So, yes, if there was some type of national emergency and we needed to move beyond this straitjacket for 1 year or 6 months or something like that, a two-thirds vote could do that. I mean, 67 votes is a pretty tough threshold, and hopefully it is the kind of threshold necessary to keep the kind of discipline in place that we need.

So it is a 10-page bill. Again, it is very eloquent. I think it lays out a solution for us that hopefully will be a part of anything we do over the next several months.

I understand, after talking with the Presiding Officer over the last several

days, while traveling to these various countries, that he, along with many of our other colleagues—I know I did myself—came here to solve problems, not to message. In a body such as this, it is tough to solve these kinds of problems, but the only way to do it is to offer a pragmatic solution.

I know there are some people who are interested, sometimes, in messaging. I have tried to offer something that I think will take us from a place that is very much out of line in spending to a place that is more appropriate.

I might also say I thought the President's deficit reduction commission had some very good points as it relates to tax reform. I think all of us are aware of the \$1.2 trillion in tax expenditures that exist.

I was doing an event over the last several days, and a gentleman raised his hand and asked me: What do you mean by tax expenditures? Isn't the money ours until we give it to the Federal Government? Why would you call it a tax expenditure?

I think people realize in our Tax Code there are all kinds of exclusions and subsidies and favored companies and favored this and favored that. If we did away with all of those, there would be \$1.2 trillion we could use to lower everybody's rate, and we could make our Tax Code much more simple. The deficit reduction commission says we could take our corporate rates from where they are down to a level of about 26 percent—somewhere between 23 and 29 percent—and lower everybody's rates individually. I think most Americans, instead of filling out all these forms to see if they benefit from these various subsidies and credits, would much rather know that everybody is on the same playing field; that some favored company is not in a situation where they are more favored than another; that everybody is on the same basis.

I think there has been some good work done there. I hope we are able to take votes on that over the next several months. But there is a very elegant, pragmatic solution that has been offered that would go hand in hand with these types of measures and would cause us, over the next 10 years, to exercise the kind of fiscal discipline this country needs to confront what I think threatens our national security, certainly our economic security, even more than the things we saw on the ground in the Middle East last week.

With that, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. LEAHY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. VITTER. I object.

The ACTING PRESIDENT pro tempore. Objection is heard.

The clerk will continue to call the roll.

The assistant legislative clerk continued with the call of the roll.

Mr. LEAHY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Is there an objection?

Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Morning business is closed.

“(j) The term ‘claimed invention’ means the subject matter defined by a claim in a patent or an application for a patent.”.

(b) CONDITIONS FOR PATENTABILITY.—

(1) IN GENERAL.—Section 102 of title 35, United States Code, is amended to read as follows:

“§ 102. Conditions for patentability; novelty

“(a) NOVELTY; PRIOR ART.—A person shall be entitled to a patent unless—

“(1) the claimed invention was patented, described in a printed publication, or in public use, on sale, or otherwise available to the public before the effective filing date of the claimed invention; or

“(2) the claimed invention was described in a patent issued under section 151, or in an application for patent published or deemed published under section 122(b), in which the patent or application, as the case may be, names another inventor and was effectively filed before the effective filing date of the claimed invention.

“(b) EXCEPTIONS.—

“(1) DISCLOSURES MADE 1 YEAR OR LESS BEFORE THE EFFECTIVE FILING DATE OF THE CLAIMED INVENTION.—A disclosure made 1 year or less before the effective filing date of a claimed invention shall not be prior art to the claimed invention under subsection (a)(1) if—

“(A) the disclosure was made by the inventor or joint inventor or by another who obtained the subject matter disclosed directly or indirectly from the inventor or a joint inventor; or

“(B) the subject matter disclosed had, before such disclosure, been publicly disclosed by the inventor or a joint inventor or another who obtained the subject matter disclosed directly or indirectly from the inventor or a joint inventor.

(2) CONTINUITY OF INTENT UNDER THE CREATE ACT.—The enactment of section 102(c) of title 35, United States Code, under the preceding paragraph is done with the same intent to promote joint research activities that was expressed, including in the legislative history, through the enactment of the Cooperative Research and Technology Enhancement Act of 2004 (Public Law 108-453; the “CREATE Act”), the amendments of which are stricken by subsection (c). The United States Patent and Trademark Office shall administer section 102(c) of title 35, United States Code, in a manner consistent with the legislative history of the CREATE Act that was relevant to its administration by the United States Patent and Trademark Office.

Patentability shall not be negated by the manner in which the invention was made.”.

“(b) FILING LIMITATION.—An action under this section may only be filed within 1 year after the issuance of the first patent containing a claim to the allegedly derived invention and naming an individual alleged to have derived such invention as the inventor or joint inventor.”.

(i) DERIVATION PROCEEDINGS.—Section 135 of title 35, United States Code, is amended to read as follows:

“§ 135. Derivation proceedings

“(a) INSTITUTION OF PROCEEDING.—An applicant for patent may file a petition to institute a derivation proceeding in the Office.

The petition shall set forth with particularity the basis for finding that an inventor named in an earlier application derived the claimed invention from an inventor named in the petitioner's application and, without authorization, the earlier application claiming such invention was filed. Any such petition may only be filed within 1 year after the first publication of a claim to an invention that is the same or substantially the same as the earlier application's claim to the invention, shall be made under oath, and shall be supported by substantial evidence. Whenever the Director determines that a petition filed under this subsection demonstrates that the standards for instituting a derivation proceeding are met, the Director may institute a derivation proceeding. The determination by the Director whether to institute a derivation proceeding shall be final and non-appealable.

(b) DETERMINATION BY PATENT TRIAL AND APPEAL BOARD.—In a derivation proceeding instituted under subsection (a), the Patent Trial and Appeal Board shall determine whether an inventor named in the earlier application derived the claimed invention from an inventor named in the petitioner's application and, without authorization, the earlier application claiming such invention was filed. The Director shall prescribe regulations setting forth standards for the conduct of derivation proceedings.

(c) DEFERRAL OF DECISION.—The Patent Trial and Appeal Board may defer action on a petition for a derivation proceeding until 3 months after the date on which the Director issues a patent that includes the claimed invention that is the subject of the petition. (d) EFFECT OF FINAL DECISION.—The final decision of the Patent Trial and Appeal Board, if adverse to claims in an application for patent, shall constitute the final refusal by the Office on those claims. The final decision of the Patent Trial and Appeal Board, if adverse to claims in a patent, shall, if no appeal or other review of the decision has been or can be taken or had, constitute cancellation of those claims, and notice of such cancellation shall be endorsed on copies of the patent distributed after such cancellation.

(e) SETTLEMENT.—Parties to a proceeding instituted under subsection (a) may terminate the proceeding by filing a written statement reflecting the agreement of the parties as to the correct inventors of the claimed invention in dispute. Unless the Patent Trial and Appeal Board finds the agreement to be inconsistent with the evidence of record, if any, it shall take action consistent with the agreement. Any written settlement or understanding of the parties shall be filed with the Director. At the request of a party to the proceeding, the agreement or understanding shall be treated as business confidential information, shall be kept separate from the file of the involved patents or applications, and shall be made available only to Government agencies on written request, or to any person on a showing of good cause.

(f) ARBITRATION.—Parties to a proceeding instituted under subsection (a) may, within such time as may be specified by the Director by regulation, determine such contest or any aspect thereof by arbitration. Such arbitration shall be governed by the provisions of title 9, to the extent such title is not inconsistent with this section. The parties shall give notice of any arbitration award to the Director, and such award shall, as between the parties to the arbitration, be dispositive of the issues to which it relates. The

(4) by adding at the end the following:

“(b) PROCEDURE FOR DETERMINING DAMAGES.—

“(1) IN GENERAL.—The court shall identify the methodologies and factors that are relevant to the determination of damages, and the court or jury shall consider only those methodologies and factors relevant to making such determination.

“(2) DISCLOSURE OF CLAIMS.—By no later than the entry of the final pretrial order, unless otherwise ordered by the court, the parties shall state, in writing and with particularity, the methodologies and factors the parties propose for instruction to the jury in determining damages under this section, specifying the relevant underlying legal and factual bases for their assertions.

“(3) SUFFICIENCY OF EVIDENCE.—Prior to the introduction of any evidence concerning the determination of damages, upon motion of either party or sua sponte, the court shall consider whether one or more of a party’s damages contentions lacks a legally sufficient evidentiary basis. After providing a nonmovant the opportunity to be heard, and after any further proffer of evidence, briefing, or argument that the court may deem appropriate, the court shall identify on the

record those methodologies and factors as to which there is a legally sufficient evidentiary basis, and the court or jury shall consider only those methodologies and factors in making the determination of damages under this section. The court shall only permit the introduction of evidence relating to the determination of damages that is relevant to the methodologies and factors that the court determines may be considered in making the damages determination.

“(c) SEQUENCING.—Any party may request that a patent-infringement trial be sequenced so that the trier of fact decides questions of the patent’s infringement and validity before the issues of damages and willful infringement are tried to the court or the jury. The court shall grant such a request absent good cause to reject the request, such as the absence of issues of significant damages or infringement and validity. The sequencing of a trial pursuant to this subsection shall not affect other matters, such as the timing of discovery. This subsection does not authorize a party to request that the issues of damages and willful infringement be tried to a jury different than the one that will decide questions of the patent’s infringement and validity.

“(d) WILLFUL INFRINGEMENT.—

“(1) IN GENERAL.—The court may increase damages up to 3 times the amount found or assessed if the court or the jury, as the case may be, determines that the infringement of the patent was willful. Increased damages under this subsection shall not apply to provisional rights under section 154(d). Infringement is not willful unless the claimant proves by clear and convincing evidence that the accused infringer’s conduct with respect to the patent was objectively reckless. An accused infringer’s conduct was objectively reckless if the infringer was acting despite an objectively high likelihood that his actions constituted infringement of a valid patent, and this objectively-defined risk was either known or so obvious that it should have been known to the accused infringer.

“(2) PLEADING STANDARDS.—A claimant asserting that a patent was infringed willfully shall comply with the pleading requirements set forth under Federal Rule of Civil Procedure 9(b).

“(3) KNOWLEDGE ALONE INSUFFICIENT.—Infringement of a patent may not be found to be willful solely on the basis that the infringer had knowledge of the infringed patent.

“(4) PRE-SUIT NOTIFICATION.—A claimant seeking to establish willful infringement may not rely on evidence of pre-suit notification of infringement unless that notification identifies with particularity the asserted patent, identifies the product or process accused, and explains with particularity, to the extent possible following a reasonable investigation or inquiry, how the product or process infringes one or more claims of the patent.

“(5) CLOSE CASE.—The court shall not increase damages under this subsection if the court determines that there is a close case as to infringement, validity, or enforceability. On the motion of either party, the court shall determine whether a close case as to infringement, validity, or enforceability exists, and the court shall explain its decision. Once the court determines that such a close case exists, the issue of willful infringement shall not thereafter be tried to the jury.

“(6) ACCRUED DAMAGES.—If a court or jury finds that the infringement of patent was willful, the court may increase only those damages that accrued after the infringement became willful.”

(b) DEFENSE TO INFRINGEMENT BASED ON EARLIER INVENTOR.—Section 273(b)(6) of title

35, United States Code, is amended to read as follows:

“(6) PERSONAL DEFENSE.—The defense under this section may be asserted only by the person who performed or caused the performance of the acts necessary to establish the defense as well as any other entity that controls, is controlled by, or is under common control with such person and, except for any transfer to the patent owner, the right to assert the defense shall not be licensed or assigned or transferred to another person except as an ancillary and subordinate part of a good faith assignment or transfer for other reasons of the entire enterprise or line of business to which the defense relates. Notwithstanding the preceding sentence, any person may, on its own behalf, assert a defense based on the exhaustion of rights provided under paragraph (3), including any necessary elements thereof.”

(c) VIRTUAL MARKING.—Section 287(a) of title 35, United States Code, is amended by inserting “, or by fixing thereon the word ‘patent’ or the abbreviation ‘pat.’ together with an address of a posting on the Internet, accessible to the public without charge for accessing the address, that associates the patented article with the number of the patent” before “, or when”.

(d) ADVICE OF COUNSEL.—Chapter 29 of title 35, United States Code, is amended by adding at the end the following:

“§ 298. Advice of Counsel

“The failure of an infringer to obtain the advice of counsel with respect to any allegedly infringed patent or the failure of the infringer to present such advice to the court or jury may not be used to prove that the accused infringer willfully infringed the patent or that the infringer intended to induce infringement of the patent.”

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to any civil action commenced on or after the date of the enactment of this Act.

The Director shall establish, by regulation, fees to be paid by the person requesting the review, in such amounts as the Director determines to be reasonable, considering the aggregate costs of the review.

“(b) SCOPE.—A petitioner in an inter partes review may request to cancel as unpatentable 1 or more claims of a patent only on a ground that could be raised under section 102 or 103 and only on the basis of prior art consisting of patents or printed publications.
