JuiceTank iPhone 4S Case Coming Soon

Posted on Monday, April 16th, 2012 at 3:00 pm.

You may have heard that there was a Kickstarter project that was designed to allow users to protect their iPhones and charge them at the same time. For a while, this case appeared to be more of a dream than a reality.

Now, however, it appears that the case – JuiceTank – is coming to fruition and you may be able to purchase the case sooner rather than later.

The premise of the JuiceTank iPhone 4S case is simple, but ingenious. The case fits around your iPhone the same way that most form-fitting polycarbonate cases might. Although the case perhaps doesn't have the same level of beauty as some of our Piel Frama iPhone 4S cases or Vaja iPhone 4S cases, the case is still sharp looking and certainly isn't something that you would be embarrassed to carry around with you.

However, the real attractive feature of the case is the plug prongs that fold in or fold out of the rear of the case. All you need to do is flip out the prongs and plug the case into the wall and all of a sudden you are charging your iPhone.

Anybody who can't make it through the day without needing to charge his iPhone should be able to immediately be able to see the value of this iPhone 4S case. Most notably, you don't need to worry about carrying around a cord or your iPhone throughout the day.

This certainly will free up some room in your briefcase or your purse. It also will allow you to not need to worry about draping a cord across your desk or other area when charging your iPhone.

One of the other nice things about this iPhone 4S case is that the prongs fold back into the case just as easily as they folded out. The creators of JuiceTank are hoping to get the case on the market well before the end of this year – which was their original goal.
