onglyza
(saxagliptin) 5 mg
tablets

Do you need some help getting to your A1C goal? Ask about adding ONGLYZA.

What is ONGLYZA?

ONGLYZA is a prescription medicine used along with diet and exercise to lower blood sugar in adults with type 2 diabetes.

ONGLYZA should not be used to treat people with type 1 diabetes or diabetic ketoacidosis (increased ketones in the blood or urine).

STRUGGLING TO REACH YOUR A1C GOALS?

Adding ONGLYZA® (saxagliptin) to your treatment plan might help

When you're living with type 2 diabetes, it's a daily challenge to keep your blood sugar in check. Along with diet and exercise, ONGLYZA can help lower blood sugar, which may give you the boost you need to get your type 2 diabetes under control. As with all decisions concerning your treatment, it is important to work with your healthcare provider on developing a plan. Be sure to ask if once-daily ONGLYZA is right for you.

Fit2Me Because managing type 2 diabetes takes more than just medicine, there's the Fit2Me diet and lifestyle support program custom-fit to you. Learn more about Fit2Me on page 6.

KEY FACTS ABOUT ONGLYZA

Take once daily

Take any time of day

Proven to lower A1C*

Enhances the body's natural ability to control blood sugar

*In addition to diet and exercise. Results may vary.

Important Safety Information for ONGLYZA

Do not take ONGLYZA if you:

- are allergic to any of its ingredients. Serious allergic reactions can occur with ONGLYZA and may include swelling of the face, lips or throat, difficulty swallowing or breathing, swelling of the skin, hives, rash, itching, flaking, or peeling. If you have these symptoms, stop taking ONGLYZA and contact your doctor right away

PROVEN TO LOWER A1C LEVELS

One of the goals of managing type 2 diabetes is lowering your A1C level to a healthy number. ONGLYZA® (saxagliptin) has been tested in multiple clinical studies and in thousands of adult patients with type 2 diabetes. In all of these studies, once-daily ONGLYZA, in addition to diet and exercise, has been shown to lower A1C levels.

Your healthcare provider will know if ONGLYZA could give you a boost. Ask if adding ONGLYZA is right for you.

24-WEEK CLINICAL STUDY

One 24-week clinical study involved 743 adult type 2 diabetes patients whose blood sugar was not controlled enough by taking metformin IR alone. Of these patients, 564 were given ONGLYZA plus metformin IR and 179 patients were given a placebo plus metformin IR.

The patients started the study with an A1C of 8.1%, on average. After 24 weeks, results showed significant A1C reductions in patients who took ONGLYZA plus metformin IR versus placebo plus metformin IR.

After 24 weeks, more patients who took ONGLYZA plus metformin IR versus placebo plus metformin IR achieved an A1C goal of less than 7%.*

*Your results may vary.

Important Safety Information for ONGLYZA

Serious side effects can happen in people who take ONGLYZA:

- Inflammation of the pancreas (pancreatitis) which may be severe and lead to death. Before taking ONGLYZA, tell your doctor if you ever had pancreatitis, gallstones, history of alcoholism, or high triglyceride levels. Stop taking ONGLYZA and contact your doctor right away if you have pain in your stomach area (abdomen) that is severe and will not go away. The pain may be felt going from your abdomen

Talk to your healthcare provider to see if ONGLYZA is right for you.

Please see Important Safety Information on page 7.

ONGLYZA® (saxagliptin) WORKS WITH YOUR BODY

to lower blood sugar levels

Not all medicines for type 2 diabetes work the same way. The graphic below demonstrates how ONGLYZA enhances the body's natural ability to control blood sugar, which may help you manage your type 2 diabetes.

Get the convenience of once-daily dosing with ONGLYZA. Can be taken any time of day, with or without food.

ONGLYZA MAY LOWER MORNING BLOOD SUGAR

MORNING BLOOD SUGAR can rise when you're sleeping, due to the pancreas releasing too much glucagon, which makes the liver release too much sugar.

ONGLYZA MAY LOWER AFTER-MEAL SPIKES

AFTER-MEAL BLOOD SUGAR spikes can occur when your pancreas doesn't release enough insulin or your body's cells do not use insulin properly.

ONGLYZA reduces the amount of sugar released by your liver overnight, which may result in lower blood sugar.

ONGLYZA may lower after-meal blood sugar spikes by helping your body increase levels of insulin after meals.

Important Safety Information for ONGLYZA

Serious side effects can happen in people who take ONGLYZA:

- Heart Failure. Before taking ONGLYZA tell your doctor if you have ever had heart failure or problems with your kidneys. Contact your doctor right away if you have any of the following symptoms of heart failure: increasing shortness of breath or trouble breathing, especially when you lie down; an unusually fast increase in weight; swelling

- When ONGLYZA is used with certain other diabetes medicines to treat high blood sugar, such as a sulfonylurea or insulin, the risk of low blood sugar (hypoglycemia) is higher. Symptoms of low blood sugar include shaking, hunger, sweating, headache, rapid heartbeat, change in mood, and change in vision. Follow your doctor's instructions for treating low blood sugar.

ELIGIBILITY AND TERMS OF USE

ELIGIBILITY: You may be eligible for this offer if you are insured by commercial insurance and your insurance does not cover the full cost of your prescription, or you are not insured and are responsible for the cost of your prescriptions. Patients who are enrolled in a state or federally funded prescription insurance program are not eligible for this offer. This includes patients enrolled in Medicare Part D, Medicaid, Medigap, Veterans Affairs (VA), Department of Defense (DOD) programs or TriCare, and patients who are Medicare eligible and enrolled in an employer-sponsored group waiver health plan or government-subsidized prescription drug benefit program for retirees. If you are enrolled in a state or federally funded prescription insurance program, you may not use this savings card even if you elect to be processed as an uninsured (cash-paying) patient. This offer is not insurance, is restricted to residents of the United States and Puerto Rico, and to patients over 18 years of age.

TERMS OF USE: Eligible commercially insured patients with a valid prescription for ONGLYZA® (saxagliptin) who present this savings card at participating pharmacies will pay \$0 per 30-day supply subject to a maximum savings of \$150 per 30-day supply. If you pay cash for your prescription, AstraZeneca will pay up to the first \$150, and you will be responsible for any remaining balance, for each monthly prescription. Other restrictions may apply. Patient is responsible for applicable taxes, if any. Non-transferable, limited to one per person, cannot be combined with any other offer. Void where prohibited by law, taxed or restricted. Patients, pharmacists, and prescribers cannot seek reimbursement from health insurance or any third party for any part of the benefit received by the patient through this offer. AstraZeneca reserves the right to rescind, revoke, or amend this offer, eligibility and terms of use at any time without notice. This offer is not conditioned on any past, present or future purchase, including refills. Offer must be presented along with a valid prescription at the time of purchase. If you have any questions regarding this offer, please call 1-855-907-3197.

BY USING THIS CARD, YOU AND YOUR PHARMACIST UNDERSTAND AND AGREE TO COMPLY WITH THESE ELIGIBILITY REQUIREMENTS AND TERMS OF USE.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
