Office Action Summary	Examiner	Art Unit				
	JASON MCCORMACK	2881				
The MAILING DATE of this communication appears on the cover sheet with the correspondence address Period for Reply						
A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.  - Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.  - If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.  - Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).						
Status

### **DETAILED ACTION**

## Response to Arguments

 Applicant's arguments filed 11/8/2012 have been fully considered but they are not persuasive.

Regarding applicant's response to the §112 rejection of claim 1; applicant points to a portion of the specification which names examples of high brightness light sources. However, none of the cited portions of applicant's specification *define* a high brightness light source, but the cited portions make clear that there are other high brightness light sources but fails to disclose these sources. While applicant's specification mentions the high brightness light source in many contexts throughout the specification, there is no explicit definition of *how bright* is a high brightness light source.

Regarding applicant's response that Cheymol produces EUV light as opposed to high brightness light; applicant has failed to distinguish in either the claims, or in the specification (for the reasons stated above) that EUV is not a high brightness light source.

Regarding applicant's assertion that Cheymol does not disclose a gas; Cheymol discloses "a jet of individual droplets (e.g. of a liquefied rare gas such as xenon)" [0052] – a gas.

Regarding applicant's assertion that Cheymol does not excite a gas using an ignition source; Cheymol discloses that the lasers are used in "laser excitation" [0010] of the target ("liquefied rare gas such as xenon"). Applicant's response in the first full

Application/Control Number: 13/024,027 Page 3

Art Unit: 2881

paragraph of page 7 then states that applicant performs excitation using a laser on a xenon gas source. Cheymol discloses the same materials and apparatus as claimed in claim 1. It should be noted that claim 1 does not include any recitation of tuning the wavelength of the laser.

In response to applicant's assertion that Kusunose does not disclose high brightness light; see response to arguments, above.

In response to applicant's argument that Kusunose does not disclose an excitation source; as stated in the previous rejection, the source in Kusunose uses lasers to excite and ignite xenon gas. As stated above, Kusunose uses the same materials an apparatus as claimed in claim 1. Claim 1 contains no recitation of tuning the wavelength of the laser.

Regarding applicant's arguments of claims 6 and 7; please see response, above.

### Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The term "high" in claim 1 is a relative term which renders the claim indefinite. The term "high" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention.

Application/Control Number: 13/024,027 Page 4

Art Unit: 2881

## Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

 Claims 1-8 are rejected under 35 U.S.C. 102(b) as being anticipated by Cheymol et al. U.S. PGPUB No. 2006/039435.

Regarding claim 1, Cheymol discloses that in a chamber [0072] xenon gas may be injected [0052] and then irradiated by a laser [0053] which may be an infrared laser [0010].

Regarding claim 2, Cheymol discloses that xenon gas may be injected into the chamber [0052]. Xenon is a noble gas.

Regarding claim 3, Cheymol discloses that xenon gas may be injected into the chamber [0052].

Regarding claim 4, Cheymol discloses that in a chamber [0072] xenon gas may be injected [0052] and then irradiated by a laser [0053] which may be an infrared laser [0010].

# DOCKET

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

# **Real-Time Litigation Alerts**

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## **Advanced Docket Research**

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

# **Analytics At Your Fingertips**

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

#### **LAW FIRMS**

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

#### **FINANCIAL INSTITUTIONS**

Litigation and bankruptcy checks for companies and debtors.

## **E-DISCOVERY AND LEGAL VENDORS**

Sync your system to PACER to automate legal marketing.
