Research Interests

Networks for parallel and distributed computer systems.

Employment

Duke University

Pelham Wilder Professor of Computer Science, July 2011–present.
Professor of Computer Science, January 2010–July 2011.
Visiting Professor of Computer Science, September 2007–August 2008,
July 2009–January 2010.

Carnegie Mellon University

Adjunct Professor of Computer Science, July 2009–July 2010.
Professor of Computer Science, July 2004–July 2009.
Professor of Electrical and Computer Engineering (by courtesy), July 2004–July 2009.
Associate Professor of Computer Science, with tenure, July 1999–July 2004.
Associate Professor of Computer Science, July 1997–July 1999.
Assistant Professor of Computer Science, January 1994–July 1997.

Akamai Technologies, Inc.

Vice President for Research, January 1, 2000–present.
Vice President for Research and Development, April 1, 1999–December 31, 1999.
Senior Research Scientist, January 15, 1999–March 31, 1999.

Massachusetts Institute of Technology

Visiting Associate Professor of Computer Science, September 1998–January 1999.

NEC Research Institute, Inc.

Research Scientist (Permanent Status), October 1993–January 1994.
Research Scientist (Provisional Status), September 1990–October 1993.

Massachusetts Institute of Technology

Postdoctoral Associate, September 1989–September 1990.

Education

Massachusetts Institute of Technology

Ph.D., Computer Science, September 1989.
Thesis title: *Locality in Parallel Computation*
Thesis supervisor: Charles E. Leiserson
S.M., Electrical Engineering and Computer Science, June 1986.
Thesis title: *Communication-Efficient Parallel Graph Algorithms*
S.B., Computer Science and Engineering, June 1985.
Thesis title: *Computing Minimum Spanning Trees on a Fat-Tree Architecture*

University of Illinois at Urbana-Champaign

September 1981–May 1983.

II. Publications

Chapters in Books

- [1] “Parallel algorithms,” G. E. Blelloch and B. M. Maggs. In M. J. Atallah, editor, *Handbook of Algorithms and Theory of Computation*, CRC Press, Boca Raton, FL, November 1998, chapter 47.
- [2] “Parallel algorithms,” G. E. Blelloch and B. M. Maggs. In A. B. Tucker, Jr., editor, *The Computer Science and Engineering Handbook*, CRC Press, Boca Raton, FL, 1997, pp. 277–315.

Refereed Journal Papers

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
