A vehicle video system including at least three video cameras electrically connected to a video signal relay device which directs video signals generated by each of the video cameras to either a video recorder or a monitor depending upon switching signals received to the video signal relay device. A video camera is automatically triggered to commence recording upon activation of a turn signal of a vehicle on which the system is deployed. A motion detector deployed on another vehicle can trigger a video camera deployed on another vehicle to commence recording. The system draws power from a battery of the vehicle.
