Where are you based?

Our corporate headquarters is located in Wilmington, Delaware, USA.

How large is the company?

Formerly Ashland Water Technologies, we have a team of 3,500 professionals. We're active in 118 countries across five continents.

Where are your global facilities?

We operate 30 manufacturing facilities strategically located near customers around the world. We also have two leading research and development facilities located in Wilmington, Delaware, and Krefeld, Germany.

Our regional Customer Applications Laboratories are located in Wilmington, Delaware; Barendrecht, the Netherlands; Krefeld, Germany; Shanghai, China; and Leme, Brazil. These facilities house extensive analytical capabilities, comprehensive paper-testing and water analysis resources, and innovative process testing instrumentation.

How can I request more information?

Contact us (</en/contact-us/>) to learn more about Solenis and what our team can do for you.
