NEW!

Vertical-Mount Data Center Power Control

10/13/99 - BayTech has released two new versions of its RPC product line -- the RPC-7 and the RPC21. Both are vertically mounted, support 20 amps and have 12, 15-amp receptacles.

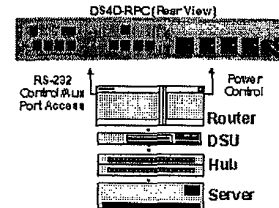

All 12 receptacles are individually controlled and support on/off/reboot commands.

With TRUE RMS current monitoring, the RPC-7 and RPC-21 both, on demand, report the current draw of connected equipment. There is also an overload buzzer alarm that sounds when the preset current threshold is exceeded.

RPC-21 Data Sheet (HTML) (PDF) - uses external control

RPC-7 Data Sheet (HTML) (PDF) - completely integrated with network and RS-232 interface

REBOOT LOCKED EQUIPMENT and RS232 CONSOLE ACCESS WITH ONE PRODUCT: Need complete control and access to remote network equipment? The **DS-RPC** is the answer.

- Built-in Modem Access
- Built-in Ethernet Access
- Built-in Power Control
- Built-in RS-232 Console Access
