DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 36 is rejected under 35 U.S.C. 102(b) as being anticipated by Komma et al. (5,446,565).

Komma et al. discloses the invention as claimed. Fig. 19A-20 show the objective lens (46) for an optical pickup (shown in Figs. 21-62) comprising the holographic region (26, 32 or 42), wherein the region comprises a plurality of grating on the objective lens (see also column 42, lines 45-column 43, line 22), as set forth in claims 36.

Allowable Subject Matter

Claims 1-35 and 37 are allowed.

The following is a statement of reasons for the indication of allowable subject matter:

The prior art of record alone or in combination does not teach or suggest the objective lens having the specific recited structure, including the specific structure of the inner region, holographic region and diffractive region, along with functioning properties with light beams of different wavelengths, as set forth in claims 1-35 and 37.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Ju et al. (5,777,803) discloses an optical apparatus having an optical pickup head including an objective lens having holographic region.
