MERCHANT & GOULD P.C.

United States Patent Application

COMBINED DECLARATION AND POWER OF ATTORNEY

As a below named inventor I hereby declare that: my residence, post office address and citizenship are as stated below next to my name; that

I verily believe I am the original, first and sole inventor (if only one name is listed below) or a joint inventor (if plural inventors are named below) of the subject matter which is claimed and for which a patent is sought on the invention entitled: MOVEABLE AND DEMOUNTABLE WALL PANEL SYSTEM

The specification of which

- a. is attached hereto
- b. was filed on December 21, 2001 as application serial no. _____ and was amended on _____ (if applicable) (in the case of a PCT-filed application) described and claimed in international no. _____ filed _____ and as amended on _____ (if any), which I have reviewed and for which I solicit a United States patent.

I hereby state that I have reviewed and understand the contents of the above-identified specification, including the claims, as amended by any amendment referred to above.

I hereby claim foreign priority benefits under Title 35, United States Code, § 119/365 of any foreign application(s) for patent or inventor's certificate listed below and have also identified below any foreign application for patent or inventor's certificate having a filing date before that of the application on the basis of which priority is claimed:

- a. no such applications have been filed.
- b. such applications have been filed as follows:

FOREIGN APPLICATION(S), IF ANY, CLAIMING PRIORITY UNDER 35 USC § 119			
COUNTRY	APPLICATION NUMBER	DATE OF FILING (day, month, year)	DATE OF ISSUE (day, month, year)
Canada	2,329,591	December 22, 2000	
ALL FOREIGN APPLICATION(S), IF ANY, FILED BEFORE THE PRIORITY APPLICATION(S)			
COUNTRY	APPLICATION NUMBER	DATE OF FILING (day, month, year)	DATE OF ISSUE (day, month, year)

I hereby claim the benefit under Title 35, United States Code, § 120/365 of any United States and PCT international application(s) listed below and, insofar as the subject matter of each of the claims of this application is not disclosed in the prior United States application in the manner provided by the first paragraph of Title 35, United States Code, § 112, I acknowledge the duty to disclose material information as defined in Title 37, Code of Federal Regulations, § 1.56(a) which occurred between the filing date of the prior application and the national or PCT international filing date of this application.

U.S. APPLICATION NUMBER	DATE OF FILING (day, month, year)	STATUS (patented, pending, abandoned)

I hereby claim the benefit under Title 35, United States Code § 119(e) of any United States provisional application(s) listed below:

U.S. PROVISIONAL APPLICATION NUMBER	DATE OF FILING (Day, Month, Year)

I acknowledge the duty to disclose information that is material to the patentability of this application in accordance with Title 37, Code of Federal Regulations, § 1.56 (reprinted below):

§ 1.56 Duty to disclose information material to patentability.

(a) A patent by its very nature is affected with a public interest. The public interest is best served, and the most effective patent examination occurs when, at the time an application is being examined, the Office is aware of and evaluates the teachings of all information material to patentability. Each individual associated with the filing and prosecution of a patent application has a duty of candor and good faith in dealing with the Office, which includes a duty to disclose to the Office all information known to that individual to be material to patentability as defined in this section. The duty to disclose information exists with respect to each pending claim until the claim is canceled or withdrawn from consideration, or the application becomes abandoned. Information material to the patentability of a claim that is canceled or withdrawn from consideration need not be submitted if the information is not material to the patentability of any claim remaining under consideration in the application. There is no duty to submit information which is not material to the patentability of any existing claim. The duty to disclose all information known to be material to patentability is deemed to be satisfied if all information known to be material to patentability of any claim issued in a patent was cited by the Office or submitted to the Office in the manner prescribed by §§ 1.97(b)-(d) and 1.98. However, no patent will be granted on an application in connection with which fraud on the Office was practiced or attempted or the duty of disclosure was violated through bad faith or intentional misconduct. The Office encourages applicants to carefully examine:

- (1) prior art cited in search reports of a foreign patent office in a counterpart application, and
- (2) the closest information over which individuals associated with the filing or prosecution of a patent application believe any pending claim patentably defines, to make sure that any material information contained therein is disclosed to the Office.

(b) Under this section, information is material to patentability when it is not cumulative to information already of record or being made of record in the application, and

- (1) It establishes, by itself or in combination with other information, a prima facie case of unpatentability of a claim; or
- (2) It refutes, or is inconsistent with, a position the applicant takes in:
 - (i) Opposing an argument of unpatentability relied on by the Office, or
 - (ii) Asserting an argument of patentability.

A prima facie case of unpatentability is established when the information compels a conclusion that a claim is unpatentable under the preponderance of evidence, burden-of-proof standard, giving each term in the claim its broadest reasonable construction consistent with the specification, and before any consideration is given to evidence which may be submitted in an attempt to establish a contrary conclusion of patentability.

(c) Individuals associated with the filing or prosecution of a patent application within the meaning of this section are:

- (1) Each inventor named in the application;
- (2) Each attorney or agent who prepares or prosecutes the application; and
- (3) Every other person who is substantively involved in the preparation or prosecution of the application and who is associated with the inventor, with the assignee or with anyone to whom there is an obligation to assign the application.

(d) Individuals other than the attorney, agent or inventor may comply with this section by disclosing information to the attorney, agent, or inventor.

(e) In any continuation-in-part application, the duty under this section includes the duty to disclose to the Office all information known to the person to be material to patentability, as defined in paragraph (b) of this section, which became available between the filing date of the prior application and the national or PCT international filing date of the continuation-in-part application.

I hereby appoint the following attorney, and/or patent agent(s) to prosecute this application and to transact all business in the Patent and Trademark Office connected herewith:

NOTICE TO FILE MISSING PARTS OF NONPROVISIONAL APPLICATION

FILED UNDER 37 CFR 1.53(b)

Filing Date Granted

An application number and filing date have been accorded to this application. The item(s) indicated below, however, are missing. Applicant is given **TWO MONTHS** from the date of this Notice within which to file all required items and pay any fees required below to avoid abandonment. Extensions of time may be obtained by filing a petition accompanied by the extension fee under the provisions of 37 CFR 1.136(a).

- The oath or declaration is unsigned.
- To avoid abandonment, a late filing fee or oath or declaration surcharge as set forth in 37 CFR 1.16(l) of \$130 for a non-small entity, must be submitted with the missing items identified in this letter.
- **The balance due by applicant is \$ 130.**

The application is informal since it does not comply with the regulations for the reason(s) indicated below.

The required item(s) identified below must be timely submitted to avoid abandonment:

- Substitute drawings in compliance with 37 CFR 1.84 because:
 - drawing sheets do not have the appropriate margin(s) (see 37 CFR 1.84(g)). Each sheet must include a top margin of at least 2.5 cm. (1 inch), a left side margin of at least 2.5 cm. (1 inch), a right side margin of at least 1.5 cm. (5/8 inch), and a bottom margin of at least 1.0 cm. (3/8 inch);
 - Drawings must be reasonably free from erasures and must be free from alterations, overwritings, interlineations, folds, and copy marks.
 - drawings submitted to the Office are not electronically reproducible. Drawing sheets must be submitted on paper which is flexible, strong, white, smooth, non-shiny, and durable (see 37 CFR 1.84(e));

*A copy of this notice **MUST** be returned with the reply.*

NOTICE TO FILE MISSING PARTS OF NONPROVISIONAL APPLICATION

FILED UNDER 37 CFR 1.53(b)

Filing Date Granted

An application number and filing date have been accorded to this application. The item(s) indicated below, however, are missing. Applicant is given **TWO MONTHS** from the date of this Notice within which to file all required items and pay any fees required below to avoid abandonment. Extensions of time may be obtained by filing a petition accompanied by the extension fee under the provisions of 37 CFR 1.136(a).

- The oath or declaration is unsigned.
- To avoid abandonment, a late filing fee or oath or declaration surcharge as set forth in 37 CFR 1.16(l) of \$130 for a non-small entity, must be submitted with the missing items identified in this letter.
- **The balance due by applicant is \$ 130.**

The application is informal since it does not comply with the regulations for the reason(s) indicated below.

The required item(s) identified below must be timely submitted to avoid abandonment:

- Substitute drawings in compliance with 37 CFR 1.84 because:
 - drawing sheets do not have the appropriate margin(s) (see 37 CFR 1.84(g)). Each sheet must include a top margin of at least 2.5 cm. (1 inch), a left side margin of at least 2.5 cm. (1 inch), a right side margin of at least 1.5 cm. (5/8 inch), and a bottom margin of at least 1.0 cm. (3/8 inch);
 - Drawings must be reasonably free from erasures and must be free from alterations, overwritings, interlineations, folds, and copy marks.
 - drawings submitted to the Office are not electronically reproducible. Drawing sheets must be submitted on paper which is flexible, strong, white, smooth, non-shiny, and durable (see 37 CFR 1.84(e));

*A copy of this notice **MUST** be returned with the reply.*

DEMOUNTABLE PARTITION SYSTEM

FIELD OF THE INVENTION

5

The present invention is concerned with movable partitions. More precisely, it is concerned with a partition system composed of mountable and demountable partitions for forming a separate room such as an office.

10 BACKGROUND OF THE INVENTION

The use of partitions for temporarily forming an office space, is known to this day. However, the partitions that are known to this day, are basically composed of a panel mounted on a metallic stand. However, the panels are aligned side by side
15 to form a predetermined office space. Such a space does not allow any privacy and is not sound-proof. Therefore, there is a need to provide a partition system that may be quickly and easily mountable and demountable and allows the creation of an office space equal in quality to a regular office.

20 SUMMARY OF THE INVENTION

It is a first object of the invention to provide an instantly mountable and demountable partition system.

25 It is a second object of the present invention to provide a partition system that may be installed with a minimum of tools.

It is a third object of the invention to provide a partition system that is able to adjust to irregular floor surfaces, thereby maintaining parallel interface of the partitions.

30

It is a fourth object of the invention to provide a partition system that allows the removal of a single partition without affecting the neighbouring partitions.

2

It is a fifth object of the present invention to provide a partition system that is easy and simple to install.

- 5 The objects of the present invention are achieved with an adjustable partition system that is readily mountable and demountable, the partition system comprising a plurality of partitions, each partition comprising a panel mounted on a frame, the frame comprising two vertical members parallel to each other, the vertical members defining the length of the frame and two horizontal members
- 10 defining the width of the frame, each partition comprising a top portion and a bottom portion, the top portion adapted to be secured to a ceiling by a first connector for connecting the horizontal member on the top portion of the partition to a ceiling grip, and the bottom portion adapted to be secured to the floor, by a second connector for securing the horizontal member on the bottom portion of the
- 15 partition to the floor, and an adjustable glide for allowing adjustment of the partition relative to the level of the floor; and a door detachably mounted to a door strike.

An advantage of the partition system of the present invention is that it may be readily installed in a pre-existing room with its pre-existing architectural features.

20

Another advantage provided by the partition system of the present invention, is that it allows the creation of a room having a partition regularly and evenly spaced, thereby maintaining a parallel interface of the panel.

- 25 A further advantage of the partition system of the present invention is that it allows mounting and demounting of individual partition sections independently from the others.

BRIEF DESCRIPTION OF THE DRAWINGS

Figure 26 is a side cross-sectional view of a base cover according to a preferred embodiment of the present invention.

10 Figure 27 is a perspective view of a pivot plate according to a preferred embodiment of the present invention.

Figure 28 is an exploded view of a panel member according to a preferred embodiment of the present invention.

15

Figure 29 is an exploded view of a partition member according another embodiment of the present invention.

20 Figure 30 is an exploded view of a door according to a preferred embodiment of the present invention used in the partition system of the present invention.

DETAILED DESCRIPTION OF THE INVENTION

25 As seen in Figure 1, the partition system according to the present invention comprises a plurality of partition members. Each partition member comprises a panel which may be made of any suitable material that may be used as a wall structure or a material selected from the group consisting of steel, wood, gypsum, plastic, fiber-glass or any variety of finishes selected from the group consisting of fabric, vinyl, veneer, paint, laminate. The panel is mounted on a frame, which
30 comprises at least two vertical members and two horizontal members. The horizontal member defining the top of the partition, is adapted to be connected to the ceiling through a ceiling connector. The vertical member in the bottom

6

portion of the partition is adapted to be secured to the floor through an adjustable connector.

5 Referring to Figures 2, 28 and 29, there is shown a ceiling rail according to a preferred embodiment of the present invention. The ceiling rail is designed to receive the top portion of the partition member. The partition member is fixed to the ceiling rail through a ceiling connector, which may be a T-slot connector or a caddy clip. It should be understood that any other type of connector may be used in the context of the present invention, and that is known to a person skilled in the art is included in the scope of the present invention.

10

As may be seen in figures 3 and 5a to 5e, the lower portion of each partition member is adapted to be secured to the floor through an adjustable connector. More precisely, the adjustable connector comprises an adjustable glide. As best seen in figure 9, the glide assembly comprises a threaded bolt and a nut, which are connected to a bracket on the floor channel. The adjustable glide assembly is attached to the lower end of a vertical member of a partition member. The adjustable glide is further adapted to be connected to a floor channel. In the illustrated embodiment, the adjustable glide is connected to the floor member through bracket means. Thus, the adjustable glide serves as an adjustable connector between a partition member and the floor. The purpose of providing such an adjustable connector is to allow each of the partition members to be properly aligned relative to each other. This maintains a parallel interface of the panel. It should be noted that the partition system of the present invention uses the ceiling as a level point.

15

20

25

As seen in figures 1 and 30, the partition system according to the present invention also comprises a door, which may pivot between an open and closed position. The door is secured to the panel assembly through a pair of pivoting rods that are secured on the top and bottom of the same side of the door. As best seen in figure 4, the top portion of the door comprises a pivoting rod, which may be inserted in an opening on the door strike assembly as best seen in figure 7. As

30

7

seen in figure 27, a pivot plate is secured at the bottom of the door and comprises an opening for receiving the pivoting rod therein.

5 Referring now to Figures 12, 13a and 13b, the partition system according to the present invention, is also provided with different connectors for connecting at least two partition members together. As seen in Figure 12, the corner connector is designed to connect two partition members perpendicularly or in different angles. It is used to form a corner. As best seen in Figure 10c, the corner connector is designed to retain a portion of the vertical member of each partition member.

10

Referring now to Figure 13a, there can be seen a recessed connector. This connector comprises two wings extending upwardly. These wings are made of soft PVC and are flexible. The core of this connector, which consists of a gripping device, is made of hard PVC. This connector is especially useful to be used in combination with a solid panel such as seen in Figure 6, since the wings are designed to cover the series of openings which are present along the entire length of the vertical post. When needed, it is possible to install a hook or a bracket in the openings by pushing in the flexible wing of the recessed connector.

15

20 Referring now to Figure 13b, a flush connector may also be used to connect the partition members. As opposed to the recessed connector, the flush connector does not comprise a pair of wings, and is designed to create a uniform surface when it is installed on the vertical members of the adjacent partition members.

25 Referring now to Figures 11a, 14, 16 and 29, there are shown different stiffeners that are used in solid panel partition systems. The function of such stiffeners is to support the panel which may be flexible if it is made of a steel sheet, and also to provide means for mounting and demounting the panel to the structural frame. Spring clips, such as shown in Figures 15a and 15b, are used so as to allow the panel to be mounted to a structural frame in a snap-fit fashion.

30

8

The floor channel is designed to support the entire weight of each partition member. It is designed to distribute the weight of the partition members evenly. The floor channel of the present invention has been designed so as to resist earthquakes and to maintain its rigidity for each partition member.

5

As previously mentioned, the partition system according to the present invention has been designed to provide partitions that are easily and quickly mountable and demountable for creating a new room. Furthermore, the system allows the attachment and detachment of a single partition member, without disturbing the neighbouring partition members. Therefore, there is no need to disturb the neighbouring partition members if one partition member needs to be replaced or removed.

15 Although the present invention has been explained hereinabove by way of a preferred embodiment thereof, it should be pointed out that any modifications to this preferred embodiment within the scope of the present invention is not deemed to alter or change the nature and scope of the present invention.

GENIUS™

Movable/Demountable Office Partition System

- Variable sized, prefabricated panels available in both furniture and building module. Ceiling height (either flush or recessed base and ceiling conditions), clear-story and free standing options are available.
- Wall thickness is 3 ½ inches thus allowing for superior sound rating, as well as passthrough components, i.e. electrical wires, communication and network cables, air conditioning, fiber optic cables, etc.
- Panel shells are removable by means of specially designed connecting strips. These connecting strips and the shells are designed in such a way as to achieve on site demountability. Moreover, it allows for field installation of electrical, communication and fiber optic wires.
- The adjustability at the ceiling is +/- 1 inch
- Panels are stackable. The unique splice connector allows panels to be stacked on top of each other, thereby allowing these stacked panels to exceed 120" in height.
- The panel-to-panel connector gives both the ability to adjust for "panel creep" and, using the flush version, allows this system to be used in "clean room" and fire-rated corridor environments.
- The vertical and horizontal shapes are designed so that it can accommodate both single or double glazing, and a variety of blinds and privacy screens.
- The unique design of the lower glide system allows for an adjustability of over 3 inches
- The panels may be attached to drywall by means of a telescoping wall connector.
- The specially designed glazing posts allow for electrical and communication wiring to be housed inside these posts.
- Panels shells may be manufactured from a variety of materials, i.e. steel, wood, gypsum, plastic, fiberglass, etc, in a variety of finishes (Fabric, vinyl, veneer, paint, laminates)

- The wall has the capacity to allow for pocket doors, pivot doors and hinged doors.
- Ability to accommodate 3" thick flat screen TV's within solid panels.
- Minimal number of "loose" components on the job site allows for an easy and clean installation.
- It allows for hanging componentry, i.e. worksurfaces, overheads, light accessories.
- Radius corners and radius panels are an option with this system.

DECLARATION FOR PATENT APPLICATION

As a below named inventor, I (we) hereby declare that my (our) residence, post office address and citizenship are as stated below next to my (our) name; I (we) believe that I am (we are) the original, first and sole inventor(s) (if only one name is listed below) or an original, first and joint inventor (if plural names are listed below) of the subject matter which is claimed and for which a patent is sought on the invention (Design, if applicable) entitled: DEMOUNTABLE PARTITION SYSTEM

the specification of which (check one): is attached hereto; was filed on December 21, 2001 as application serial No. _____ and was amended on (or amended through) _____ (if applicable); was filed on _____ as International Application (PCT) No. _____ and amended on _____ (if applicable). I (we) hereby state that I (we) have reviewed and understand the contents of the above-identified specification, including the claims, as amended by any amendment(s) referred to above. I (we) acknowledge the duty to disclose information known by me (us) to be material to the patentability of my (our) invention in accordance with Title 37, Code of Federal Regulations, § 1.56(a). I (we) hereby claim foreign priority benefits under Title 35, United States Code § 119 of any foreign application(s) for patent or inventor's certificate listed below and have also identified below any foreign application for patent or inventor's certificate having a filing date before that of the application which priority is claimed.

I (We) hereby claim foreign priority benefits under Title 35, United States Code § 119 of any foreign application(s) for patent or inventor's certificate listed below and have also identified below any foreign application for patent or inventor's certificate having a filing date before that of the application which priority is claimed.

Prior Foreign Application(s)			Priority Claimed

INFORMATION DISCLOSURE STATEMENT (37 C.F.R. § 1.97(b))

Commissioner for Patents
Washington, D.C. 20231

Dear Sir:

With regard to the above-identified application, the items of information listed on the enclosed Form 1449 are brought to the attention of the Examiner.

This statement should be considered because it is submitted before the mailing date of a first Office Action on-the-merits. Accordingly, no fee is due for consideration of the items listed on the enclosed Form 1449.

In accordance with 37 C.F.R. §1.98(a)(2), a copy of each document or other information listed on the enclosed Form 1449 is provided.

No representation is made that a reference is "prior art" within the meaning of 35 U.S.C. §§ 102 and 103 and Applicants reserve the right, pursuant to 37 C.F.R. § 1.131 or otherwise, to establish that the reference(s) are not "prior art." Moreover, Applicants do not represent that a

reference has been thoroughly reviewed or that any relevance of any portion of a reference is intended.

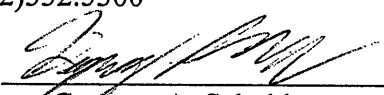

Consideration of the items listed is respectfully requested. Pursuant to the provisions of M.P.E.P. 609, it is requested that the Examiner return a copy of the attached Form 1449, marked as being considered and initialed by the Examiner, to the undersigned with the next official communication.

Please charge any additional fees or credit any overpayment to Deposit Account No. 13-2725.

Respectfully submitted,

MERCHANT & GOULD P.C.

PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant:	VON HOYNINGEN HUENE, et al.	Examiner:	Unknown
Serial No.:	10/027872	Group Art Unit:	Unknown
Filed:	December, 21, 2001	Docket No.:	9680.190US01
Title:	MOVEABLE AND DEMOUNTABLE WALL PANEL SYSTEM.		

CERTIFICATE UNDER 37 CFR 1.10:
 "Express Mail" mailing label number: EV 036305928 US
 Date of Deposit: March 22, 2002
 I hereby certify that this correspondence is being deposited with the United States Postal Service "Express Mail Post Office to Addressee" service under 37 CFR 1.10 on the date indicated above and is addressed to Commissioner for Patents, Washington, D.C. 20231.
 By: 
 Name: Chris Stordahl

SUBMISSION OF MISSING PARTS

BOX MISSING PARTS
Assistant Commissioner for Patents
Washington, D.C. 20231

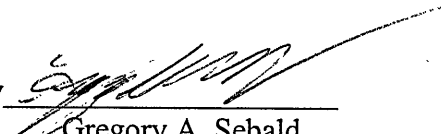

Dear Sir:

In connection with the above-identified application, enclosed please find the originally signed Combined Declaration and Power of Attorney and Associate Power of Attorney. Also enclosed is our check in the amount of \$130 to cover the Missing Parts completion fee.

Respectfully submitted,

MERCHANT & GOULD P.C.
P.O. Box 2903
Minneapolis, Minnesota 55402-0903

EXAMINER

MCDERMOTT, KEVIN

ART UNIT	PAPER NUMBER
3635	

3635

DATE MAILED: 05/06/2003

Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No. 10/027,872	Applicant(s) VON HOYNINGEN HUENE ET AL.	
Examiner McDermott, Kevin	Art Unit 3635	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on _____.
- 2a) This action is FINAL.
- 2b) This action is non-final.
- 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) Claim(s) 1-20 is/are pending in the application.
 - 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) Claim(s) _____ is/are allowed.
- 6) Claim(s) 1,4,5,9 and 11-14 is/are rejected.
- 7) Claim(s) 2,3,6-8,10 and 15-20 is/are objected to.
- 8) Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) The specification is objected to by the Examiner.
- 10) The drawing(s) filed on _____ is/are: a) accepted or b) objected to by the Examiner.

Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- 11) The proposed drawing correction filed on _____ is: a) approved b) disapproved by the Examiner.

If approved, corrected drawings are required in reply to this Office action.
- 12) The oath or declaration is objected to by the Examiner.

Priority under 35 U.S.C. §§ 119 and 120

- 13) Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 - a) All b) Some * c) None of:
 - 1. Certified copies of the priority documents have been received.
 - 2. Certified copies of the priority documents have been received in Application No. _____.
 - 3. Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.
- 14) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
 - a) The translation of the foreign language provisional application has been received.
- 15) Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Attachment(s)

- 1) Notice of References Cited (PTO-892)
- 2) Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) Information Disclosure Statement(s) (PTO-1449) Paper No(s) 5.
- 4) Interview Summary (PTO-413) Paper No(s). _____.
- 5) Notice of Informal Patent Application (PTO-152)
- 6) Other:

DETAILED ACTION

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 4, 11, and 12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding claim 4, line 2 recites "the vertical stiffeners". There is insufficient antecedent basis for this limitation in the claims.

Regarding claim 11, line 2 recites "the pivot head" and "the glide bolt". There is insufficient antecedent basis for this limitation in the claims.

Regarding claim 12, line 2 recites "the insert" and "the glide". There is insufficient antecedent basis for this limitation in the claims.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1, 5, 9, and 13 are rejected under 35 U.S.C. 103(a) as being unpatentable over Goodman.

Goodman discloses in figures 1-45 and in column 7, lines 17 to 27, at least one moveable panel 2 with a rigid frame 3, a core panel 4 mounted therein, and at least one

cover panel 5 detachably mounted on the frame 3 and enclosing an associated portion thereof. The frame 3 has at least one vertical side member or stile 6 with a first channel 7, and a second channel 8, each of which extend longitudinally along the stile 6.

As best seen in fig. 2, the rigid frame 3 of the present invention includes a pair of horizontally spaced apart, vertically disposed stiles 6. Corresponding pairs of horizontal cross members 14, 15, 16, 17, 18 are welded to opposite side faces 19, 20 of the vertical stiles 6.

Figure 37 and column 13, lines 2-7 disclose the horizontal cross members 14-18 having a plurality of clip receiving slots 269 that are spaced below the horizontal rows of slots 21. A plurality of clips 270 along the upper edge 271 of each cover panel 5 are received in the slots 269 to retain the lower cover panels 5 on the frame 3.

The cross members 14 and 18 are the claimed opposite top and bottom distance channels, the stiles 6 are the claimed opposite left and right posts, and the cover panel 5 is the claimed panel covering removeably mountable onto receiving means of the frame 3.

Column 8, lines 24-48 disclose a variable height support 12 disposed between the frame 3 and the ceiling. The variable height support 12 secures the panel frame 3 with the ceiling track 54.

Column 8, lines 13-23 disclose a floor track 30 disposed directly beneath the panel frame 3 and being shaped to support the panel 2 on the floor surface 31. A pair of jack screws 32 extend downwardly from lower horizontal frame member 33 and engage openings 34 in the floor track 30. Jack screws 32 permit the panel frame 3 to

be vertically adjusted to account for variations in the existing floor surface 31. Jack screws 32 are disposed in receiving channels of stile 6 as shown in figures 15 and 17. The floor track 30 is the claimed articulated floor channel and the jack screws 32 are the claimed glide assemblies.

Figures 18-20 and column 10, lines 30-45 disclose lower panel-to-panel connector bracket 41 including a plate 150 having an angled portion 151 and an inwardly inset portion 152. A pair of elongated side straps 153 are welded to the plate 150, and stile 6 at 154. As best seen in figure 20, when a pair of adjacent panel frames 3 are aligned in an end-to-end manner, the clearance holes 42 of adjacent upper brackets 40 are aligned and receive fasteners 155 to rigidly interconnect the adjacent panels 2.

The brackets 40 are the claimed lips extending along a direction substantially parallel to the vertical axis of the panels. Additionally, the fasteners are the claimed connectors, so the brackets 40 of one panel are connectable to the bracket 40 of other panels.

However, Goodman does not disclose the stiles 6 and cross members 14 and 18 being connected by connecting studs.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to substitute connecting studs for the welded connection of Goodman because the examiner takes the position that a welded connection and a studded connection are equivalent for their use in the panel art and the selection of any of these known equivalents would be within the level of ordinary skill in the art.

One of ordinary skill would have been motivated to make such a modification to quickly assemble the frame 3 of Goodman.

Regarding claim 5 as discussed above, figure 37 and column 13, lines 2-7, disclose the horizontal cross members 14-18 having a plurality of clip receiving slots 269 that are spaced below the horizontal rows of slots 21. A plurality of clips 270 along the upper edge 271 of each cover panel 5 are received in the slots 269 to retain the lower cover panels 5 on the frame 3.

Regarding claim 9, Column 14, lines 35-37 disclose the floor track 30 and the ceiling track 54 being secured to the floor and ceiling, respectively.

However, Goodman does not disclose using fasteners to secure the floor 30 and ceiling 54 tracks to the floor and ceiling, respectively.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use any kind of fastener for securing the tracks 30, 54 since it was known in the art to fasten the tracks 30, 54 to the floor and ceiling.

One of ordinary skill would be motivated to use fasteners to secure the tracks 3, 54 to the floor and ceiling, respectively, to secure a panel in place.

Regarding claim 13, column 9, line 66 to column 10, line 5, discloses the floor track 30 further including a pair of upwardly-extending step portions 121 and horizontal flange portions 122. Upwardly-extending side flanges 123 receive clip 126 of base trim 125. Upper edge 127 of base trim 125 abuts outer surface 128 of lower cover panel 5.

Trim 125 is the claimed base cover.

Regarding claim 14, as illustrated in figure 15, the trim 125 has a U-shaped bottom for accommodating the vertical member 123. One leg of the U-shaped bottom is disposed outside the vertical member 123, and the other is disposed between the vertical member 123 and the outer surface 128 of panel 5. The leg disposed between the vertical member 123 and the outer surface 128 of panel 5 is the claimed insert.

Allowable Subject Matter

Claims 2, 3, 6-8, 10, and 15-20 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Regarding claim 2, the prior art does not disclose, and it does not appear obvious to modify the prior art to disclose, a wall panel system having the limitations of claim 1 wherein the receiving means comprise vertical grooves disposed in the vertical posts and vertical stiffeners affixed to the lateral sides of the outer panel shell of the panel covering.

Regarding claim 3, the prior art does not disclose, and it does not appear obvious to modify the prior art to disclose, a wall panel system having the limitations of claim 1 wherein the receiving means comprise horizontal grooves disposed in the top horizontal channel posts and a stiffener affixed to a lateral side of the outer panel shell of the panel covering.

Regarding claim 6, the prior art does not disclose, and it does not appear obvious to modify the prior art to disclose, a wall panel system having the limitations of claim 1 wherein the connectors comprise fins.

Regarding claim 7, the prior art does not disclose, and it does not appear obvious to modify the prior art to disclose, a wall panel system having the limitations of claim 1 wherein the connectors are provided with covering caps.

Regarding claim 8, the prior art does not disclose, and it does not appear obvious to modify the prior art to disclose, a wall panel system having the limitations of claim 1 wherein the connectors comprise flexible skirts.

Regarding claim 10, the prior art does not disclose, and it does not appear obvious to modify the prior art to disclose, a wall panel system having the limitations of claim 1 wherein the glide is substantially L-shaped and has an abutment flange and an insert being removably insertable into a receiving channel of a vertical post, and wherein the glide assembly further comprises a glide bolt threadedly mounted into the abutment flange of the glide and having a pivot head mounted on the floor channel.

Regarding claim 15, the prior art does not disclose, and it does not appear obvious to modify the prior art to disclose, a wall panel system having the limitations of claim 1 wherein at least two connecting studs are securely affixed at opposite ends of each of the top and bottom distance chann Regarding claim 6, the prior art does not disclose, and it does not appear obvious to modify the prior art to disclose, a wall panel system having the limitations of claim 1 wherein the connectors comprise fins.els.

Regarding claim 16, the prior art does not disclose, and it does not appear obvious to modify the prior art to disclose, a wall panel system having the limitations of claim 1 wherein the vertical posts have intersepta and accessories are mounted in the intersepta.

Regarding claims 17 and 18, the prior art does not disclose, and it does not appear obvious to modify the prior art to disclose, a wall panel system having the limitations of claim 1 wherein the panels are stackable using stackable flyovers inserted and fastened into the receiving channels of the vertical posts and stacked panels, and the stackable flyovers are interference ribs.

Regarding claim 19, the prior art does not disclose, and it does not appear obvious to modify the prior art to disclose, a wall panel system having the limitations of claim 1 wherein the vertical posts have punched marks extending longitudinally along the vertical posts which are used for hooking accessories.

Regarding claim 20, the prior art does not disclose, and it does not appear obvious to modify the prior art to disclose, a wall panel system having the limitations of claim 1 further comprising a door assembly.

Claims 4, 11, and 12 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter:

Regarding claim 4, the prior art does not disclose, and it does not appear obvious to modify the prior art to disclose, a wall panel system having the limitations of claims 1 and 3 wherein the vertical stiffeners comprise a bracket and a flexible clip.

Application/Control Number: 10/027,872
Art Unit: 3635

Page 9

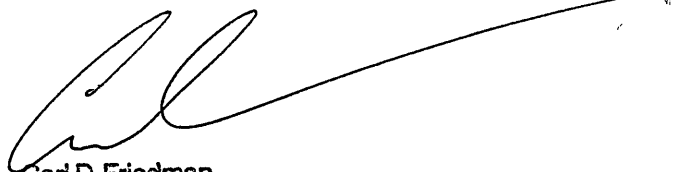

Regarding claim 11, the prior art does not disclose, and it does not appear obvious to modify the prior art to disclose, a wall panel system having the limitations of claim 1 wherein the glide bolt includes a pivot head.

Regarding claim 12, the prior art does not disclose, and it does not appear obvious to modify the prior art to disclose, a wall panel system having the limitations of claim 1 wherein the glide comprises two tongues removably mountable into channels of the vertical posts.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Kevin McDermott, whose telephone number is 703-308-8266.

AMENDMENT

Dear Sir:

In response to the Office Action mailed May 6, 2003, please amend the above-identified application as follows:

Amendments to the Claims are reflected in the listing of claims that begins on page 2 of this paper.

Remarks begin on page 6 of this paper

Amendments to the Claims:

This listing of claims will replace all prior versions and listings of claims in the application.

Listing of Claims:

1. (Currently amended) A moveable and demountable wall panel system comprising a plurality of panels used for defining an office space, each panel having a vertical axis and a horizontal axis, each panel comprising:

opposite top and bottom distance channels, the distance channels extending along directions substantially parallel to the horizontal axis of the panel;

opposite left and right vertical posts, the vertical posts extending along directions substantially parallel to the vertical axis of the panel, the distance channels and vertical posts being affixed to one another by means of connecting studs for forming a rectangular support frame of the panel;

a panel covering removably mountable onto receiving means of the rectangular support frame;

a ceiling rail operatively connected to a top portion of the rectangular support frame, the ceiling rail being used for operatively securing the rectangular support frame of the panel to a ceiling surface; and

an articulating floor channel operatively connected to a bottom portion of the rectangular support frame by means of left and right glide assemblies mounted into receiving channels of the left and right vertical posts respectively, the articulating floor channel being used for operatively securing the rectangular support frame of the panel to a ground surface, the glide assemblies being further used for displacing the rectangular support frame with respect to the floor channel along a direction substantially parallel to the vertical axis of the panel;

wherein each vertical post comprises comprising at least one receiving lip extending along a direction substantially parallel to the vertical axis of the panel, each receiving lip being removably connectable to another receiving lip of a vertical post of a neighboring panel by means of a connector for selectively and removably connecting together a plurality of panels in order to define said office space; the receiving means comprising receiving grooves disposed along the vertical posts in a direction substantially parallel to the vertical axis of the panel; and

the panel covering comprising an outer panel shell and vertical stiffeners, the vertical stiffeners being securely affixed to lateral sides of the outer panel shell of the panel covering and being removably connectable onto the receiving grooves of the vertical posts for removably connecting the panel covering onto the rectangular support frame of the panel.

2. (Canceled)

cont. Q1
~~3.~~ (Original) A moveable and demountable wall panel system according to claim 1, wherein the receiving means comprise a receiving groove disposed along the top distance channel in a direction substantially parallel to the horizontal axis of the panel and wherein the panel covering comprises an outer panel shell and a top stiffener, the top stiffener being securely affixed to a lateral side of the outer panel shell of the panel covering and being removably hookable onto the receiving groove of the top distance channel for removably hooking the panel covering onto the rectangular support frame of the panel.

~~3.~~
~~4.~~ (Original) A moveable and demountable wall panel system according to claim ~~3~~, wherein the vertical stiffeners each comprise a bracket and a flexible clip securely affixed onto one another, the brackets being further securely affixed to the lateral sides of the outer panel shell of the panel covering and the flexible clips being removably connectable into the receiving grooves of the vertical posts.

~~5.~~ (Original) A moveable and demountable wall panel system according to claim 1, wherein the panel covering comprises an outer panel shell and intermediate stiffeners, the intermediate stiffeners being securely affixed transversely onto the outer panel shell of the panel covering in a direction substantially parallel to the horizontal axis of the panel.

~~5.~~ (Original) A moveable and demountable wall panel system according to claim 1, wherein the connectors comprise fins.

~~6.~~ (Original) A moveable and demountable wall panel system according to claim 1, wherein the connectors are provided with covering caps.

⁷
~~8.~~ (Original) A moveable and demountable wall panel system according to claim 1, wherein the connectors comprise flexible skirts.

⁸
~~9.~~ (Original) A moveable and demountable wall panel system according to claim 1, wherein the floor channel is securely affixed to the ground surface by means of fasteners, and wherein the ceiling rail is securely affixed to the ceiling surface by means of fasteners.

⁹
~~10.~~ (Original) A moveable and demountable wall panel system according to claim 1, wherein each glide assembly comprises:

a substantially L-shaped glide, said glide having an abutment flange and an insert, the insert being removably insertable into a receiving channel of a corresponding vertical post; and

a glide bolt, said glide bolt being threadedly mounted into the abutment flange of the glide and having a pivot head articulately mounted to the floor channel by means of a rivet.

¹⁰
~~11.~~ (Currently amended) A moveable and demountable wall panel system according to claim ~~9~~ ¹⁰, wherein the pivot head of the glide bolt is positioned inside a longitudinal groove of the floor channel, and wherein the rivet of the pivot head is constrained to slide along a transversal slot of the longitudinal groove of the floor channel.

¹¹
~~12.~~ (Currently amended) A moveable and demountable wall panel system according to claim ~~9~~ ¹⁰, wherein the insert of the glide comprises two tongues removably mountable into respective receiving channels of a corresponding vertical post.

¹²
~~13.~~ (Original) A moveable and demountable wall panel system according to claim 1, wherein the wall panel system further comprises a base cover.

¹³
~~14.~~ (Original) A moveable and demountable wall panel system according to claim ~~13~~ ¹³, wherein the base cover comprises a base cover insert for mounting the base cover onto the floor channel of the panel.

¹⁴
~~15.~~ (Original) A moveable and demountable wall panel system according to claim 1, wherein at least two connecting studs are respectively and securely affixed at opposite ends of each of the top and bottom distance channels.

¹⁵
~~16.~~ (Original) A moveable and demountable wall panel system according to claim 1, wherein each distance channel and each vertical post comprise at least one interseptum, and wherein accessories of the panel system are removably mounted onto said interseptum.

cmf.
a1
¹⁶
~~17.~~ (Original) A moveable and demountable wall panel system according to claim 1, wherein each panel is stackable onto another panel by means of stackable flyovers inserted and fastened into the receiving channels of the vertical posts of said stacked panels.

¹⁷
~~18.~~
¹⁶
~~17.~~ (Original) A moveable and demountable wall panel system according to claim ~~17~~, wherein the stackable flyovers comprise interference ribs.

¹⁸
~~19.~~ (Original) A moveable and demountable wall panel system according to claim 1, wherein the vertical posts comprise punched marks extending longitudinally along said vertical posts, said punched marks being used for hooking accessories onto said vertical posts of the panel system.

¹⁹
~~20.~~ (Original) A moveable and demountable wall panel system according to claim 1, wherein the system further comprises a door assembly.

REMARKS

Applicants have reviewed and considered the Office Action dated May 6th, 2003, and the references cited therein. Claims 1, 11 and 12 have been amended and claim 2 has been cancelled without prejudice.

In the Action, claims 4, 11, and 12 were rejected under 35 U.S.C. 112, for having insufficient antecedent basis for certain limitations in these claims. To overcome this rejection, the dependency of claims 11 and 12 has been modified so as to now depend on claim 10, and the rejection in regards to claim 4 no longer applies in view of the above-mentioned modifications made to claim 1.

Claims 1, 5, 9, and 13 were rejected as being unpatentable over GOODMAN et al. (U.S. 6,047,508) under 35 U.S.C. 103(a). Claim 1 has been amended so as to incorporate therein the subject matter of claim 2, which was indicated as being allowable. Claim 2 has been cancelled. Claims 1 and 3-20 are pending in the present application.

Furthermore, in order to comply with the duty to disclose, the Applicants wish to advise the Examiner that prior art has been cited during the prosecution of the corresponding PCT application. This prior art was cited in the International Search Report prepared by the European Patent Office and includes Canadian patent No. 2,002,674, as well as French patent No. 1,450,017 and French patent No. 1,526,637. A copy of the above-mentioned search report is enclosed herewith for the Examiner's convenience. Of course, an Information Disclosure Statement has been prepared and is also enclosed herewith, along with copies of the aforementioned documents.

Claims 2, 3, 6-8, 10 and 15-20 were objected to as being dependent upon a rejected base claim. Applicants thank the Examiner for the indication of allowable subject matter. Claim 1 has been amended to recite the subject matter of claim 2. It is respectfully submitted that amended independent claim 1 defines distinctively and in explicit terms the subject matter of the

invention and that the subject matter clearly distinguishes itself from the above-mentioned prior art. Furthermore, it is respectfully submitted that none of the references cited taken alone or in combination with each other, teach, illustrate, nor even suggest what the Applicant presents as being his invention as defined in amended independent claim 1.

Hence, in view of the above modifications and information, Applicants respectfully submit that amended independent claim 1 is new and inventive. Since claims 3-20 depend all directly or indirectly on independent claim 1, and since claims 3-20 define distinctively the subject matter that Applicants regard as their invention, it is believed that these claims are also new and non-obvious, and thus allowable. The Examiner is therefore respectfully requested to withdraw his rejection.

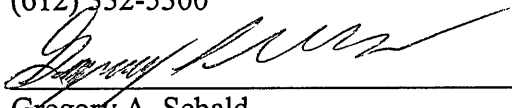

It is to be understood though that no admission is made nor implied by the present amendment as to the fact that the prior art cited might be relevant. Indeed, this amendment is made solely to expedite the prosecution of the present application.

In view of the above, it is respectfully submitted that the present application is in a condition for allowance, reconsideration of the present application and a favourable response are respectfully requested. If the Examiner believes a telephone conference would advance the prosecution of this application, the Examiner is invited to telephone the undersigned at the below-listed telephone number.

Respectfully submitted,

MERCHANT & GOULD P.C.
P.O. Box 2903

(612) 332-5300

Date: 8/6/03

Gregory A. Sebald
Reg. No. 33,280
GAS:PSTklg

reference has been thoroughly reviewed or that any relevance of any portion of a reference is intended.

Consideration of the items listed is respectfully requested. Pursuant to the provisions of M.P.E.P. 609, it is requested that the Examiner return a copy of the attached Form 1449, marked as being considered and initialed by the Examiner, to the undersigned with the next official communication.

Please charge any additional fees or credit any overpayment to Deposit Account No. 13-2725.

Respectfully submitted,

Notice of Allowability

Application No.	Applicant(s)	
10/027,872	VON HOYNINGEN HUENE ET AL.	
Examiner	Art Unit	
Kevin McDermott	3635	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address--

All claims being allowable, PROSECUTION ON THE MERITS IS (OR REMAINS) CLOSED in this application. If not included herewith (or previously mailed), a Notice of Allowance (PTOL-85) or other appropriate communication will be mailed in due course. **THIS NOTICE OF ALLOWABILITY IS NOT A GRANT OF PATENT RIGHTS.** This application is subject to withdrawal from issue at the initiative of the Office or upon petition by the applicant. See 37 CFR 1.313 and MPEP 1308.

1. This communication is responsive to Applicant's amendment filed 8/11/03.
2. The allowed claim(s) is/are 1 and 3-20.
3. The drawings filed on 21 December 2001 are accepted by the Examiner.
4. Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
 - a) All b) Some* c) None of the:
 1. Certified copies of the priority documents have been received.
 2. Certified copies of the priority documents have been received in Application No. _____.
 3. Copies of the certified copies of the priority documents have been received in this national stage application from the International Bureau (PCT Rule 17.2(a)).
- * Certified copies not received: _____.
5. Acknowledgment is made of a claim for domestic priority under 35 U.S.C. § 119(e) (to a provisional application).
 - (a) The translation of the foreign language provisional application has been received.
6. Acknowledgment is made of a claim for domestic priority under 35 U.S.C. §§ 120 and/or 121.

Applicant has THREE MONTHS FROM THE "MAILING DATE" of this communication to file a reply complying with the requirements noted below. Failure to timely comply will result in ABANDONMENT of this application. **THIS THREE-MONTH PERIOD IS NOT EXTENDABLE.**

7. A SUBSTITUTE OATH OR DECLARATION must be submitted. Note the attached EXAMINER'S AMENDMENT or NOTICE OF INFORMAL PATENT APPLICATION (PTO-152) which gives reason(s) why the oath or declaration is deficient.
8. CORRECTED DRAWINGS must be submitted.
 - (a) including changes required by the Notice of Draftsperson's Patent Drawing Review (PTO-948) attached
 - 1) hereto or 2) to Paper No. _____.
 - (b) including changes required by the proposed drawing correction filed _____, which has been approved by the Examiner.
 - (c) including changes required by the attached Examiner's Amendment / Comment or in the Office action of Paper No. _____.

Identifying indicia such as the application number (see 37 CFR 1.84(c)) should be written on the drawings in the front (not the back) of each sheet.

9. DEPOSIT OF and/or INFORMATION about the deposit of BIOLOGICAL MATERIAL must be submitted. Note the attached Examiner's comment regarding REQUIREMENT FOR THE DEPOSIT OF BIOLOGICAL MATERIAL.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Gregory A. Sebalb on September 5, 2003.

The application has been amended as follows:

- a. In the Abstract, line 2. Cancel "used for defining an office space. Each panel has" and replace with --each having--.
- b. In the Abstract, line 4. Cancel "The top and bottom distance".
- c. In the Abstract, cancel lines 5 and 6.
- d. In the Abstract, line 7. Cancel "parallel to a vertical axis of the panel."
- d-1. In the Abstract, line 8. Cancel "means of".
- e. In the Abstract, line 9. Cancel "The panel covering is removably".
- f. In the Abstract, cancel lines 10-12.
- g. In the Abstract, line 13. Cancel "ceiling surface."
- g-1. In the Abstract, line 14. Cancel "means of".
- h. In the Abstract, line 17. Cancel "The glide assemblies".
- i. In the Abstract, cancel lines 18 and 19.
- j. In the Abstract, line 20. Cancel "panel."
- k. In the Abstract, line 21. Cancel "Each receiving lip is".

Application/Control Number: 10/027,872
Art Unit: 3635

Page 3

I. In the Abstract, cancel lines 22-26.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Kevin McDermott, whose telephone number is 703-308-8266.

Carl D. Friedman
Supervisory Patent Examiner
Group 3600

KM 9/5/03

**Attachment for PTO-948 (Rev. 03/01, or earlier)
6/18/01**

The below text replaces the pre-printed text under the heading, "Information on How to Effect Drawing Changes," on the back of the PTO-948 (Rev. 03/01, or earlier) form.

INFORMATION ON HOW TO EFFECT DRAWING CHANGES

1. Correction of Informalities -- 37 CFR 1.85

New corrected drawings must be filed with the changes incorporated therein. Identifying indicia, if provided, should include the title of the invention, inventor's name, and application number, or docket number (if any) if an application number has not been assigned to the application. If this information is provided, it must be placed on the front of each sheet and centered within the top margin. If corrected drawings are required in a Notice of Allowability (PTOL-37), the new drawings **MUST** be filed within the **THREE MONTH** shortened statutory period set for reply in the Notice of Allowability. Extensions of time may **NOT** be obtained under the provisions of 37 CFR 1.136(a) or (b) for filing the corrected drawings after the mailing of a Notice of Allowability. The drawings should be filed as a separate paper with a transmittal letter addressed to the Official Draftsperson.

2. Corrections other than Informalities Noted by Draftsperson on form PTO-948.

All changes to the drawings, other than informalities noted by the Draftsperson, **MUST** be made in the same manner as above except that, normally, a highlighted (preferably red ink) sketch of the changes to be incorporated into the new drawings **MUST** be approved by the examiner before the application will be allowed. No changes will be permitted to be made, other than correction of informalities, unless the examiner has approved the proposed changes.

Timing of Corrections

Applicant is required to submit the drawing corrections within the time period set in the attached Office communication. See 37 CFR 1.85(a)

Failure to take corrective action within the set period will result in **ABANDONMENT** of the application.

MINNEAPOLIS, MN 55402-0903

EXAMINER

MCDERMOTT, KEVIN

ART UNIT CLASS-SUBCLASS

3635 052-238100

DATE MAILED: 09/09/2003

Table with 5 columns: APPLICATION NO., FILING DATE, FIRST NAMED INVENTOR, ATTORNEY DOCKET NO., CONFIRMATION NO.

TITLE OF INVENTION: MOVEABLE AND DEMOUNTABLE WALL PANEL SYSTEM

Table with 6 columns: APPLN. TYPE, SMALL ENTITY, ISSUE FEE, PUBLICATION FEE, TOTAL FEE(S) DUE, DATE DUE

THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. PROSECUTION ON THE MERITS IS CLOSED. THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. THIS STATUTORY PERIOD CANNOT BE EXTENDED. SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE REFLECTS A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE APPLIED IN THIS APPLICATION. THE PTOL-85B (OR AN EQUIVALENT) MUST BE RETURNED WITHIN THIS PERIOD EVEN IF NO FEE IS DUE OR THE APPLICATION WILL BE REGARDED AS ABANDONED.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status is changed, pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above and notify the United States Patent and Trademark Office of the change in status, or

If the SMALL ENTITY is shown as NO:

A. Pay TOTAL FEE(S) DUE shown above, or

B. If applicant claimed SMALL ENTITY status before, or is now claiming SMALL ENTITY status, check the box below and enclose the PUBLICATION FEE and 1/2 the ISSUE FEE shown above.

[] Applicant claims SMALL ENTITY status. See 37 CFR 1.27.

II. PART B - FEE(S) TRANSMITTAL should be completed and returned to the United States Patent and Trademark Office (USPTO) with your ISSUE FEE and PUBLICATION FEE (if required). Even if the fee(s) have already been paid, Part B - Fee(s) Transmittal should be completed and returned. If you are charging the fee(s) to your deposit account, section "4b" of Part B - Fee(s) Transmittal should be completed and an extra copy of the form should be submitted.

III. All communications regarding this application must give the application number. Please direct all communications prior to issuance to Mail Stop ISSUE FEE unless advised to the contrary.

IMPORTANT REMINDER: Utility patents issuing on applications filed on or after Dec. 12, 1980 may require payment of maintenance fees. It is patentee's responsibility to ensure timely payment of maintenance fees when due.

PART B - FEE(S) TRANSMITTAL

**Complete and send this form, together with applicable fee(s), to: Mail Mail Stop ISSUE FEE
 Commissioner for Patents
 Alexandria, Virginia 22313-1450
 or Fax (703) 746-4000**

INSTRUCTIONS: This form should be used for transmitting the ISSUE FEE and PUBLICATION FEE (if required). Blocks 1 through 4 should be completed where appropriate. All further correspondence including the Patent, advance orders and notification of maintenance fees will be mailed to the current correspondence address as indicated unless corrected below or directed otherwise in Block 1, by (a) specifying a new correspondence address; and/or (b) indicating a separate "FEE ADDRESS" for maintenance fee notifications.

CURRENT CORRESPONDENCE ADDRESS (Note: Legibly mark-up with any corrections or use Block 1)
 23552 7590 09/09/2003

**MERCHANT & GOULD PC
 P.O. BOX 2903
 MINNEAPOLIS, MN 55402-0903**

Note: A certificate of mailing can only be used for domestic mailings of the Fee(s) Transmittal. This certificate cannot be used for any other accompanying papers. Each additional paper, such as an assignment or formal drawing, must have its own certificate of mailing or transmission.

Certificate of Mailing or Transmission

I hereby certify that this Fee(s) Transmittal is being deposited with the United States Postal Service with sufficient postage for first class mail in an envelope addressed to the Mail Stop ISSUE FEE address above, or being facsimile transmitted to the USPTO, on the date indicated below.

Director for Patents is requested to apply the Issue Fee and Publication Fee (if any) or to re-apply any previously paid issue fee to the application identified above.

(Authorized Signature) _____ (Date) _____

NOTE: The Issue Fee and Publication Fee (if required) will not be accepted from anyone other than the applicant; a registered attorney or agent; or the assignee or other party in interest as shown by the records of the United States Patent and Trademark Office.

This collection of information is required by 37 CFR 1.311. The information is required to obtain or retain a benefit by the public which is to file (and by the USPTO to process) an application. Confidentiality is governed by 35 U.S.C. 122 and 37 CFR 1.14. This collection is estimated to take 12 minutes to complete, including gathering, preparing, and submitting the completed application form to the USPTO. Time will vary depending upon the individual case. Any comments on the amount of time you require to complete this form and/or suggestions for reducing this burden, should be sent to the Chief Information Officer, U.S. Patent and Trademark Office, U.S. Department of Commerce, Alexandria, Virginia 22313-1450. **DO NOT SEND FEES OR COMPLETED FORMS TO THIS ADDRESS. SEND TO: Commissioner for Patents, Alexandria, Virginia 22313-1450.**

Under the Paperwork Reduction Act of 1995, no persons are required to respond to a collection of information unless it displays a valid OMB control number.

Determination of Patent Term Adjustment under 35 U.S.C. 154 (b)
(application filed on or after May 29, 2000)

The Patent Term Adjustment to date is 33 day(s). If the issue fee is paid on the date that is three months after the mailing date of this notice and the patent issues on the Tuesday before the date that is 28 weeks (six and a half months) after the mailing date of this notice, the Patent Term Adjustment will be 33 day(s).

If a Continued Prosecution Application (CPA) was filed in the above-identified application, the filing date that determines Patent Term Adjustment is the filing date of the most recent CPA.

Applicant will be able to obtain more detailed information by accessing the Patent Application Information Retrieval (PAIR) system (<http://pair.uspto.gov>).

Any questions regarding the Patent Term Extension or Adjustment determination should be directed to the Office of Patent Legal Administration at (703) 305-1383. Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

EXAMINER
MCDERMOTT, KEVIN
ART UNIT
PAPER NUMBER
3635
DATE MAILED: 09/09/2003

Notice of Fee Increase on October 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after October 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on October 1, 2003. See Revision of Patent Fees for Fiscal Year 2004; Final Rule, 68 Fed. Reg. 41532, 41533, 41534 (July 14, 2003).

The current fee schedule is accessible from (http://www.uspto.gov/main/howtofees.htm).

If the fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due" but not the correct amount in view of the fee increase, a "Notice of Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice of Pay Balance of Issue Fee," if the response to the Notice of Allowance is to be filed on or after October 1, 2003 (or mailed with a certificate of mailing on or after October 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously-paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Effective October 1, 2003, 37 CFR 1.18 is amended by revising paragraphs (a) through (c) to read as set forth below.

Section 1.18 Patent post allowance (including issue) fees.

- (a) Issue fee for issuing each original or reissue patent, except a design or plant patent:
By a small entity (Sec. 1.27(a))..... \$665.00
By other than a small entity..... \$1,330.00
(b) Issue fee for issuing a design patent:
By a small entity (Sec. 1.27(a))..... \$240.00
By other than a small entity..... \$480.00
(c) Issue fee for issuing a plant patent:
By a small entity (Sec. 1.27(a))..... \$320.00
By other than a small entity..... \$640.00

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

EXAMINER INTERVIEW SUMMARY

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

RECEIVED
SEP 12 2003
GROUP 3600

Dear Sir:

Applicants' Representative, Gregory A. Sebald, spoke with Examiner McDermott via telephone on September 4 and September 5, 2003. It was discussed that the Application would be in condition for allowance but that the Abstract was too lengthy and correction is needed. Proposed changes were discussed to shorten the Abstract and it was agreed that those changes would be made by Examiner's Amendment. No other issues were discussed. It was agreed that the Application would be in condition for allowance following the Examiner's Amendment. Applicants' Representative thanks the Examiner for the cooperation and courtesy extended during the interview.

If a telephone interview would be helpful in this matter, please contact Applicants' Representative at 612-336-4728.

Respectfully submitted,

MERCHANT & GOULD P.C.
