

UNITED STATES PATENT AND TRADEMARK OFFICE

BEFORE THE PATENT TRIAL AND APPEAL BOARD

T-Mobile US, Inc., T-Mobile USA, Inc., TeleCommunication Systems, Inc.,
Ericsson Inc., and Telefonaktiebolaget LM Ericsson
Petitioners,

v.

TracBeam, LLC,
Patent Owner.

U.S. Patent No. 7,525,484

Title: GATEWAY AND HYBRID SOLUTIONS FOR WIRELESS LOCATION

DECLARATION OF DR. WILLIAM R. MICHALSON

TABLE OF CONTENTS

	Page
I. INTRODUCTION	1
A. Compensation and Prior Testimony	1
B. Background and Qualifications	2
C. Materials Considered.....	8
II. LEGAL STANDARDS	9
III. THE ‘484 PATENT	11
A. Overview	11
B. Location Center of the Hybrid Location System	15
1. Signal processing subsystem.....	17
2. Location Hypothesizing Models (FOMs)	18
3. Hypotheses Evaluator	19
4. Output Gateway	20
IV. PROSECUTION HISTORY OF THE ‘484 PATENT.....	20
V. LEVEL OF ORDINARY SKILL IN THE ART	21
VI. CLAIM CONSTRUCTION	21
A. “mobile station,” “location technique(s)” (and related terms), “location estimating sources” (and related terms), “location determining sources” (and related terms), “geographical extent,” and “output criteria”	22
B. “location information” and related terms.....	23
C. order of claim elements	24
D. “obtained via/from transmissions”	27
E. “gating module” and “communications controller”	29
VII. STATE OF THE ART / TECHNOLOGY OVERVIEW	31
A. Early applications of wireless location technologies	31
B. Hybrid wireless location approaches	32
C. Fundamental location technologies.....	34
1. Coverage Area.....	34

2.	Trilateration (time of arrival and signal strength).....	35
3.	Time Difference of Arrival (TDOA)	38
4.	Satellite-Based Location Technologies	40
VIII.	PRIOR ART.....	43
A.	<i>Kauser</i>	43
B.	<i>Loomis</i>	45
C.	<i>Wortham</i>	45
IX.	KAUSER COMBINATIONS.....	47
A.	Overview	47
B.	Satellite / Non-Terrestrial GPS Technique	49
1.	Satellite (non-terrestrial) technique	49
2.	Satellite location information.....	50
3.	Satellite signal measurements that are obtained by terrestrial transmissions (or “mobile-assisted GPS”).....	51
4.	Differential GPS.....	53
C.	Terrestrial Geometric Technique	56
1.	Terrestrial communication stations at fixed locations	57
2.	Terrestrial location technique	57
3.	Wireless signal measurements	58
D.	Terrestrial Coverage Area Technique	59
E.	Resulting Location Determination	60
1.	Determining resulting location information	60
2.	Likelihood indication	63
F.	Output of the Resulting Location Information.....	64
G.	Order of Location Techniques.....	65
H.	Other features	69
1.	Messages for Requesting Activation of One or More Mobile Station Location Estimators.....	69
2.	Geographic Extent.....	71
3.	Gating module and communications controller.....	72

4.	GPS and geometric techniques provide different, independent location estimates	75
5.	Requests for locations	78
6.	Mobile Phone Transmissions	79
I.	Global Reasons to Modify and/or Combine	80
X.	<i>LOOMIS</i> COMBINATIONS	83
A.	Overview	83
B.	Two-Way Wireless Communication and Location Functionality	85
C.	Satellite / Non-Terrestrial GPS Technique	89
1.	Satellite (non-terrestrial) technique	89
2.	Satellite signal time delay measurements	89
3.	Satellite location information.....	91
D.	Terrestrial Radio Technique.....	92
1.	Terrestrial communication stations at fixed locations	92
2.	Terrestrial location technique	92
3.	Wireless signal measurements	93
4.	Signal time delay measurements.....	94
E.	Resulting Location Determination	97
1.	Determining resulting location information	97
2.	Likelihood indication	99
F.	Output of the Resulting Location Information.....	101
G.	Order of Location Techniques.....	101
H.	Other features	106
1.	Storing Data in Memory	106
2.	Location Information Determined According to Information Indicative of a Manner in Which an Application Prefers the Requested Location Information	106
3.	Geographic Extent.....	107
4.	Plurality of Mobile Stations	109
5.	A Plurality of Requests for Information	111
6.	Different techniques that generate different estimates	112

7.	Application requests and preferences	113
8.	Common standardized format & Common data representation	115
9.	Tracking a Mobile Wireless Device	117
I.	Global Reasons to Modify and/or Combine	119

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
