When ordering this title, use ISBN 0-07-113584-7.

of thorium which has mass number 228. Symbolized RdTh. [ 'rād·ē·ō'thor·ē·əm ]

radio time signal [COMMUN] A time signal sent by radio

broadcast. ( 'rād·ē-ō 'tīm sig·nəl )
radio tower [COMMUN] A tower, usually several hundred meters tall, either guyed or freestanding, on which a transmitting antenna is mounted to increase the range of radio transmission; in some cases, the tower itself may be the antenna. { 'rād·ē·ō

radiotracer See radioactive tracer. ( 'rād·ē·ō'trā·sər )

radio tracking [ENG] The process of keeping a radio or radar beam set on a target and determining the range of the target

continuously. ['rād·ē·ō 'trak·iŋ] radio transmission [COMMUN] The transmission of signals through space at radio frequencies by means of radiated electro-

magnetic waves. [ 'rād'e'ō tranz'mish'ən ]
radio transmitter [ELECTR] The equipment used for generating and amplifying a radio-frequency carrier signal, modulating the carrier signal with intelligence, and feeding the modulated carrier to an antenna for radiation into space as electromagnetic waves. Also known as radio set; transmitter. { 'rād·ē·ō 'tranz,mid·ər }

radio transponder [ELECTR] A transponder which receives and transmits radio waves, in contrast to a sonar transponder, which receives and transmits acoustic waves. { rād·ē·ō tran'spän·dər ]

radio tube See electron tube. ( 'rād·ē·ō ,tüb )

radio watch See watch. [ 'rad-e-o ,wach ] radio wave [ELECTROMAG] An electromagnetic wave produced by reversal of current in a conductor at a frequency in the range from about 10 kilohertz to about 300,000 megahertz. { 'rād·ē·ō ,wāv }

radio wavefront distortion [ELECTROMAG] Change in the direction of advance of a radio wave. [ 'rad-e-o 'wav,front

radio-wave propagation [ELECTROMAG] The transfer of energy through space by electromagnetic radiation at radio frequencies. [ 'rād-ē-ō 'wāv ,prāp-ə,gā-shən ]

radio window [GEOPHYS] A band of frequencies extending from about 6 to 30,000 megahertz, in which radiation from the outer universe can enter and travel through the atmosphere of the earth. { 'rād·ē·ö ,win·dō }

radish [BOT] Raphanus sativus. 1. An annual or biennial crucifer belonging to the order Capparales. 2. The edible, thickened hypocotyl of the plant. ( 'rad-ish )

radist [NAV] Radio-navigation system in which the comparison of arrival times of transmitted pulses, at three or more ground stations, indicates the position of the vehicle. 'rä,dist ]

radium [CHEM] 1. A radioactive member of group II, symbol Ra, atomic number 88; the most abundant naturally occurring isotope has mass number 226 and a half-life of 1620 years. 2. A highly toxic solid that forms water-soluble compounds; decays by emission of α, β, and γ-radiation; melts at 700°C, boils at 1140°C; turns black in air; used in medicine, in industrial radiography, and as a source of neutrons and radon. [ 'rad-e-

radium age [NUCLEO] The age of a mineral as calculated from the numbers of radium atoms present originally, now, and when equilibrium is established with ionium. [ 'rad-e-om ,aj ] radium bromide [INORG CHEM] RaBr<sub>2</sub> Water-soluble, poisonous, radioactive white powder, corrosive to skin or flesh; melts at 728°C; used in medicine, physical research, and luminous paint. [ 'rād·ē·əm 'bro,mīd ]

radium carbonate [INORG CHEM] RaCO3 Water-insoluble, poisonous, radioactive, white powder; used in medicine. [ 'rādē am 'kār ba nāt l

radium cell [NUCLEO] A sealed thin-wall tube containing radium. { 'rād·ē·əm ,sel }

radium chloride [INORG CHEM] RaCl2 Water- and alcoholsoluble, poisonous, radioactive, yellow-white crystals; corrosive effect on skin and flesh; melts at 1000°C; used in medicine, physical research, and luminous paint. { 'rād·ē·əm 'klòr,īd }

radium F See polonium-210. [ 'rād-ē-əm 'ef ] radium needle [NUCLEO] A radium cell in the form of a needle, usually of platinum-iridium or gold alloy, designed primarily for insertion in tissue. [ 'rād-ē-əm ,nēd-əl ]

radium plaque [NUCLEO] A radium container in which the radium is distributed over a surface; the shielding is usually

small in one direction so as to permit transmission of β-tays as

well as y-rays. [ Table on plant ]
radium sulfate [INORG CHEM] RaSO<sub>4</sub> Water-insoluble, tadioactive, poisonous, white crystals; used in medicine. [ Table of the content of the content

radium therapy [MED] Radiotherapy using the radiation

from radium. Trace on the two bones of the human or of the corresponding part in vertebrates of the corresponding part forearm or of the corresponding part in vertebrates other than to the corresponding part in vertebrates other than to the content of the cont forearm or of the content of the segment joining the center and a point fish. [MATH] 1. A line segment joining the center and a point of such a line. fish. [MATH] 1.72 The length of such a line segment

{ 'rād·e-əs }
radius cutter [MECH ENG] A formed milling cutter with tech ground to produce a radius on the workpiece. [ 'rade-3, kod

radius of action [ENG] The maximum distance a ship-tin craft, or other vehicle can travel away from its base along given course with normal load and return without refueling but including the fuel required to perform those maneuvers made necessary by all safety and operating factors. | 'rade's or a

snon j radius of convergence [MATH] The positive real number corresponding to a power series expansion about some number a with the property that if x - a has absolute value less than this number the power series converges at x, and if  $x^2 = a$  has absolute value greater than this number the power series of verges at x. { 'rād·ē·əs əv kən'vər·jəns }

radius of curvature [MATH] The radius of the circle of curvature at a point accurve. ( 'rādē'əs əv 'kərvəchər' radius of damage [ORD] The distance from ground zeroota nuclear blast at which there is a 0.50 probability of achieving the desired damage. { 'rād·ē·əs əv 'dam·ij }

radius of geodesic curvature [MATH] For a point on a curve lying on a surface, the reciprocal of the geodesic curvature at the point. ( 'rād·ē·əs əv jē·əˈdes·ik 'kər·və·chər ) radius of geodesic torsion [MATH] The reciprocal of the

geodesic torsion of a surface at a point in a given direction. 'rād·ē·əs əv jē·ə des·ik 'tor·shən }

radius of gyration [MATH] The square root of the ratio of the moment of inertia of a plane figure about a given axis to its area [MECH] The square root of the ratio of the moment of inertia of a body about a given axis to its mass. | 'rāde as av ji'm

radius of normal curvature [MATH] The reciprocal of the normal curvature of a surface at a point and in a given direction [ ˈrād·ē·əs əv ˈnór·məl ˈkər·və·chər ]

radius of protection [ENG] The radius of the circle within which a lightning discharge will not strike, due to the presence of an elevated lightning rod at the center. [ 'rad + 35 2V pro tec-

radius of rupture [ORD] Greatest distance from the center of an underground explosive charge at which the explosion will be destructive. { 'rād·ē·əs əv 'rəp·chər }

radius of safety [ORD] The horizontal distance from groun area beyond which the weapon effects on friendly groups at acceptable. ( 'rād-ē-əs əv 'sāf-tē )

radius of torsion [MATH] The reciprocal of the torsion of space curve at a point. [ rade as av 'torshon ] radius of total curvature [MATH] The quantity of the space curve at a point. where C is the total curvature of a surface at a point, it rate

radius of visibility [NAV] The radius of a circle limiting to area in which an objective can be seen under specified cood

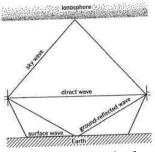

radius ratio [PHYS CHEM] The ratio of the radius of a care to the radius of an ion; relative ionic radii are pertinent to cry lattice structure, particularly the determination of coordinato

radius rod [ENG] A rod which restricts movement of 4 ps

radius vector [ASTRON] A line joining the center of an orbing body with the forms of the principle of the pr ing body with the focus of its orbit located near its primal [MATH] The coordinate r in a polar coordinate system, where gives the distance of a real r in a polar coordinate r in a polar coordi gives the distance of a point from the origin. [ 'rade as we tar ]

radix See base of a number system; root. [ 'rādiks'] radix approximation [MATH] The approximation of a number by a number that can be a specified flow ber by a number that can be expressed by a specified find

## RADIO-WAVE PROPAGATION

Possible transmission paths of electromagnetic radiation at radio frequencies.
