### [57] ABSTRACT

A system and method for generating a report for a user which allows the user to make decisions, without requiring the user to understand or interpret data itself. An application within the system includes a graphical user interface (GUI) which allows the user to select and specify the parameters for the report, display the report, print the report, and save the report. A folder management subsystem allows the user to create a folder object for storing the report within the database, store the report within the folder object, and retrieve the report from the folder object using the GUI. A business information setup subsystem allows the user to create data types and create and constrain relationships between the data types. An analyst definition subsystem allows the user to select an analyst representing a method of analysis to use in generating the report using the GUI. Finally, a viewer module displays the report.

# Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

## Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

## Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

## Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

## API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

## LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

## FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

## E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
