- 1 thank the committee for the opportunity to address
- 2 you on this issue. My name is Bob Cloud, and I
- 3 would like to briefly talk to you, first about my
- 4 own long, personal use of Xyrem, and I will call it
- 5 Xyrem not GHB or sodium oxybate and, secondly, my
- 6 very serious concerns as director of Narcolepsy
- 7 Network, which is a national non-profit, primarily
- 8 patient organization. In that capacity we have
- 9 received funds, a minor amount of funds, perhaps
- 10 ten percent of our revenues, from Orphan Medical
- 11 over the last several years.
- 12 First, my personal experience with Xyrem
- 13 as a narcolepsy patient with cataplexy. I am 57
- 14 years old, married, have two adult children, and I
- 15 am an attorney in private practice, primarily
- 16 family, probate and criminal law which sometimes
- 17 can be intense and have a few emotions attached to
- 18 it.
- 19 I believe I am the first American to have
- 20 used Xyrem for narcolepsy, and I am probably the
- 21 longest continuing user of Xyrem which now
- 22 approaches 19 years every night without fail. My
- 23 narcolepsy/cataplexy symptoms began in the mid-30's
- 24 and by age 39 included severe and recurring
- 25 cataplexy together with excessive daytime

- 1 sleepiness and sudden sleep attacks. My cataplexy
- 2 caused numerous daily episodes of complete body
- 3 collapse, such that I couldn't leave my office or
- 4 home without risk of harm to myself or others.
- 5 Feeling any emotion, humor, anger or mere
- 6 enthusiasm, would result in sudden immediate
- 7 collapse. I guess we are all ignorant of what
- 8 diseases feel like that we don't have them, but my
- 9 best description of the sudden collapse of
- 10 cataplexy would be to imagine a puppet on strings
- 11 and suddenly the strings, which are your muscle
- 12 tone, are immediately let go and so you fall to the
- 13 ground immediately, and your head comes down last
- 14 and whips against whatever -- sidewalk or table
- 15 corner or escalator or whatever might be there. I
- 16 have been rescued by police and emergency squads
- 17 and life guards and well-meaning strangers and
- 18 friends.
- 19 Obviously no injury for me has been fatal
- 20 because I am here, but unfortunately I do know
- 21 others whose fall has occurred at the top of the
- 22 stairs and they fell down backwards and killed
- 23 themselves, and there are others that I don't know
- 24 about.
- 25 In 1982 my treating physician sent me to

- 1 Sunnybrook Medical Center in Toronto, Canada to
- 2 begin prescriptive use of Xyrem under the research
- 3 being conducted by Dr. Mortimer Mamelak. After
- 4 three weeks I returned home and continued using
- 5 Xyrem, always prescribed by my local physician
- 6 under his own individual investigational new drug
- 7 application. My severe cataplexy symptoms
- 8 disappeared almost overnight. I was immediately
- 9 able to return to my full-time law practice and I
- 10 have continued to this day to use Xyrem under that
- 11 individual application and subsequently in the
- 12 clinical trials under the Orphan Medical
- 13 application. During these 19 years, I have never
- 14 changed the dose. I have never experienced
- 15 tolerance. I have never noted side effects.
- 16 Simply stated, the drug is as safe and effective as
- 17 it was on day one. It is hard to imagine a
- 18 pharmaceutical product having such a quick,
- 19 complete, safe and enduring benefit.
- 20 As director of Narcolepsy Network, I have
- 21 said on a number of occasions that I think the
- 22 greatest tragedy in the treatment of people with
- 23 narcolepsy is that Xyrem or GHB has not been
- 24 available so that other patients could benefit from
- 25 it as I have. Hopefully, this committee will

- 1 remedy that.
- We are sensitive to the reports of
- 3 injuries and deaths and other victimizations from
- 4 the abuse of GHB and, as an organization, we work
- 5 with law enforcement and community drug agencies to
- 6 partake in their activities to limit that and
- 7 correct that. I think it is obvious that Orphan
- 8 Medical is going above and beyond the call of duty
- 9 to also contribute to restricting the unlawful use
- 10 of GHB.
- In closing, I submit that our concern for
- 12 patients with narcolepsy should receive your
- 13 highest considerations so that people can
- 14 rediscover their economic and particularly their
- 15 family lives and avoid disability. Thank you.
- DR. KAWAS: Thank you, Mr. Cloud. The
- 17 next speaker is Cindy Pekarick from Pennsylvania.
- 18 MS. PEKARICK: Hi. My name is Cindy
- 19 Pekarick, and T am here today to tell you how GHB
- 20 killed my daughter. In October of 1998, my
- 21 daughter Nicole, a college student and gym
- 22 enthusiast met a new boyfriend who introduced her
- 23 to a product called Renewtrient. In November she
- 24 researched the product over the Internet and
- 25 received only positive information. She could take

- it before bedtime and wake up in only four hours
- 2 feeling refreshed, well-rested, and all her muscles
- 3 would be completely recovered and ready for another
- 4 workout.
- 5 In December I found out she was taking
- 6 this supplement. I didn't believe the promises
- 7 made by the advertisers. Arguments ensued and she
- 8 promised she wouldn't drink it anymore. She was
- 9 away at school from mid-January until April.
- In April she returned home. She was
- 11 behind in all her bills. She was black and blue on
- 12 her arms and legs. She stopped attending classes,
- 13 and she kept losing things. In May T discovered
- 14 she had essentially dropped out of school.
- In June I could see mild changes in her
- 16 behavior. She began taking power maps, as she
- 17 called them. She would sleep three hours in the
- 18 middle of the day and get up at four o'clock and go
- 19 to work. She continued losing things and having
- 20 difficulty paying her bills. I searched her room
- 21 and car but found no evidence of substance abuse.
- 22 By July, my younger daughter, Noelle,
- 23 informed me that Nicole was having problems. She
- 24 said, "mom, she isn't taking anything bad or
- 25 illegal. She takes a muscle supplement that

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time** alerts and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
