

transmitter containing instructions to program the stored number comprise one or more short message service (SMS) data messages;

and wherein the programmable communicator device is configured to process data received through the programmable interface from the at least one monitored technical device in response to programming instructions received in at least one incoming short message service (SMS) data message or packet switched data message.

33 (Previously Presented) A programmable communicator device according to claim 32 wherein the processing module processes received data to determine whether it indicates a change in status of the at least one monitored technical device that crosses a threshold parameter, or that otherwise indicates an alarm condition.

REMARKS

Applicants would like to thank the examiner for the review of the present application and prior art. Applicants request reconsideration of the pending claims in view of the following remarks. Applicants have amended claims 1, 4, 27 and 32 herewith, and previously cancelled claims 5, 16, and 18. Accordingly, claims 1-4, 6-15, 17, and 19-33 are currently under consideration in this application. No new matter has been added.

Interview Summary

Applicants would also like to thank the examiner for the telephone interview of November 19, 2013. During the interview, Examiner Nguyen and Applicants' counsel discussed some proposed amendments to the claims filed within the Supplemental Amendment dated November 8, 2013. For example, Applicants' counsel proposed amending claim 1, 27 and 32 to remove the limitation "a wireless communications circuit for communicating through an antenna over a communications network." Examiner Nguyen indicated that the proposed amended claims (e.g., without the wireless communication circuit) were acceptable and are in condition for allowance.

Amendments To the Claims

As mentioned above, Applicants have amended independent claims 1, 27 and 32 to remove the limitation "a wireless communications circuit for communicating through an antenna over a communications network." The remainder of the claim recites a patentably distinct device which processes wireless transmissions. In order to provide applicant with protection for the full scope of her invention, the unnecessary limitation has been removed.

Information Disclosure Statement

Applicants submit herewith a supplemental information disclosure statement. Please consider the reference cited therein prior to allowance of the present application.

It is believed that the application is in condition for allowance and Applicant respectfully requests that a notice of allowance be issued. Applicant does not believe any extension of time is required. However, if an extension of time is required, please charge the associated fee and any additional fees required by this paper or credit any overpayment to deposit account number 19-4972. Applicant also requests that the examiner contact applicant's attorney, Jonathan Lovely, if it will assist in processing this application through issuance.

DATE: November 20, 2013

Respectfully submitted,

/Jonathan C. Lovely, #60,821/

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
