Internet Archive
300 Funston Avenue
San Francisco, CA 94118

AFFIDAVIT OF CHRISTOPHER BUTLER

1. I am the Office Manager at the Internet Archive, located in San Francisco, California. I make this declaration of my own personal knowledge.

2. The Internet Archive is a website that provides access to a digital library of Internet sites and other cultural artifacts in digital form. Like a paper library, we provide free access to researchers, historians, scholars, and the general public. The Internet Archive has partnered with and receives support from various institutions, including the Library of Congress.

3. The Internet Archive has created a service known as the Wayback Machine. The Wayback Machine makes it possible to surf more than 400 billion pages stored in the Internet Archive's web archive. Visitors to the Wayback Machine can search archives by URL (i.e., a website address). If archived records for a URL are available, the visitor will be presented with a list of available dates. The visitor may select one of those dates, and then begin surfing on an archived version of the Web. The links on the archived files, when served by the Wayback Machine, point to other archived files (whether HTML pages or images). If a visitor clicks on a link on an archived page, the Wayback Machine will serve the archived file with the closest available date to the page upon which the link appeared and was clicked.

4. The archived data made viewable and browseable by the Wayback Machine is compiled using software programs known as crawlers, which surf the Web and automatically store copies of web files, preserving these files as they exist at the point of time of capture.

5. The Internet Archive assigns a URL on its site to the archived files in the format `http://web.archive.org/web/[Year in yyyy][Month in mm][Day in dd][Time code in hh:mm:ss]/[Archived URL]`. Thus, the Internet Archive URL `http://web.archive.org/web/19970126045828/http://www.archive.org/` would be the URL for the record of the Internet Archive home page HTML file (`http://www.archive.org/`) archived on January 26, 1997 at 4:58 a.m. and 28 seconds (1997/01/26 at 04:58:28). A web browser may be set such that a printout from it will display the URL of a web page in the printout's footer. The date assigned by the Internet Archive applies to the HTML file but not to image files linked therein. Thus images that appear on a page may not have been archived on the same date as the HTML file. Likewise, if a website is designed with "frames," the date assigned by the Internet Archive applies to the frameset as a whole, and not the individual pages within each frame.

6. Attached hereto as Exhibit A are true and accurate copies of printouts of the Internet Archive's records of the HTML files for the URLs and the dates specified in the footer of the printout.

7. I declare under penalty of perjury that the foregoing is true and correct.

DATE: 6/12/15

Christopher Butler

PPD To Hold Analyst Day On February 5, 2004 (01/15/04)

WILMINGTON, NC, January 15, 2004 -- PPD, Inc. (Nasdaq: PPDI) today confirmed that it will hold an analyst day for equity analysts and institutional investors on Thursday, February 5, 2004, at the Plaza Hotel in New York City from approximately 8:00 a.m. to 12:00 p.m. EST. Chief Executive Officer Dr. Fred Eshelman and other PPD senior management will deliver presentations regarding PPD's business strategies. Executives representing some of PPD's strategic partners will also be presenting their business as it relates to PPD.

To attend the presentations, register via the investors section of the PPD Web site, <http://www.ppdi.com>. Note that space is limited. The event will also be Webcast live, and all interested parties will be able to access the Webcast through the investors section of the PPD Web site. The Webcast will be archived shortly after the call for on-demand replay.

As a leading global provider of discovery and development services and products for pharmaceutical, biotechnology and medical device companies, PPD applies innovative technologies, therapeutic expertise and a commitment to quality to help clients maximize the return on their R&D investments. With proven early discovery through post-market resources, the company also offers unique compound partnering opportunities. PPD has more than 5,700 professionals in 26 countries around the world. For more information on PPD, visit our Web site at <http://www.ppdi.com>.

News and IR Presentations

The investor presentation materials and previously-recorded Webcasts included in this section are provided as a service to investors and other interested parties. They are archived for historical purposes only, and might have been superseded by more recent materials, Webcasts, SEC filings or other publicly available information. Whether superseded or not, PPD has undertaken no obligation to update, correct or otherwise modify any of the information contained in the presentation materials or Webcasts. Accordingly, you should not rely on the accuracy of any of the statements in the investor presentation materials or the Webcasts. Furthermore, the Webcasts may contain "forward-looking statements," which, at the time they were made, were based on then-current expectations of future events. If any of those underlying assumptions prove or have proven to be inaccurate, or if risks or uncertainties materialize or have materialized, actual results could vary, or already may have varied, materially from the expectations in the Webcasts. For disclosure of some of these assumptions, risks and uncertainties, please see our SEC filings, copies of which are available upon request from our [Investor Relations Department](#).

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
