TRANSMITTAL LETTER FOR
PROVISIONAL PATENT APPLICATION

Assistant Commissioner for Patents
Washington, D.C. 20231
Box: Provisional Patent Application

Sir:

Transmitted herewith is the above-noted Provisional patent application, including the following:

- 53 pages Specification, Abstract, and Appendices A, B and C
- 31 sheets of informal Drawings
- Verified Statement Claiming Small Entity Status
- Check in the amount of \$150.00

60135385 052199

The names and addresses of the inventors are:

D. David Nason, 821 Second Avenue, Suite 1600, Seattle, WA 98104
Thomas C. O'Rourke, 821 Second Avenue, Suite 1600, Seattle, WA 98104
Scott Campbell, 821 Second Avenue, Suite 1600, Seattle, WA 98104

FEE COMPUTATION

Basic Filing Fee \$ **150.00**
Less Small Entity Reduction..... - \$ **0.00**
TOTAL FILING FEE..... \$ 150.00

No additional fees are believed to be due. If an extension of time is required for this paper or later filed papers, please consider this a petition for the required extension of time. Please charge any required petition fees, and any other fees, except for payment of the issue fee, and charge any underpayment or credit any overpayment during the prosecution of this application to our deposit account No. 09-0946 for which purpose a duplicate of this paper is enclosed.

Respectfully submitted,

Paul Backofen
Registration No. 42,278

PARALLEL GRAPHICAL USER INTERFACE

Background of the Invention5 1. Field of the Invention

This invention relates to computer user interfaces and more specifically to a parallel graphical user interface for a digital computer.

10 2. Description of the Prior Art

15 The advent of the computer age saw users struggling with text based interfaces to manage and use a computer. The introduction of graphical user interfaces simplified computer use and prompted many people to buy and use computers. Generally, a computer has a single "primary" graphical user interface and all other programs run under it. As computer processor speed and complexity has increased it has become possible for computers and their displays to handle more and more tasks simultaneously as illustrated by the growth of multitasking applications.

20 There is no more reason for a computer user to be limited to a single graphical user interface for computer control and interaction.

25 What is needed is a parallel graphical user interface that may be used with conventional user interfaces to allow a computer user to exploit the capability of conventional displays and processors with a minimal impact on the functionality of the conventional user interfaces.

Summary of the Invention

In a first aspect, the present invention includes a parallel graphical user interface (GUI) modeled as a dial tuning metaphor. This provides an intuitive interface that
5 remains useable in spaces with high aspect ratios for convenient use in parallel with another more conventional GUI to increase the efficiency of a users computer experience.

In another aspect of the present invention, a GUI
10 according to the present invention may operate in display areas having aspect ratios of 3:1 or greater.

These and other features and advantages of this invention will become further apparent from the detailed description and accompanying figures that follow. In the
15 figures and description, numerals indicate the various features of the invention, like numerals referring to like features throughout both the drawings and the description.

Brief Description of the Drawings

Fig. 1 is a block diagram of a computer apparatus
20 according to the present invention.

Fig. 2 is a line drawing of a parallel GUI according to a first embodiment of the present invention.

Fig. 3 is a simplified example of a menu tree according to the present invention.

25 Fig. 4 is a line drawing of a parallel GUI with an accessory container or cartridge according to an embodiment of the present invention.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
