[54] **METHOD AND APPARATUS FOR AUTHENTICATING ON-LINE TRANSACTION DATA**

Attorney, Agent, or Firm—Hecker & Harriman

[57] **ABSTRACT**

[75] Inventor: **Michael A. Arent**, Albany, Calif.

The present invention comprises a method and apparatus for authenticating data related to on-line transactions. The invention utilizes a user-customized certification indicator that informs a user as to the success or failure of one or more authentication and/or security protocols implemented on a user communications access device such as a personal computer, a personal digital assistant ("PDA"), an enhanced function telephone, etc. In one or more embodiments, one of the components of the indicator is user defined, and locally stored, reducing the likelihood of interception and counterfeiting. In one or more embodiments, the indicator components include a centrally provided graphic element and a user defined text overlay. When a user initiates an electronic transaction, a background validation process is initiated that implements procedures for determining the authenticity of data related to the transaction, such as the identity of a transaction party. If the validation process determines that the data is authentic, the validation process displays a certification indicator comprising the graphic overlaid with the user defined text-string. In another embodiment, the certification indicator includes one or more multi-media components, such as, for example, an audio component.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
