Trademarks

A number of entered words which we have reason to believe constitute trademarks have been designated as such. However, no attempt has been made to designate as trademarks or service marks all terms or words in which proprietary rights might exist. The inclusion, exclusion, or definition of a words or term is not intended to affect, or to express a judgment on, the validity or legal status of the word or term as a trademark, service mark, or other proprietary term.

This book is available for special purchases in bulk by organizations and institutions, not for resale, at special discounts. Please direct your inquiries to the Random House Special Sales Department, toll-free 888-591-1200 or fax 212-572-4961.

Please address inquiries about electronic licensing of reference products, for use on a network or in software or on CD-ROM, to the Subsidiary Rights Department, Random House Reference & Information Publishing, fax 212-940-7370.

AppleTalk An inexpensive local-area network (LAN) architecture built into all Apple Macintosh computers and laser printers. AppleTalk supports Apple's *LocalTalk* cabling scheme, as well as Ethernet and IBM Token Ring. It can connect Macintosh computers and printers, and even PCs if they are equipped with special AppleTalk hardware and software.

⇒ See also LOCAL-AREA NETWORK; LOCALTALK; MACINTOSH COMPUTER; TOPOLOGY.

application A program or group of programs designed for end users. Software can be divided into two general classes: *systems software* and *applications software*. Systems software consists of low-level programs that interact with the computer at a very basic level. This includes operating systems, compilers, and utilities for managing computer resources.

In contrast, applications software (also called *end-user programs*) includes database programs, word processors, and spreadsheets. Figuratively speaking, applications software sits on top of systems software because it is unable to run without the operating system and system utilities.

⇒ See also APPLLET; APPLICATION SHARING; DATABASE MANAGEMENT SYSTEM; END USER; IDE; LEGACY APPLICATION; OPERATING SYSTEM; SOFTWARE; SOFTWARE LICENSING; SPREADSHEET; SYSTEMS SOFTWARE; UTILITY; WORD PROCESSOR.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
