Note: Some of the services in this manual are not supported by all networks. This also applies to the

GSM International Emergency Number 112. Please contact your network operator or service provider if you are in doubt whether you can use a particular service or not.

European Union standards

The **CE** symbol on our products signifies that they have been certified according to the EMC directive 89/336/EEC, the Telecommunications directive 91/263/EEC, and the Low Voltage directive 73/23/EEC when applicable. The products fulfil the requirements according to the following standards:

Cellular Phones and Accessories in Combination:
ETS 300 342-1 EMC for European digital cellular telecommunications.

Accessories Without Direct Connection to a Cellular Phone:
EN 50081 Electromagnetic compatibility. Generic Emission Standard, and EN 50082 Electromagnetic compatibility. Generic Immunity Standard.

Introduction

Your Ericsson R380s

Congratulations and thank you for buying the Ericsson R380s Smartphone, the ultimate mobile phone and personal digital assistant. This is an advanced, yet easy to use, product with a wide range of features, designed to make everyday life much easier.

Your R380s gives you the freedom to communicate wherever you are and whenever you want. Along with a host of mobile phone functions, your R380s can send and receive e-mail and SMS messages, browse the Internet via a WAP services browser and much, much more.

The advanced software in your R380s heralds a new era in mobile communications. Welcome to our wireless world!

Documentation

Documentation is designed to enhance your understanding of the capabilities of the R380s by providing you with both a quick reference and a more comprehensive description of the many functions within your R380s.

Descriptions follow the two main operational modes which are flip closed and flip open.

The term phone is equivalent to mobile or cellular phone.

Quick Guide

The Quick Guide is a printed document which provides quick reference on how to get started with your R380s where technical instructions are kept to a minimum.

User's Guide

The User's Guide is a printed document which contains a comprehensive description of all the functions in your R380s.

Note: *Information in the User's Guide is the same as the User's Manual, which is an electronic document on the enclosed CD.*

Information and Communications Suite CD

Insert the CD into your PC's CD-ROM drive and the main menu should appear automatically.

From the main menu you can start:

- A multimedia presentation, **R380 Product Information**, which is an on-screen description of the functions of the R380s.
- The installation of the **Eriasson R380 Communications Suite**, for PC synchronization, backup and restore of R380s data.

Note: See "R380 Communications Suite" on page 174 of the CD sleeve for more information if the CD-browser does not appear when the CD is inserted into your PC's CD-ROM.

- **Change Language in R380**, when synchronized.
- **The R380 User's Manual**, which is an electronic document containing a comprehensive description of all your R380s functions in portable document format (pdf).

Note: Adobe Acrobat Reader version 4.0 should be installed on your PC to read the R380 User's Manual.

- The installation of **Adobe Acrobat Reader version 4.0**.

Note: R380 User's Manual information on the CD is exactly the same as the printed R380s User's Guide. The names are different so that the printed document and the electronic document can easily be recognised.

- The installation of **Lotus Organizer version 5.0**.

See "Checklist" on page 7 for more information.

Getting Started

Checklist

Make sure the following items are in the box when you unpack it:

- R380s unit.
- R380s battery with touchscreen stylus.
- Charger with power plug and phone cable.
- User's Guides.
- Quick Guide leaflets.
- CD-ROM; Ericsson Mobile Communications and Information Suite software and the User's Manual (pdf).
- RS-232 cable for R380s to PC connectivity.
- Desk stand.
- 3 extra touchscreen styluses.
- Battery leaflet.
- Ericsson Service and Support leaflet.
- Accessory leaflet.

If you do not intend to read through the User's Guide or User's Manual before getting started, please spend a couple of minutes reading the Quick Guide. This gives you a quick reference on how to get started, although instructions are kept to a minimum.

Operational modes

The two main operational modes are when the flip is closed and when the flip is open. These operational modes are interchangeable where tasks can be started with the flip closed and, if required, continued in the more comprehensive flip open mode.

Although the manual covers both modes of operation in detail, it is very important to remember that many of the functions described are dependant on them being available from your network operator and internet service provider. Please consult your network operator and internet service provider for more information about the services that are available to you.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
