A mobile wireless local area communications network includes a pair of relatively movable nodes, such as a vehicle and a house, which are movable into and out of a defined and limited area of communications relative to the fixed node. Each node has a computer and human interface capabilities to enable transfer of data between the nodes. Each has the ability to automatically connect/disconnect the nodes when the movable node moves into/out of the area of communications. The system causes performance of a function extrinsic to the communication itself as a result of the initiation or the cessation of the communication, even after the nodes have been disconnected. A music playing system enables identification of a listener to the system, who can then instruct the system to compile a personal "don't play" list of identified music pieces and types of music pieces. This prevents the identified music pieces and types of music pieces from being played when the listener is identified to the system. Multiple listeners and "don't play" lists can be accommodated simultaneously.

Explore Litigation Insights

Docket Alarm provides insights to develop a more informed litigation strategy and the peace of mind of knowing you're on top of things.

Real-Time Litigation Alerts

Keep your litigation team up-to-date with **real-time alerts** and advanced team management tools built for the enterprise, all while greatly reducing PACER spend.

Our comprehensive service means we can handle Federal, State, and Administrative courts across the country.

Advanced Docket Research

With over 230 million records, Docket Alarm's cloud-native docket research platform finds what other services can't. Coverage includes Federal, State, plus PTAB, TTAB, ITC and NLRB decisions, all in one place.

Identify arguments that have been successful in the past with full text, pinpoint searching. Link to case law cited within any court document via Fastcase.

Analytics At Your Fingertips

Learn what happened the last time a particular judge, opposing counsel or company faced cases similar to yours.

Advanced out-of-the-box PTAB and TTAB analytics are always at your fingertips.

API

Docket Alarm offers a powerful API (application programming interface) to developers that want to integrate case filings into their apps.

LAW FIRMS

Build custom dashboards for your attorneys and clients with live data direct from the court.

Automate many repetitive legal tasks like conflict checks, document management, and marketing.

FINANCIAL INSTITUTIONS

Litigation and bankruptcy checks for companies and debtors.

E-DISCOVERY AND LEGAL VENDORS

Sync your system to PACER to automate legal marketing.
